## TRAFFIC CONTROL & CONSTRUCTION SOLUTIONS

Trinity Highway Rentals is the #1 manufacturer of water-filled barricades with the largest inventory in stock and ready to ship. We offer Construction Site, Airport, Work Zone, and Traffic Control solutions that are less susceptible to movement than chain-link fences, drums, and cones. Our water-filled barricades are made in the USA and can be assembled to meet various construction site needs, including perimeter fencing and pedestrian walkways. Flexible rental options are available to accommodate multi-phase projects.

# ROME

Available in 10, 12, 14, and 16 foot widths

Manufacturing Heavy Duty Construction and Agricultural Equipment Since 1932

ROME Plow has been the premier name in heavy duty disc plows for over 87 years.

Available in 16, 18, 20, 24, and 30 foot widths

ROME has been manufacturing pivot dump and ejector scrapers for over 45 years for the construction and agricultural industries.

Available with 36 or 42" blades, and up to 20' wide

ROME also manufactures a full line of leveling scrapers (with and without gates) and haul road maintenance tools (with and without rollers)

Available in 18 and 22 yard versions

For more information on our products or for the closest authorized ROME dealer please contact us.

Available in 24, 28, 31, 34 and 37 Yards

# Not All Lithium-Ion Batteries Are Created Equal

*Power Tool Institute promotes awareness of tested, listed OEM batteries*

It's no secret that lithium-ion batteries are great for power tools. They can be recharged hundreds of times with greater energy output compared to other rechargeables. This is, in part, how they have earned their reputation for stability and efficiency. However, not all lithium-ion batteries are the same. The Power Tool Institute (PTI) always recommends using only a lithium-ion battery made for that specific tool, by the tool's manufacturer. There are simply too many unknowns about third-party batteries, some of which can create great danger.

Reputable original equipment manufacturers (OEMs) have their products listed with an independent certification lab such as UL or Canadian Standards Association (CSA) to evaluate products for compliance with internationally accepted safety standards. This listing process is mandatory for power tools used in work environments governed by OSHA. The introduction of a third-party battery to the tool system negates this effort to document performance and safety compliance because cordless power tools and their batteries are tested as complete systems.

This total testing protocol — comprising a dedicated combination of tools, battery, and charger — helps ensure each component part communicates properly with the other in order to monitor and control critical functions.

# POWER & TRACTION IN ACTION

**ACHIEVER**  
RT-02 DD DIGGER DERRICK

**ACHIEVER**  
DPM-52 TRACKED AERIAL

## TRACKED DIGGER DERRICKS & AERIALS

- 57' working height (aerial)
- Exclusive hydraulic fold-out/removable bucket (digger derrick)
- Can be towed on a 10 ton trailer behind a line truck
- Sets up to 65' poles / 24" diameter
- 2.25 psi ground pressure (loaded), 17,500 lbs, 134 hp
- Super stable 45° hydraulic radial outriggers
- The shortest production lead times in the industry

For more information or to schedule a demonstration contact UTV International today.

[2sales@utvint.com](mailto:2sales@utvint.com)

1-800-985-8665

[www.utvint.com](http://www.utvint.com)

Only the tool manufacturer is able to obtain this “system” certification. Each manufacturer uses its own, proprietary control circuitry, which is not available to third-party component suppliers.

Some knock-off batteries may be listed to a general battery safety standard, but many are not tested or listed to any safety standard at all. A lithium-ion battery that is not intentionally designed to work properly with a specific tool and charger system can result in poor performance and shorter life, damage to the tool and charger, or, even worse, a battery bursting that may cause a fire or explosion.

For these reasons, PTI and power tool manufacturers recommend that only OEM lithium-ion batteries be used.

For more information on safe use of lithium-ion batteries, visit <https://www.powertoolinstitute.com/pti-pages/battery-safety.asp> •

#### About PTI

With the vision to unify and educate others about power tools, since its founding in 1968, the Power Tool Institute (PTI) has established itself as the leading organization for building global understanding of power tools and for maintaining high standards of safety in the industry. Its members, a list of whom can be found here, represent market-leading brands in the areas of portable and stationary power tools. PTI's members are committed to improving the industry and to being the premier resource for power tool education. For more information, contact PTI 216-241-7333 or [pti@powertoolinstitute.com](mailto:pti@powertoolinstitute.com). On the Web: [www.PowerToolInstitute.com](http://www.PowerToolInstitute.com) and [www.TakeChargeOfYourBattery.com](http://www.TakeChargeOfYourBattery.com).

# John Deere Now Offers JDLink™ Connectivity Service at No Additional Charge

- Beginning July 14, 2021, customers with active JDLink connectivity will no longer be required to renew their subscriptions.
- Moving forward, customers will be able to activate any compatible machine in their fleet at no additional charge, unlocking access to valuable machine data.
- By increasing access to JDLink™ connectivity, John Deere is helping to streamline fleet management while also maximizing machine uptime, ensuring customers can focus on what's most important, their business.

John Deere is improving the ability for customers to maximize machine performance and uptime through updates to the JDLink™ platform. Starting July 14th, 2021, customers will no longer need to renew their JDLink™ connectivity service subscription and can enable their JDLink™ service on any compatible machine in their organization at no additional charge. Additionally, once customers enable JDLink™ connectivity, they can select to automatically activate all future JDLink™ compatible models, further streamlining fleet management. With this update to the JDLink service offering, it is easier than ever before for customers to maximize machine productivity and minimize downtime.

“John Deere has offered telematics for well over a decade and the boost in machine monitoring and machine uptime has been an overwhelming benefit to our customers,” said James Leibold, product marketing manager, connected solutions, John Deere. “With the next phase of our JDLink™ offering, we are making it easier for customers to manage their fleets. Instead of needing to keep track of renewal dates by each machine, owners and fleet managers can look at monitoring their equipment holistically and can focus on what’s important – keep their job sites running.”

Available on most new models, John Deere’s JDLink™ telematics solution delivers valuable fleet insights directly into the hands of the machine owner or fleet manager. The JDLink™ service enables customers access to vital data, such as machine location and utilization, time in idle, fuel level, upcoming maintenance, machine alerts, and more, all from a web or mobile platform. Beyond machine monitoring, the JDLink™ solution also enables John Deere Connected Support, enabling the dealer to remotely identify critical issues and take action minimizing potential downtime or by remotely sending software payloads to ensure the machine is running efficiently. The updates to the JDLink™ offering will be available July 14th, 2021. To learn more about JDLink™ features as well as the full line of John Deere construction equipment, visit <http://www.johndeere.com/> or contact a local dealer. The specific services, tools, and features available may vary depending on location and machines.

*About John Deere*

*Deere & Company ([www.JohnDeere.com](http://www.JohnDeere.com)) is a world leader in providing advanced products, technology and services for customers whose work is revolutionizing agriculture and construction — those who cultivate, harvest, transform, enrich and build upon the land to meet the world’s increasing need for food, fuel, shelter and infrastructure.*

# US Skilled Trades Worker Shortage Worsening Amid Soaring Demand & Workforce Crisis

*Job postings up 50% from pre-pandemic levels, according to analysis by PeopleReady Skilled Trades; industries ripe for those looking for career changes*

You may have noticed construction projects are taking longer to complete these days and the timeline for home repairs is getting stretched out even further. The primary reason? Skyrocketing demand and a worsening shortage of workers in the skilled trades where the need was already far outpacing the number of tradespeople available before the pandemic, according to a new analysis by PeopleReady's skilled trades division.

According to the PeopleReady Skilled Trades analysis of millions of job postings, skilled trades were one of the few industries to experience growth nearly every month throughout the pandemic. However, the number of skilled tradespeople, already at a massive deficit, didn't keep up. Amid an overall workforce shortage, the gap between demand and supply for tradespeople is only growing wider. But it has created significant opportunities for anyone looking to make a career change.

“Whether you're someone who left the skilled trades to pursue other work or are looking to get your start on a new career path in a booming industry, now is a great time to join the skilled trades.

The jobs not only pay well and provide steady employment but can also offer the kind of flexibility workers are looking for right now,” said Jill Quinn, executive leader of PeopleReady Skilled Trades. “We are seeing explosive growth in the skilled trades industry right now. As businesses struggle to find skilled tradespeople amid current workforce challenges, more of them are turning to contingent workforces to help get the job done.”

According to the analysis comparing job posting growth since before the pandemic, some of the skilled jobs that have seen the most growth include:

- Concrete masons top the list with 904% growth in demand compared to pre-pandemic numbers.
- Job postings for window glaziers soared 422%.
- House painters saw a 329% increase.
- Electricians have risen 130%.
- Plumbers are up 129%.
- And carpenters are up 121%.

PeopleReady Skilled Trades notes that in addition to the need for skilled tradespeople, there are also plenty of helper or beginner positions available in nearly all of the trades for those looking to get their start in the skilled trades. •

# DICA Announces Plans for The Utility Expo

DICA will showcase products for utility contractors from its Outrigger and Crane Pad, Ground Protection, Cribbing and Blocking, and Rigging product lines during The Utility Expo. The show will be held September 28-30, 2021 in Louisville, KY.

“DICA products help contractors get ready to get to work, and have long been a staple of equipment stocked on utility trucks,” said Kris Koberg, CEO of DICA.

Among the company’s newest products, which will be featured at the show, are FiberTech Outrigger Pads, ProStack SlotLock Cribbing Blocks, and LiftGuard Sling Protectors.

DICA Outrigger Pads provide unbreakable strength, safe handling, and easy setup for use with aerial lifts, digger derricks and mobile cranes. FiberTech Outrigger Pads are an ideal solution when extra rigidity is needed and weight is a concern.

ProStack Cribbing Blocks are designed to provide height in situations where you need to crib up. Slot Lock Cribbing Blocks have a rated capacity of 100,000 lbs., and are suitable for use with aerial devices, digger derricks, concrete pumpers and smaller cranes.

LiftGuard Sling Protectors prevent damage to slings caused by contact with abrasive edges, corners, or protrusions from loads being lifted. They also keep the sling away from other significant contact points during lifting operations.

These, and other DICA products will be in use at many OEM equipment displays, including Terex, Altec, Dur-A-Lift, Elliott, Hiab, Manitowoc, QMC, Ring Power, Spiradrill, and TIME/Versalift equipment. Visit DICA at booth N1331.

## About DICA

*DICA, Guthrie Center, Iowa, has been specializing in building a better outrigger pad since 1988. By creating engineered solutions for improving equipment stability and ergonomic safety, DICA is leading the way in product innovation for outrigger pads, crane pads and cribbing.*

*DICA outrigger pads and crane pads are used in 50+ countries and on all 7 continents around the world in construction, maintenance, electrical utility, oil and gas and tree care as well as local, state and federal government agencies. Learn more at [www.dicausa.com](http://www.dicausa.com).*

## Parrot, Verizon, and Skyward Bring First 4G LTE Connected Drone to the US Market

First of its kind connected drone, Parrot ANAFI Ai is powered by Verizon 4G LTE and integrated with Skyward software to pave the way for near real-time data transfer, remote deployment, and Beyond Visual Line of Sight flight operations.

Today, Verizon, Parrot, and Skyward announced an exclusive partnership to bring the first out-of-the-box 4G LTE connected drone solution to the United States.

Parrot ANAFI Ai is the first and only off-the-shelf drone to connect to Verizon's 4G LTE network. Verizon 4G LTE connectivity is provided exclusively to Skyward subscribers at no additional cost. The Skyward Connected Drone Solution gives enterprises one complete experience for planning, flying, data transfer and processing data.

Parrot ANAFI Ai is a compact professional drone, built for work, setting a new communications standard, open to developers, with a full open source app, autonomous 1 click photogrammetry and new levels of cybersecurity. The Skyward Connected Drone Solution with Parrot's ANAFI Ai is making complex missions for photogrammetry, mapping, modeling in construction, infrastructure, inspection & surveying, public safety and enterprise use simpler, safer and quicker. In addition to its Verizon 4G LTE

connectivity, it features a uniquely designed omni-directional obstacle avoidance system, 48 MP imaging accuracy, 4K 60fps smooth videos, and up to 32 minutes of flight time in an airframe that weighs less than 2 pounds.

Parrot ANAFI Ai's embedded Secure Element secures the 4G LTE link between the drone and the user's device. Parrot's implemented streaming software is adapted to the 4G situation to quickly optimize the definition and frame rate to the network quality.

Parrot ANAFI Ai pilots can subscribe to a paid account or a free trial of the Skyward Connected Drone Solution to:

- Plan with Skyward's airspace map and fleet management tools
- Obtain fast, automated access to controlled airspace from the Federal Aviation Administration with LAANC
- Fly over Verizon 4G LTE with the Skyward InFlight mobile app
- Process with Skyward Mapping & Modeling, powered by Pix4D
- Transfer data during flight over 4G LTE

Users can activate 4G LTE connectivity in just a few taps exclusively in the Skyward InFlight mobile app. Today, as a Skyward customer, the cost of the ANAFI Ai's connectivity is included with a Skyward subscription — no wireless bills, hidden fees, complicated activation, or store visits are necessary. It's one more piece of a complete drone program management solution.

Once activated through Skyward, Verizon 4G LTE connectivity provides a seamless backup connection to the flight controller in case of interference or interruption. It paves the way for near real-time data transfer, remote deployment, and Beyond Visual Line of Sight flight operations — which are allowed today with a waiver from the FAA.

"Enterprise drone programs are pushing the limits of technology available today and advanced operators are ready for a connected, trusted, and capable drone to take their drone programs to the next level," said Mariah Scott, Head of Verizon Robotics Business Technology. "Parrot ANAFI Ai connected to Verizon 4G LTE marks an industry milestone toward distributed, remote, persistent operations that lets users fly to anywhere from anywhere with near real-time data transfer."

"Cellular connectivity is the new communications standard for the professional drone industry and Parrot ANAFI Ai seeks to set new standards for drones at work" said Henri Seydoux, Founder and CEO

# THE FUTURE IS BRIGHT.

WITH A NEW MANUFACTURING FACILITY, ADDITIONAL  
SERVICE CENTERS AND EXPANDED SERVICE AND PARTS TEAM

**We're more prepared than ever to deliver.**

For more than 75 years, Terex Utilities has been a pioneer of insulated and digging equipment for the electric utility industry. Along the way, we've established a pattern of innovation and continuous improvement in order to deliver solutions so linemen can be productive and keep the lights on for their customers. This is an exciting time in Terex Utilities' history – with strategic investments being made in our manufacturing capabilities, our service footprint, new products, team members and overall customer experience. The future is looking bright, and we're excited to continue delivering equipment and service solutions to the electric utility industry – now better than ever.

**Be Davis-Bacon Compliant In Minutes**

# *The New Standard for Linemen*

At Tallman Equipment, our priority is to set the standard in the electric transmission and distribution industry with an all-inclusive approach to serving our customers. Our vision to deliver a trio of quality, convenience, and reliability is driven by listening and adapting to the needs of our customers. As the industry changes, so does Tallman. As a result, Tallman Equipment has become a unique company within our industry offering a full range of professional services including tool sales, product distribution, rentals, and repair. Tallman is already a trusted name in stringing blocks, cable assemblies, fiberglass, and rope products – and we are excited to announce the addition of our new Rubber Goods Testing Lab.

## *Our Services Include:*

**Groundset & Jumperset Manufacturing, Repair & Refurbishing**

**Transformer Sling Manufacturing & Rope Repair**

**Battery Power Tool & Equipment Repair**

**Fiberglass Tool Testing, Repair & Refinishing**

**Tool & Equipment Rental**

**Rubber Goods Testing & Refurbishment**

*Trust* **TALLMAN**

# Revolutionary Lighting Solutions

**GOLIGHT**

**Durable...Versatile...Powerful...GUARANTEED**

When the power goes out we know we can rely on our nation's linemen to strap on their boots and march into the elements to get our electrical service back online. More often than not, that means battling wind, rain, snow and ice and doing so in the dark. In those conditions, light that can be dynamically directed where it is needed, when it is needed is an essential tool for safety and productivity. In both emergency situations and day to day operations Golight has proven to be a vital tool in extending work hours and increasing productivity. Golight has been a partner to the men and women who keep our lights on for almost 20 years and we are committed to seeing that relationship grow and develop.

KOOZIES... BANDANNAS... DECALS... Send an email to [media@golight.com](mailto:media@golight.com) and let us know you saw our ad in "THE UTILITY SOURCE" and we will send you some Lineman branded merchandise!
