Construction Barricades

We Rent Nationwide.

TRAFFIC CONTROL & CONSTRUCTION SOLUTIONS

Trinity Highway Rentals is the #1 manufacturer of water-filled barricades with the largest inventory in stock and ready to ship. We offer Construction Site, Airport, Work Zone, and Traffic Control solutions that are less susceptible to movement than chain-link fences, drums, and cones. Our water-filled barricades are made in the USA and can be assembled to meet various construction site needs, including perimeter fencing and pedestrian walkways. Flexible rental options are available to accommodate multi-phase projects.

OTR Introduces NDX™ Tire and Wheel System Featuring The Tire That Never Goes Flat

OTR Wheel Engineering, Inc. (OTR) has launched the NDX™ airless tire and wheel system for turf equipment and utility vehicles. Developed to solve the recurring problem of flat tires for vehicles operating on rough terrain, NDX minimizes loss of productivity and revenue for fleets and owner-operators, while increasing ride quality.

Featuring a patent-pending design, NDX combines multi-layered construction, engineered structural supports and a tread belt that maintains desired curvature and safe ground clearance at all times. Heavy-duty construction offers superior operating life, lasting up to twice as long as other airless tire options, without sacrificing load capacity.

Additionally, NDX uses premium rubber compounds and a deflection management system that optimizes energy absorption and load distribution, resulting in a ride equal to or better than pneumatic tires. Other benefits of this system include less jarring and bouncing as well as reduced operator fatigue. Fuel consumption is also reduced – up to 10-percent when compared with similar tire options – making the NDX system more environmentally friendly.

WE HAVE THE ROPE TO GET THE JOB DONE.

BUCCANEER
rope company

Providing strength & stability, with a twist.

Sold as an assembly (tire plus wheel), the NDX system is available for more than 50 turf equipment products and 10 utility vehicle fitments supporting popular OEM models. OTR is also introducing NDX-style smooth type front tires with turf-friendly patterns.

“The NDX tire is a game-changing solution to the long-standing problem of flat tires,” says Fred Taylor, founder and Chairman of the OTR Board. “Our history of tire and wheel innovations, advanced construction and relationships with end users have been fully leveraged in this product development. The result is a system that looks and behaves like a pneumatic tire, except it never goes flat, thus eliminating costly downtime and repairs. NDX is tough and durable, as well as competitively priced, to deliver exceptional value and a safe, comfortable ride.”

OTR Wheel Engineering, Inc. is a market-leading global enterprise specializing in off-road mobility solutions for original equipment manufacturers (OEMs) and the aftermarket. Known for market-driven tire and wheel innovations, OTR also provides value-added services such as tire mounting, sequencing, warehousing and sub-assembly. As a result, the firm has established partnerships with well-known OEMs and distributors covering the Lawn & Garden, Powersports, Construction, Agriculture, Forestry, Mining, Material Handling and Specialty Vehicle markets. OTR’s infrastructure comprises over 30 manufacturing facilities and warehouses located in the U.S., Canada, Europe, and Asia. For more information, visit www.otrwheel.com •

Upon Precision Technology Suite With SmartGrade™ Remote Support

SmartGrade Remote Support is crucial in providing customers and dealers with the most efficient method of troubleshooting and increasing uptime.

SmartGrade Remote Support was introduced with the launch of the 700L/750L SmartGrade dozers and will continue to be part of future SmartGrade launches using the MC-X1 platform.

John Deere is pleased to offer SmartGrade Remote Support on its newest SmartGrade dozers, motor graders, excavators, and compact track loaders. SmartGrade Remote Support, which includes both Remote Display Access (RDA) and Wireless Data Transfer (WDT), will be available on most SmartGrade products for six years from the factory invoice date.

Currently available on the 700L/750L/850L SmartGrade dozers, the SmartGrade motor graders and the 210G LC and 350G LC SmartGrade excavators, and the compact track loaders, these features enable dealers and customers to work together to remotely transfer project files to machines and troubleshoot any grade control-related issues. This is important for more efficient management of large GPS equipment fleets. Real-time remote visibility and management of important grade control parameters can save valuable troubleshooting time and keep machines up and running. Dealers can also use the latest technology for operator training and troubleshooting.

THE FUTURE IS BRIGHT.

WITH A NEW MANUFACTURING FACILITY, ADDITIONAL
SERVICE CENTERS AND EXPANDED SERVICE AND PARTS TEAM

We're more prepared than ever to deliver.

For more than 75 years, Terex Utilities has been a pioneer of insulated and digging equipment for the electric utility industry. Along the way, we've established a pattern of innovation and continuous improvement in order to deliver solutions so linemen can be productive and keep the lights on for their customers. This is an exciting time in Terex Utilities' history – with strategic investments being made in our manufacturing capabilities, our service footprint, new products, team members and overall customer experience. The future is looking bright, and we're excited to continue delivering equipment and service solutions to the electric utility industry – now better than ever.

Give us a call at 844-TEREX-4U for your equipment, service and parts needs.

www.terex.com/utilities

WORKS FOR YOU.™

“Offering real time support to our customers is key, especially when it comes to the precision construction lineup. By incorporating technology like SmartGrade in our excavator lineup, we are helping to boost job site productivity and efficiency while enhancing the capabilities of our operators,” said Sean Mairer, product manager grade control, John Deere Construction & Forestry. “There isn’t always a one-size-fits-all solution, and contractors need options to pair the right technology with their business needs. This is where customers really benefit from the flexibility of our grade management path.”

SmartGrade Remote Support is crucial in providing customers with the most efficient method of troubleshooting and increasing uptime and enables the dealer to remotely monitor and support the machine from miles away. Wireless Data Transfer provides the ability to remotely send updated design files to the machine, saving trips to the job site. Any user with a MyJohnDeere.com account paired with the machine can utilize remote support.

To learn more about SmartGrade Remote Support, as well as the full range of John Deere precision construction technology solutions, visit www.JohnDeere.com •

About John Deere

Deere & Company (www.JohnDeere.com) is a world leader in providing advanced products, technology and services for customers whose work is revolutionizing agriculture and construction — those who cultivate, harvest, transform, enrich and build upon the land to meet the world’s increasing need for food, fuel, shelter and infrastructure.

Hydraulic Detachable Gooseneck

For more than two decades, our Hydraulic Detachable Gooseneck Trailer has been North America’s bestselling detachable lowboy for construction professionals—and for good reason. It’s engineered to make unhooking, loading and unloading, and hooking up again a simple one-person operation.

Nova USA Wood Products Introduces New Line of ExoDek® QuickClips®

Nova USA Wood Products Introduces New Line of ExoDek® QuickClips®

*New Hidden Deck Fasteners Expand & Contract to Accommodate Natural Swelling & Shrinking of Wood Decking;
Perfect for Hardwoods like Ipe, Batu, Cumaru & Mahogany*

Nova USA Wood Products, Inc., a leading supplier of high-quality hardwood products and accessories, has introduced a new line of ExoDek® QuickClip® hidden fasteners that expand and contract with the natural swelling and shrinkage of hardwood and softwood decking products as well as PVC and composite deck boards.

The ExoDek Quickclips were specifically designed for Nova's line of premium hardwood decking products like Ipe, Batu, Cumaru & Mahogany. Exceptionally easy to install, the new hidden fastener system was developed after years of scientific testing to specifically ensure that deck boards remain securely fastened through all four seasons and greatly reduce the possibility of inadequate or uneven spacing and loose, buckled and/or damaged boards.

"Natural hardwood decking is likely to expand and contract in the width of the boards as a result of seasonal humidity changes, while composite and PVC deck boards are prone to shift when temperatures repeatedly go up and down," says Steve Getsiv, president and CEO of Nova Products Inc.

"Our new ExoDek QuickClips respond naturally to this swelling and shrinkage. When the wood dries out,

WE KEEP AMERICA ON TRACK

or the composite boards cool down, the hidden fastener system's resilient design automatically moves the boards back into place, spaced perfectly, and securely fastened to the joist below. We're unaware of any other products in the marketplace that work as well to control the natural movement of deck boards."

Designed with glass fiber reinforced Nylon (Polyamide 6/6), the new ExoDek QuickClip hidden deck fastener system is perfect for ensuring the long-term structural integrity of high-end decking projects. With the ability to secure up four to five rows of decking at a time and

Glen-Gery Celebrates Launch of its 2022 Collection

Celebrations included an exclusive G21: Fashion on Fifth product unveil and book launch for Materiality 2021, in partnership with the NYCxDesign Festival

Today, Glen-Gery Corporation, a brand of Brickworks, hosted G21: Fashion on Fifth, the official unveiling of Glen-Gery's new products available in 2022. The event was followed by the NYCxDESIGN & Glen-Gery Materiality book launch and panel discussion, in celebration of the brand's newest architectural publication.

G21: Fashion on Fifth previewed Glen-Gery's 2022 collection to an audience which included architects, designers and industry media. The new collection features an assortment of new products from range extensions and exciting new brick series, to unique international products sourced from around the

globe, including:

- **Metallix Series:** A brick face that glimmers, sparks immediate interest and which possesses great subtlety. Currently available in Platinum, Titanium, and Cuprum colors. With its depth of color, the Metallix range reflects light on finished brickwork, creating a satin metallic sheen that will lend depth and sophistication to every project.
- **Endless Skies Series:** Combines today's color trends with versatility and value in four colors, including Night Smoke, Taupe Horizon, Sunset Sun and Tuscan Sun - a traditional red. The range offers the perfect options for anyone designing a contemporary or conventional home.
- **Aviator Series:** Consists of several distinct monochromatic tone bricks with sharp contrasts that resemble those of early aircraft and aviation equipment. The colors are unique and versatile, creating an architectural feel that will surely stand out on the block, available in Charter White, Pilot Gray, and Jet Black.
