ALL Crane Becomes Authorized Dealer for Maeda

Also adds 13 Maeda spider cranes to its own fleet

The ALL Family of Companies is once again an authorized dealer for Maeda mini cranes. ALL is also adding 13 Maeda spider cranes to its own fleet.

ALL's exclusive territory for Maeda sales covers the states of Ohio, Indiana, Illinois, and Wisconsin. ALL will sell and service Maeda's full line including spider cranes, crawlers, and battery cranes. Widely considered the smallest cranes in the world, Maeda cranes can go where other cranes simply can't. With a width as little as two and a half feet, many can actually fit through standard doorways.

The construction industry is especially fond of these small cranes for their ability to be placed high up in a structure and assist with glazing and curtainwall installation. Josh Doyle, general manager of ALT Sales Corp., the boom truck division of the ALL Family, expects construction to remain a popular market for Maeda via ALL, with other applications emerging.

800.557.0098 | golight.com

GO LIGHT

DURABLE
VERSATILE

POWERFUL
GUARANTEED

“The advent of Maeda battery-powered cranes opens a whole new world of indoor crane operations due to the lack of exhaust emissions,” said Doyle. “I expect those cranes to pick up work inside warehouses and for interior remodeling jobs in industrial and commercial settings.”

Maeda models added to ALL’s own fleet include three MC285C spider cranes with a slim 30-inch body, 24-foot boom, and 6,210-pound maximum capacity; seven MC305C models with a 41-foot boom and max capacity of 6,560 pounds; and three MC405C spider cranes with a 55-foot boom and a max capacity of 8,480-pounds. All include multi-angle outrigger positions and rubber tracks.

“The multi-angle outriggers are a game-changer. They take cranes that already could move in close due to their small size and get them that much closer to the work,” said Doyle.

The Maeda spider cranes added to ALL’s own fleet are being deployed throughout the four states in which ALL is an authorized dealer, so customers unfamiliar with the product can see their performance for themselves.

Japanese-made Maeda originally carved out a niche for itself with its small, versatile spider cranes. It has made a push into the U.S. market with the formation of Maeda America Inc., headquartered in Houston, Texas.

About ALL

The ALL Family of Companies is the largest privately held crane rental and sales operation in North America. Their strategically located branches have access to one of the world’s largest and most modern fleets, operating under the ALL, ALT, Central, Dawes, and Jeffers names. ALL provides rental, sales, service, and jobsite analysis, helping to ensure that customers have the right equipment for the job. For more information, contact ALL Erection & Crane Rental at 4700 Acorn Drive, Cleveland, OH 44131. Phone: 216-524-6550. Toll free: 800-232-4100. Fax: 216-642-7633. On the Web: www.allcrane.com

Company Profile:

Rome Plows

On February 19, 2022, Rome Plow Company will celebrate its 90th anniversary. Here is a little more information on how Rome was founded almost eighty years ago.

Rome Plow was founded in 1932, by Tom Mullen and his partner, Jack Lemann. Mr. Mullen, the Caterpillar dealer for Honduras in Central America, found a need for high quality tillage implements to be used in conjunction with Caterpillar tractors. To satisfy this need, Lemann and Mullen purchased the Towers and Sullivan Plow Company of Rome, Georgia. Towers and Sullivan Plow Company was established in 1877, and already had a strong name in the implement industry. The company was moved from Rome to Cedartown in 1934, where it has continually expanded its facilities and product line. The original charter of manufacturing auxiliary equipment for Caterpillar prime movers and marketing them worldwide through the Caterpillar dealer network has been maintained.

Rome Plow has long recognized and appreciated the

major contribution of its employees. The old-fashioned ideas of teamwork, family hiring practices, and an “open door policy” were established a half century ago. Those principles continue to guide the company as it enters with confidence into the last quarter of a century.

Rome has been the leader in setting rugged quality standards for tillage equipment for almost eighty years. Thousands of Rome Disc Plowing Harrows are on duty the world over, simplifying the job of land preparation - in every climate, and on all types of soil.

In March of 2010, Rome Plow was purchased by Danny and Brenda Dumey of Oran, Missouri. Danny and Brenda have successfully started several business including Dumey Contracting, Brenda Kay Construction, Brenda Kay Sand, and Double D Manufacturing.

Since the Dumey's purchased Rome Plow, the company has grown by almost 400%. In 2012, the Dumey's expanded the Rome manufacturing facility by roughly 30,000 square feet to keep up with the growing demands.

As always the Rome products are produced solely here in the United States.

IronCraft Box Blades Make Quick Work of Grading and Leveling Projects

IronCraft, LLC (“IronCraft”), formerly branded Titan Implement, introduces their 3100 Series and 3200 Series Box Blades which feature adjustable shanks, making them ideal for ripping up dirt, grading and leveling land, or spreading topsoil, gravel, mulch, or manure.

IronCraft Box Blades are built to handle the toughest projects on farms, construction sites, outdoor arenas, landscape projects, and more. The standard duty 3100 Series Box Blades are made with 3/8” steel A-frames in widths from 48-inches to 96-inches and are ideal for use with tractors from 15-45 HP with a Cat 1 hitch. The heavy-duty Series 3200 Box Blades are manufactured with 1/2” steel A-frames in widths of 72-inches, 84-inches, or 96-inches. They are ideal for tractors with 30-70 HP with either a Cat 1 or Cat 2 hitch. Both the 3100 series and 3200 series are quick hitch compatible and have a 6” cutting edge.

IronCraft box blades are made in the USA with industry leading lead-times and include a 1-year warranty. They are available in 5 different colors through a nationwide dealer network.

IronCraft LLC, was formerly branded as Titan Implement. The company was purchased by LFM Capital which plans major capital expenditures over the next 24-months at the Athens, Tennessee factory as well as other southeastern, TN locations including a paint booth, laser cutting, robotic welding, and more. In addition, other initiatives to support the post-purchase experience include online parts lookup, service manuals, training resources, and adding more product support locations across the country.

About IronCraft, LLC

IronCraft, LLC, founded in 2014 under the Titan Implement brand by the Turner family, is a leading manufacturer of agricultural implements and skid steer attachments catering to a variety of applications such as agriculture, landscaping, light construction, and more. Based in east Tennessee, IronCraft offers an extensive range of rotary cutters, rotary tillers, box blade scrapers, grader blades, landscape rakes, disc harrows, and skid steer attachments. Pettibone Upgrades Speed Swing Do-It-All Railroad Crane

Pettibone introduces the Speed Swing 445F2, the newest version of the industry's original do-it-all rail crane. Developed with customer feedback in mind, the 445F2 is designed to accept more than a dozen attachments for laying rails, setting ties and numerous other maintenance-of-way tasks.

Powered by a fuel-efficient 163-horsepower Cummins QSB4.5 Tier 4 diesel engine, the Speed Swing 445F2 offers a 49-gallon fuel tank, a 28-percent increase over the previous model's tank. The added fuel capacity allows for extended working intervals, especially when covering longer stretches of rail maintenance or relocating to a remote jobsite.

The 445F2 offers a maximum front load capacity of 10,000 pounds and maximum side load capacity of 8,000 pounds. Providing 180-degree boom rotation, the machine is primarily used to thread out old rail and thread in new rail. An optional magnet package quickly cleans up old plates, spikes and small pieces of rail. The unit can also tow rail carts, move railcars and supply air or hydraulics for hand tools.

Featuring a Dana T20000 3-speed transmission with twist-grip electric shift control that delivers exceptional torque, the Speed Swing quickly transitions between jobsites, traveling at 25 mph on hi-rail and 20 mph with all-terrain rubber tires. The tires – along with 4-wheel-drive with a rear wheel disconnect – afford greater maneuverability off the rails.

Durably built for challenging railroad applications, the 445F2 offers planetary front and rear axles with front differential lock. Four-wheel outboard dry-disc service brakes provide sure

stopping power, and a hydraulic release parking brake is standard.

An optional feature for the 445F2 is X-Command®, a Pettibone telematics program that offers real-time access to machine data. The platform allows for remote diagnosis, eliminating the need for certain field service calls.

The Speed Swing is designed to simplify service and maximize uptime. The ROPS/FOPS cab and engine enclosure both tilt, providing direct access to service points and machine components.

The spacious, climate-controlled operator cab includes a digital display module, full instrumentation panel and precise, pilot-operated controls. Tinted safety glass and a rearview camera help ensure safe operation at all times.

The Speed Swing 445F2 can be built to meet customer specifications for particular applications. Common options and attachments include a tote boom with hook, hydraulic tool circuit, magnet package, AAR coupler, track cleaning bucket, load bucket, 20-foot extendable boom, fork frame, brush cutter, snowplow, and many more.

Pettibone/Traverse Lift, LLC is part of the Industrial Technologies Group, an affiliate of The Heico Companies. Founded in 1881, Pettibone has been recognized as the industry leader in material handling equipment since the company revolutionized the industry with the first forward-reaching, rough-terrain machines in the 1940s. For more information, call 906-379-4529 or visit www.gopettibone.com

IronCraft PHD Post Hole Augers Quickly Bore 6, 9 or 12-inch Holes

IronCraft, LLC (“IronCraft”), formerly branded Titan Implement, introduces the PHD series post hole auger which bores hole of 6”, 9” or 12” up to 45 inches deep. Strong and durable construction makes digging post holes for fence posts and other applications fast and easy, while replaceable bolt-on cutting edges maintain productive boring speeds throughout the life of the implement. Shear bolt driveline protection prevents equipment damage when an immovable object is encountered. Ideal for tractors from 25-65 PTO HP, this robust model is compatible with most Cat 1 and Cat 2 three-point tractor hitches. IronCraft PHD Post Hole Augers are ideal for use on farms and ranches, vineyards and orchards, parks and recreation departments, municipalities, government agencies, and anywhere that fence posts or other hole boring is required.

PHD Post Hole Augers are stocked in IronCraft’s Athens, Tennessee factory and are available through their nationwide dealer network. Each PHD is warranted for a full year.

IronCraft LLC, was formerly branded as Titan Implement. The company was purchased by LFM Capital which plans major capital expenditures over the next 24-months at the Athens, Tennessee factory as well as other southeastern, TN locations including a paint booth, laser cutting, robotic welding, and more.
