Improving Construction Safety, One Video Frame at a Time

Mikrotron Camera Analysis of Fall Arrest Systems Helps Prevent Construction Industry Injuries

Falls are the leading cause of death in the construction industry, averaging about 300 fatalities annually in the United States alone. To protect these workers, fall arrest systems are required where the risk of falling cannot be entirely eliminated by other safety measures.

Fall arrest systems come in a variety of designs and are subject to rigorous performance testing. To investigate the effectiveness of different system designs, the Professional Association Institute for Occupational Safety (Berufsgenossenschaftliches Institut für Arbeitssicherheit) near Bonn, Germany, recently conducted a study using anthropomorphic dummies that revealed potential failings in several safety harnesses during a simulated fall arrest. These dangers concerned mainly shoulder straps slipping, along with sternal and dorsal attachments causing injury. The behavior of the harnesses during fall arrest depends significantly on their construction, especially on the arrangement of straps and attachment buckles.

Falls of the anthropomorphic dummy and the behavior of the harnesses during fall arrest were recorded using a Mikrotron Cube 7 Motion-BLITZ EoSens® camera set to 1024 x 1024 pixel resolution at 1410 frames-per-second. Its Dynamic Range Adjustment feature allowed research

ROME

Available in 10, 12, 14, and 16 foot widths

Manufacturing Heavy Duty Construction and Agricultural Equipment Since 1932

Available in 16, 18, 20, 24, and 30 foot widths

Available with 36 or 42" blades, and up to 20' wide

Available in 18 and 22 yard versions

ROME Plow has been the premier name in heavy duty disc plows for over 87 years.

ROME has been manufacturing pivot dump and ejector scrapers for over 45 years for the construction and agricultural industries.

ROME also manufactures a full line of leveling scrapers (with and without gates) and haul road maintenance tools (with and without rollers)

For more information on our products or for the closest authorized ROME dealer please contact us.

Available in 24, 28, 31, 34 and 37 Yards

770-748-4450 - www.romeplow.com

Steel Tracks available to fit any articulating tractor.

ers to dynamically adjust the camera's CMOS sensor for higher contrast scenes. Recorded material was then analyzed using TemaMotion Starter II image identification technology to determine the motion, speed and acceleration of selected points in sequences of frames.

Analysis of fall arrest recordings did reveal instances of the sternal attachment impacting the dummy's face. Pressure was exerted on the dummy's neck and head as a result of the dorsal D-ring sliding upward along the shoulder straps. In some models of harnesses, the steel buckle traveled along the shoulder straps causing the straps to tighten around the dummy's neck and head, and potentially injuring the face area.

The majority of safety harness tests are conducted following the methods stipulated in international safety standards calling for the use of a rigid torso dummy, instead of an anthropomorphic dummy which more closely simulates human response. The researchers at Berufsgenossenschaftliches Institut

WE KEEP AMERICA ON TRACK

OR

Visit: morookacarriers.com

für Arbeitssicherheit believe that the rigid torso dummy is insufficient for a comprehensive evaluation of harness performance and their safety parameters. Considering the significance of the results obtained, the researchers expect to continue testing for other dummy positions, such as head down, head inclined sideways and positions causing rotation, using the Mikrotron camera. The study of such cases will allow the development of better criteria for assessing safety harnesses and improving their overall design.

About Mikrotron GmbH

Mikrotron GmbH, established in 1976 and located just outside Munich, Germany, provides a full range of high-end imaging solutions for challenging applications in industry, engineering, science and sports. The company designs, produces, and commercializes high-speed and high-resolution cameras, image recording cameras and systems, software and image processing components. Mikrotron's slow-motion recording enables customers to optimize manufacturing processes, improve product design, revolutionize quality management and analyze motion. Mikrotron is ISO:9001 certified. Mikrotron is operated as a business unit of Lakesight Technologies, and is part of TKH Group NV.

The New Standard for Linemen

At Tallman Equipment, our priority is to set the standard in the electric transmission and distribution industry with an all-inclusive approach to serving our customers. Our vision to deliver a trio of quality, convenience, and reliability is driven by listening and adapting to the needs of our customers. As the industry changes, so does Tallman. As a result, Tallman Equipment has become a unique company within our industry offering a full range of professional services including tool sales, product distribution, rentals, and repair. Tallman is already a trusted name in stringing blocks, cable assemblies, fiberglass, and rope products – and we are excited to announce the addition of our new Rubber Goods Testing Lab.

Our Services Include:

Groundset & Jumperset Manufacturing, Repair & Refurbishing

Transformer Sling Manufacturing & Rope Repair

Battery Power Tool & Equipment Repair

Fiberglass Tool Testing, Repair & Refinishing

Bosch Power Tools Updates Tuckpointing Grinder with Focus on Power, Durability, and Dust Capture Capabilities

Bosch Power Tools, a global leader for power tools and power tool accessories, today announced a new version of its 5-inch high-powered, high torque dedicated tuckpointing grinder and dust guard. The model GWS13-52TG is designed to replace the 1775E.

This new high-torque grinder with a dust guard is designed specifically for tuckpointing. It significantly boosts the power over the previous model from 8.5-amp motor to a 13-amp motor, producing 9,300 RPM.

The GWS13-52TG is engineered for high performance and improved durability with a metal guard mounting flange collar, dust protection with directed airflow and an enclosed spring-loaded guard for maximum dust capture. The new model is ideal for tuckpointers for the removal of brick mortar.

Features include:

- Motor is protected from dust and debris with epoxy-coated field windings and four-stage dust seals protect the gears and help ensure longer tool life
- Constant electronic monitoring provides level operation and reliable speed under load
- A viewing window on the dust guard makes it easy to see the cutting line
- 1-3/8 inch dust port is designed to accommodate Bosch vacuum hose nozzles, but adapters (sold separately) are available to fit other vacuum hose nozzles
- Works with Bosch PRO+GUARD Dust Solutions, an end-to-end dust-collection system that helps us-

Unitrex XS™ Max Wear. Unmatched performance in the field and in the boardroom.

Electric line stringing is easier and more economical with Unitrex™. Made with a core of Honeywell Spectra®, it is up to 10 times lighter than steel, while delivering comparable strength. The urethane-coated polyester jacket provides excellent abrasion resistance for great productivity that lasts.

Eriez® Oil Belt Skimmers Now Available with Special Belts for High Temperature Parts Washing Applications

Eriez® Surface Oil Belt Skimmers feature an oleophilic (oil attracting) belt that hangs into the sump where it removes free-floating tramp oils. Two models and four belt options-- including a special belt for high temperature parts washing applications--are now available.

The Oil Skimmer squeezes oil between rollers, a method of stripping the oil from the belt that does not require scraping. This skimmer is designed for use on large machine tools with tanks deeper than two feet. The Oil Skimmer Jr. is designed for machine tools with shallow tanks.

Both the Oil Skimmer and Oil Skimmer Jr. models can be equipped with a timer, so the unit runs only when the machine is idle and tramp oils have risen to the surface. "For added convenience, the Oil Skimmer Jr. now comes with a magnetic mount," says Eriez Fluid Recycling Product Manager Ron Wendt.

Eriez has offered the Oil Skimmer and Oil Skimmer Jr. for more than two decades. Wendt reports the company has sold thousands of standard units and tens of thousands of the Jr. design. "Customers keep using them for a very long time and just replace the belts when they wear out," Wendt explains.

For more information about the Oil Skimmer, Oil Skimmer Jr. and additional tramp oil removal solutions from Eriez, visit www.erieznews.com/nr560 •

#1 IN DURABILITY

Revolutionary Lighting Solutions

GOLIGHT

Durable...Versatile...Powerful...GUARANTEED

GOLIGHT

When the power goes out we know we can rely on our nation's linemen to strap on their boots and march into the elements to get our electrical service back online. More often than not, that means battling wind, rain, snow and ice and doing so in the dark. In those conditions, light that can be dynamically directed where it is needed, when it is needed is an essential tool for safety and productivity. In both emergency situations and day to day operations Golight has proven to be a vital tool in extending work hours and increasing productivity. Golight has been a partner to the men and women who keep our lights on for almost 20 years and we are committed to seeing that relationship grow and develop.

KOOZIES... BANDANNAS... DECALS... Send an email to media@golight.com and let us know you saw our ad in "THE UTILITY SOURCE" and we will send you some Lineman branded merchandise!
