New Braden Bolt-On Utility Winch Bumpers Save Time and Money on Installation

BRADEN has introduced new direct bolt-on utility winch bumper options for PACCAR New Medium Duty Trucks as part of its popular UBX20 and PD18 Utility Bumper and Planetary Recovery Winch Systems. Available now for Kenworth and Peterbilt Aero and Vocational models, the patented designs allow the bumpers to be attached directly to the chassis frame for hassle-free installation.

The newest additions to the UBX20 and PD18 replacement bumper lines for utility fleet applications feature mounting bolt patterns matched specifically to the new Kenworth and Peterbilt Medium Duty models for the Class 5-7 segments listed below. That means there is no need for custom mounting brackets or welding, which saves on time and cost of installation. Both bumper systems are engineered to deliver proven BRADEN strength and performance with maximum winch line pull ratings of 20,000 lbs (9,072 kg).

BRADEN direct bolt-on bumpers are available for the following PACCAR New Medium Duty models:

Kenworth Truck Company – T480, T380, T280, T180

Peterbilt Motors Company – 548, 537, 536, 535

The UBX20 utility bumper is available with TR20 and PD18 Planetary Recovery Winch models. Featuring a lighter and more aerodynamic design, the UBX20 has a reinforced steel frame with two tow-eyes for maximum pulling capabilities. An optional provision for the installation of a collision mitigation system is available to assist safe driving. The bumper accommodates a capstan to easily pull lighter loads at faster speeds

The New Standard for Linemen

At Tallman Equipment, our priority is to set the standard in the electric transmission and distribution industry with an all-inclusive approach to serving our customers. Our vision to deliver a trio of quality, convenience, and reliability is driven by listening and adapting to the needs of our customers. As the industry changes, so does Tallman. As a result, Tallman Equipment has become a unique company within our industry offering a full range of professional services including tool sales, product distribution, rentals, and repair. Tallman is already a trusted name in stringing blocks, cable assemblies, fiberglass, and rope products – and we are excited to announce the addition of our new Rubber Goods Testing Lab.

Our Services Include:

Groundset & Jumperset Manufacturing, Repair & Refurbishing

Transformer Sling Manufacturing & Rope Repair

Battery Power Tool & Equipment Repair

Fiberglass Tool Testing, Repair & Refinishing

Tool & Equipment Rental

Rubber Goods Testing & Refurbishment

Trust TALLMAN

Steel Tracks available to fit any articulating tractor.

Terex Utilities Demonstrates Solutions to Common Utility Fleet Challenges

Terex Utilities showed multiple new products and technologies at The Utility Expo, September 28-30, in Louisville, Ky. “New product launches began rolling out in early 2021. We are introducing more new products and technology than at any time in the company’s history. The Utility Expo will be the first-time many industry professionals will get to see these products in person,” said Joe Caywood, Director of Marketing.

Among the equipment that was featured during daily demonstrations at the show is an Optima HR55 equipped with many options to aid the operators and users. Frequently used for construction and maintenance of distribution lines, the Optima HR55 is designed to provide reliability, efficiency and simplified operation and maintenance.

“Through the years, many of these innovations came to fruition based on market need. We listen to feedback from customers and work with them to develop solutions to real-world challenges,” said Caywood. Two examples are the Positive Attachment Lanyard (PAL) warning device and Load Alert.

PAL is an integrated system that signals the operator with visual and audible warnings if his or her lanyard is not attached to the anchor point when the aerial device is operated. Terex Utilities first introduced PAL in 2017 after running a pilot program with a leading electric utility cooperative. Meanwhile, Load Alert monitors and analyzes the truck’s jib and platform capacity and boom positions on Terex aerial devices. It provides visible and audible alerts when an overload is detected.

“Many other options equipped on the show demo unit are intended to reduce slips, trips and falls—high visibility grab handles, steps and outrigger pads, and bucket liner with interior step,” said Robert Hasegawa,

WE KEEP AMERICA ON TRACK

Product Manager. Other features aid setup procedures. For example, sag lights illuminate if the outriggers are not in the stowed position; Brigade Backeye 360 is a camera system providing 360-degree view of the truck from inside the cab; and Crossfire is a system that equalizes inner and outer tire pressures on dual tire trucks.

Demos of New Products

In addition to the Optima HR55 equipped with popular options, three new products were included in the demos.

The General 65 MAX, introduced in June 2021, is the strongest digger derrick in the transmission market. It boasts greater capacities through all boom angles, but especially in the work zone for digging and lifting at low boom angles. The General 65 MAX will be equipped with the new Extreme Duty Digger Auger, available for dirt or rock conditions.

The TL48 Telescopic Aerial Device, released in April 2021, features industry leading side reach and material handling capacity. It achieves 53 ft working height on a Super-Duty class vehicle, while maintaining vehicle payload and jib capacity to get the job done. It will be equipped with SmartPTO, a simple and reliable idle reduction option, which increases fuel savings, and minimizes noise and air pollution by utilizing stored plug in electric power to operate the equipment.

The Genie Z-45 Substation Utility Boom (SUB), introduced to market in January 2021, is like no other device available for power substation applications. Purpose-built, it provides insulation and maneuverability for en-

Providing strength & stability, with a twist.

hancing work practices used in substations. Featuring a fiberglass fly jib section and fiberglass platform with swing gate, the Z-45 SUB complies with ANSI A92.2 standard for Category E insulating rating of 20 kV, as measured between the boom tip and the chassis. Based on the Genie Z-45 XC, the telescopic articulating boom has a maximum platform height of 45'6" and horizontal reach of 24'9". Continuously monitored load weighing enables dual work zones with capacity of 660 lbs. at maximum reach or 1,000 lbs in the maximum capacity zone. The load sensing system will also disable boom function if the platform is overloaded. Utility workers will also have greater control of platform positioning with zero tail-swing, 355-degree rotation, full time 4-wheel drive, traction control, drive at height capability, and excellent up-and-over reach.

WORKS FOR YOU.™

DEWALT® ATOMIC Compact Series™ 20V MAX* Lineup Expands with New Impact Driver and Impact Wrenches

20V MAX* 1/4-In. 3-Speed Impact Driver Is The Shortest High Torque Impact Driver Ever From DEWALT
TOWSON, MD (September 27, 2021) – DEWALT adds to the growing ATOMIC Compact Series™ 20V MAX* portfolio with a new 20V MAX* 1/4-In. 3-Speed Impact Driver (DCF850), 20V MAX* 1/2-In. Impact Wrench with Hog Ring Anvil (DCF921), 20V MAX* 1/2-In. Impact Wrench with Detent Pin Anvil (DCF922), and 20V MAX* 3/8-In. Impact Wrench with Hog Ring Anvil (DCF923). Each tool boasts a short length and minimal weight for tight-space applications and user comfort.

At only 3.97-in. in length, the 20V MAX* 1/4-In. 3-Speed Impact Driver (DCF850) is 29 percent shorter**. With a brushless motor that delivers 30 percent more max torque*** at 1825 in-lbs., as well as 3250 RPM (no-load), the impact driver powers through heavy applications like larger fasteners and spade bits while provid-

Making perfect connections has never been simpler. In fact, now it's a **SNAP!**

NEW *SNAP* Connectors from Greaves. A revolutionary compression connector concept that gets the job done with just a few turns of a standard wrench!

- ▶ Time-saving, easy installation
- ▶ Superior pull-out strength and conductivity
- ▶ No bulky and costly tools and dies

GREAVES

ing access to tighter spaces like cabinetry and framing. Three LED lights provide optimum illumination while 3-Speed setting and a variable speed trigger allow for precision and control.

Each of the new 20V MAX* Impact Wrenches delivers up to 300 ft-lbs. of max tightening torque and up to 450 ft-lbs. of max breakaway torque, all at an astonishing weight of just 2.5 lbs. (tool only) each. At less than 5-In in length, the DCF921 brushless impact wrench is 28 percent more compact† for comfort and improved access when working in tight spaces. Glass filled nylon housings help resist the effects of harsh automotive chemicals and solvents making it ideal for use in a variety of construction and automotive applications including grooved couplings, pipe flanges, concrete anchors, brake repair, engine bay work, suspension repair and more. Precision Wrench™ Control provides added control when used in forward/reverse and Timber-Screw™ Mode for performance in wood fastening applications. The DCF921 and DCF923 each feature a hog ring anvil for easy socket changes while the DCF922 has a detent pin anvil for users who require additional socket retention. Users can also select LED brightness with the 3 mode select button.

The new DEWALT ATOMIC Compact Series™ 20V MAX* Impact Driver and Impact Wrenches will be available

Hydraulic Detachable Gooseneck

For more than two decades, our Hydraulic Detachable Gooseneck Trailer has been North America's bestselling detachable lowboy for construction professionals—and for good reason.

It's engineered to make unhooking, loading and unloading, and hooking up again a simple one-person operation.

770-748-4450 - www.romeplow.com

Steel Tracks available to fit any articulating tractor.

Construction Barricades

We Rent Nationwide.

TRAFFIC CONTROL & CONSTRUCTION SOLUTIONS

Trinity Highway Rentals is the #1 manufacturer of water-filled barricades with the largest inventory in stock and ready to ship. We offer Construction Site, Airport, Work Zone, and Traffic Control solutions that are less susceptible to movement than chain-link fences, drums, and cones. Our water-filled barricades are made in the USA and can be assembled to meet various construction site needs, including perimeter fencing and pedestrian walkways. Flexible rental options are available to accommodate multi-phase projects.
