# ALL Adds New Manitowoc Lattice Boom Crawlers

## ***MLC300 VPC-MAX, attachments, bound for national footprint***

The ALL Family of Companies is beefing up its stock of Manitowoc lattice-boom crawlers, with a focus on the versatile 330-ton class MLC300 cranes. The acquisition includes two new Manitowoc MLC300 VPC, two additional VPC-MAX attachments, one MLC300 luffing jib attachment, and one MLC650 3.5-meter-wide boom attachment.

The MLC300 VPC delivers unprecedented lifting performance with the strongest load charts in its class. A self-erect mast cylinder and other features reduce set-up time. Manitowoc's proprietary Variable Position Counterweight® (VPC®) technology actively engages all counterweight and eliminates the need for passive carbody weights — weight that can now be added to the upperworks to increase capacity

while retaining performance and on-site mobility. The result is dramatically reduced transport configuration and better center of gravity for reduced ground bearing pressures.

In addition to the VPC, the optional VPC-MAX attachment offers the ability to further increase the load chart, as well as boom and jib combination lengths. The VPC-MAX attachment increases the MLC300's max load moment and offers more compact tailswing, delivering greater lifting capacity in a smaller work environment. With VPC-MAX, the counterweight movement is dictated by forward movement changes, so the counterweight re-positions itself automatically as forward movement occurs, based on load lift, boom length, jib length, and load radius. The VPC-MAX counterweight assembly never touches the ground, so job site preparation is also minimized.

Rick Mikut, ALL's crawler crane division manager, says the acquisition continues ALL's pledge to have the most up-to-date, best-maintained fleet. "We're excited to be updating and improving our MLC300-class offering to meet customer demand," said Mikut. "VPC-MAX and MLC300 luffing jibs have proved popular with customers in a variety of markets, including new construction, bridge construction, plant work, and others."

Mikut points to the MLC300's built-in versatility as well as its variety of attachments for making it a standout in its class. "These machines are so strong, and because the VPC-MAX doesn't touch the ground, they often use less matting than similar-class cranes. With their other features for quick set-up, they get working fast, saving customers time and money."

# Three Gloves, One Mission: Comfortable Compliance

*They'll Never Want to Take Off Brass Knuckle® SmartFlex™ 400 Series*

With long-lasting comfort comes increased compliance. That's the thought behind the SmartFlex™ 400 Series hand protection from Brass Knuckle®. Three gloves, each designed with a 13-gauge nylon shell offering abrasion resistance, uncoated back and wrist to encourage all-day wear, and ultra-thin polyurethane coating on the palm and finger area for an amazingly sensitive gripping surface. Every glove in the 400 Series enables accurate handling of even the smallest of parts, whether in dry or light oil applications.

These thin-gauge general purpose gloves are ideal for everything from electronics repair to small parts assembly. The SmartFlex 400 Series combines outstanding dexterity, lightweight comfort, and protection from injury. BK401 is black nylon with gray coating to conceal dirt and grime. BK402 is white-on-white, making it easy to identify foreign particles on the glove, ideal for inspectors and quality control. BK403 is black nylon with a black coating, a tough-looking concealer for grimy projects. Each model is available in seven different sizes with color-coded cuffs to simplify re-issuance.

Each glove in the series is carefully constructed, designed for fit, but also cost-competitive. The lightweight, 13-gauge nylon shell provides dexterity and grip and is more lint-free than polyester. A grippy but not sticky polyurethane coating on the palm and fingers makes the 400 Series excellent for dry-grip applications.

400 Series gloves are ideal for many applications not requiring cut-level protection, from automotive to warehouse to light construction and assembly. Designed for maximum comfort and ease of use for all-day wear, the 400 Series offers protection and helps increase wearer compliance. Workers will never feel like they have to take these gloves off.

## John Deere Introduces New P-Tier Articulated Dump Trucks

- John Deere introduces its first articulated dump truck models within its Performance Tiering portfolio.
- The updated cab layout on the P-Tier ADTs helps maximize operator comfort and ease of operation.
- These redesigned ADT models offer a more modern style including various visual and stylistic updates.
- Customers can choose from different trim levels and application packages.

John Deere expands its Performance Tiering Strategy to its line-up of articulated dump trucks. New to the P-Tier portfolio, the 410 and 460 ADTs retain the same fuel efficiency, dump body, and drive modes as the previous E-II models. For all P-Tier models, additional updates to the external styling and interior cab layout modernize the fleet while maintaining the productivity these trucks have become known for. These machines also feature a range of standard onboard settings to help ease operation and increase efficiency during any application.

“The P-Tier models were built with the operator in mind to support ease of use and operator comfort,” states Justin Steger, solutions marketing manager, John Deere Construction & Forestry. “Redesigning the layout of the components in the cab and grouping features together and packaging them in a meaningful way based on the application are a couple of examples of how we’re incorporating customer feedback and delivering further improvements.”

(607) 753-9384 • Fax: (607) 753-6272 • [www.essexsteel.com](http://www.essexsteel.com)

Helping to provide more customization, customers can choose from two different trim levels, as well as add a variety of optional packages including packages for enhanced operator comfort, cold weather conditions, debris management and maintenance and service capabilities. The first trim package option offers familiar features such as a black exhaust stack, manually adjusted rear view mirrors and temperature controls, a standard seat and radio, a 15-amp converter and halogen vehicle lights. Providing elevated creature comforts and controls, the second trim package offers a chrome exhaust stack, power adjusted rear view mirrors, a premium seat and radio, a 25-amp converter, automatic temperature control in the operator's station and LED vehicle lights.

Standard on the P-Tier ADTs, a variety of owner and operator settings help ease operation and increase jobsite safety. These onboard features, such as rollover protection, downhill dump protection, frame protection, hill hold, shuttle shifting and descent control help eliminate some of the operator inputs, enabling simplified operation. Additional machine benefits from the machine's dump body limits, standard transmission warm-up cycle, and max speed limits, help to keep the operator and machine safer and up and running for longer.

To learn more about the full line-up of articulated dump trucks within the John Deere Performance Tiering Strategy, please visit [www.JohnDeere.com](http://www.JohnDeere.com) or visit your local dealer.

## John Deere Is “All In” As It Previews It’s Largest CONEXPO–CON/AGG Presence to Date

John Deere will have its largest presence ever at CONEXPO-CON/AGG 2023 this March in Las Vegas. Totalling 80,000 square feet of booth space, John Deere and Wirtgen are combining forces for the first time at CONEXPO-CON/AGG, encompassing a 70,000 square foot booth outside in the Silver Lot (S5020). Inside the West Hall (W40844), an additional 10,000 square feet is dedicated to the future of John Deere technology in the construction space.

The John Deere and the Wirtgen Group presence offers customers an engaging experience and an all-encompassing snapshot of the future of construction through industry-leading equipment and technology.

In addition to its expansive and interactive booth experiences, exhibition attendees can anticipate the following from John Deere and the Wirtgen Group:

- 1 cohesive booth showcasing both John Deere and the Wirtgen Group’s latest machines and technologies.
- 70,000 square feet of outdoor space displaying world-class John Deere and Wirtgen Group equipment, technology, and application experience
- 10,000 square feet of indoor space focusing on John Deere technology, forward thinking innovative solutions, and John Deere Power Systems.

# Your Trusted Partner.

Partnering with Ring Power gives you access to a vast range of jobsite-tough products to round out your fleet. Ring Power carries machines from dozens of manufacturers to ensure you always have access to the right tools for your job.

Short-term, long-term or rental-purchase options available.

1-844-766-RENT • [Utility.RingPower.com](http://Utility.RingPower.com)

- 68 machines on display between John Deere and the Wirtgen Group.
- 6 machines that feature SmartGrade™ control functionality. Wirtgen Group machines equipped with the latest technologies such as: Wirtgen Performance Tracker, AutoPilot 2.0, 3D Paving, Smart Compact, Spective Connect.
- 9 compact construction machines on display such as skid steer loaders, compact track loaders, compact excavators, and compact wheel loaders.
- 9 electric or hybrid electric John Deere and Wirtgen Group machines on display.
- 36 World Premieres of brand-new equipment across the construction, roadbuilding and compact construction segments.
- 4 production systems, showcasing the current priority areas for John Deere and the Wirtgen Group, including Aggregates, Site Development, Roadbuilding, Underground.
- 1 center feature area for the future generation of Deere built excavators.
- 3 educational sessions featuring commentary from John Deere and Wirtgen Group experts.

Being “Close To Our Customers” we understand our contractors desire to have conversations relevant to their production system needs. John Deere and the Wirtgen Group designed the booth layout with a production system strategy in mind. To assist our customers, four production systems, include Aggregates, Site Development, Roadbuilding, and Underground, were created to emphasize their core business areas. Each production system will showcase key components, equipment, and features relevant to their needs and presented first-hand by John Deere and Wirtgen Group brand representatives.

For those exploring educational opportunities, John Deere is hosting a session that will feature Justin Steger, Solutions Marketing Manager at John Deere Construction & Forestry, Thursday, March 16 at 1 p.m. titled “How Grade Control Impacts Earthmoving Productivity.” From the Wirtgen Group, Tom Chastain, Milling Product Manager, will discuss “Best practices in Milling and Profiling” on Thursday, March 16 at 9:30 a.m. And lastly, Tim Kowalski, Application Support Manager – HAMM, will lead a discussion titled “Compaction 101: Doing the Right Things, the Right Way” on Friday, March 17 at 10:45 a.m.

CONEXPO-CON/AGG is North America’s largest trade show, and it will take place from March 14 to 18 in Las Vegas, NV. More information will be announced leading up to the show. For more information about John Deere, visit [johndeere.com/Vegas2023](http://johndeere.com/Vegas2023).

## Mazio Demolition Attachments Line Ensures the Right Tool for Every Job

The complete line of demolition attachments from Port St. Lucie, Florida-based Mazio Attachments LLC offers contractors the tools they need to complete any demolition job — from primary and secondary crushers to multiprocessors, pulverizers, and grapples. Mazio offers six main attachment models, designed to fit excavators from 1 ton to 130 tons of operating weight:

- RS Series demolition crushers are designed for primary demolition work. With two hydraulic cylinders providing high strength for primary crushing, the RS Series crushers are ideal for crushing concrete, while reducing noise and vibrations. The RS offers a full 360° of rotation for accurate positioning, Hardox®/Weldox® structure, reversed cylinders to protect the cylinder rods, pressure relief valve, and interchangeable teeth and blades.
- The RV Series hydraulic rotating crusher works well in both primary and secondary demolition. Featuring a regenerative circuit for quick jaw opening and closing and a hydraulic rotation of 360°, the RV Series provides precise positioning of the crusher in every working condition. The RV features a Hardox 400 structure, reversed cylinders to protect the cylinder rods, pressure relief valve, and interchangeable teeth and blades.
- The functional and versatile MC Series multiprocessor with interchangeable jaw system is ideal for the contractor who works in both primary and secondary demolition. A fitting kit allows the jaw to be changed for demolition, recycling, and scrap applications. The MC Series has a Hardox/Weldox structure, dual reversed cylinders to protect the cylinder rods, pressure relief valve, and multiple jaw kits.
- Mazio FPV Series pulverizers for secondary demolition and recycling needs feature a 100% Hardox

# Rugged Dependability

STANDARD IN EVERY MACHINE WE BUILD!

Hogg & Davis has been proudly manufacturing utility line equipment for more than half a century.

Our trusted products are part of the fleets and tool cribs of nearly every investor-owned power and communications company in the United States and Beyond.

- steel structure, reversed cylinder to protect the rod, interchangeable teeth and blades, and a pressure relief valve.
- The MP Series of mechanical pulverizers provide speed and strength in pulverizing a variety of material on the demolition site, while also separating reinforcing rods from concrete. The MP Series requires no hydraulic installation because they utilize the piston pushing force of the excavator's penetrating arm to operate.
- Mazio's GR Series selection grabbers are built from wear-resistant steel and are designed to nimbly grab demolition materials for sorting and loading

In addition to its comprehensive product line, Mazio's demolition experts work in tandem with its dealers to provide contractors with guidance on ways to increase their productivity and profits, ensuring success. All Mazio demolition tools come with a 12-month warranty with no operating hour limitations.

*Mazio Attachments LLC is an Italian manufacturer of specialized attachments for the construction, demolition, recycling, mining, aggregates, excavation, scrap, and forestry industries. With engineering and manufacturing facilities located in the United States, Italy, and Colombia, Mazio designs its distinctive purple attachments to work with all makes and sizes of carrier machine, from hydraulic excavators, skid steer loaders, and backhoes to wheel loaders, tele-handlers, and more. Mazio attachments are available through a growing dealer network or direct, depending on location. The company offers immediate delivery for spare parts and service, and field training for operators. For more information, call +1 (561) 766-0899, email [sales@mazio.us](mailto:sales@mazio.us), or visit [www.mazio.us](http://www.mazio.us)*

## Unitrex XS™ Max Wear. Unmatched performance in the field and in the boardroom.

Electric line stringing is easier and more economical with Unitrex™. Made with a core of Honeywell Spectra®, it is up to 10 times lighter than steel, while delivering comparable strength. The urethane-coated polyester jacket provides excellent abrasion resistance for great productivity that lasts.

### **OIL ALERT**<sup>®</sup> LIQUID LEAK DETECTOR

**DETECT OIL LEAKS AND SPILLS...FAST!**

- **AVOID OPERATIONS SHUT-DOWN**
- **REDUCE ENVIRONMENTAL RISKS**
- **MINIMIZE COSTLY CLEAN-UP**
- **MONITOR OFF-SITE EQUIPMENT**

A small amount of oil (1/32 inch) seeping under Oil Alert activates it's loud "on/off" alarm and/or relay contact output. The low profile dome shaped unit guards against undetected leakage in areas of oil lubricated / hydraulic equipment, stand-by generators, pressurized piping and fuel oil storage locations...

**5 year Limited Warranty**

**DORLEN** Products Inc.  
6615 W. Layton Ave. Milwaukee, WI. 53220
