# ROME

Available in 10, 12, 14, and 16 foot widths

Manufacturing Heavy Duty Construction and Agricultural Equipment Since 1932

ROME Plow has been the premier name in heavy duty disc plows for over 87 years.

Available in 16, 18, 20, 24, and 30 foot widths

ROME has been manufacturing pivot dump and ejector scrapers for over 45 years for the construction and agricultural industries.

Available with 36 or 42" blades, and up to 20' wide

ROME also manufactures a full line of leveling scrapers (with and without gates) and haul road maintenance tools (with and without rollers)

Available in 18 and 22 yard versions

For more information on our products or for the closest authorized ROME dealer please contact us.

Available in 24, 28, 31, 34 and 37 Yards

Steel Tracks available to fit any articulating tractor.

# Fecon Unveils New Disc Hawk™ Compact Disc Mulcher

Fecon LLC, a leading global manufacturer of heavy-duty site preparation attachments and forestry accessories, expands its line of premier attachments with the launch of the Disc Hawk™ disc mulcher. Specifically designed for high-flow skid steers and compact track loaders, the attachment increases efficiency where speed and acreage are more important than material size, making it the ideal addition to an existing fleet of mulching equipment. Fecon's disc mulcher increases productivity with a faster, rougher cut either for first-pass vegetation removal or in instances where maximizing material dispersion without fine chip size is ideal.

"We're excited to expand our lineup of disc mulchers to provide customers with yet another viable tool in their toolbox to help them get the job done right," said Mark Middendorf, Fecon's executive vice president of sales. "This new disc mulcher is a game-changer for contractors looking to increase their productivity in large land clearing operations."

At a third of the operating cost of a drum mulcher, the Disc Hawk complements an existing mulching fleet as an ideal high-production alternative for tackling jobs that may not require finely shredded material. With a working width of 60 inches, the disc mulcher is purpose-built for 75- to 132-horsepower skid steers and compact track loaders that operate with as little as 30-50 gallons per minute (gpm) of auxiliary hydraulic flow. The unit provides exceptional performance for mulching thicker vegetative material at higher speeds than traditional drum mulchers. A low-profile motor and deck configuration provides industry-leading visibility and reduces material buildup.

Configurable discharge and intake chutes allow operators to maximize productivity and dispersion needs without compromise. The open brush chute features a larger throat allowing for higher material intake and faster processing of lighter vegetation-like brush. Conversely, the hardwood intake chute guides larger trees into the disc, resulting in quicker processing of thick vegetation. Used in applications where material dispersion is preferred — such as in fire fuel prevention — the broadcast discharge chute is ideal for

distributing material faster over large areas. Similarly, the processing discharge chute increases the mulching of finer material with dispersion back towards the ground, making it ideal for agriculture or farm site preparation.

The unique design of the disc ensures perfect balance over the lifetime of the mulching unit, and it comes backed by Fecon's 12-month, 1,000-hour warranty.

The mulcher attachment features 24 bottom tools, 12 edge knife tools and eight top tools, along with optional Carbide tools to minimize wear and ensure optimal performance near rocky terrain.

An adjustable push bar highlights the attachment's adaptability, allowing operators to toggle between degrees of disc engagement, depending on the application. For example, in the forward position, the push bar guides small debris into the disc. Having the push bar in the furthest back position exposes more of the mulching disc for efficient processing of larger trees and thicker material.

#### *About Fecon LLC*

*Established in 1992 near Cincinnati, Fecon manufactures the Bull Hog®, the #1 selling forestry mulcher. The company also manufactures tracked carriers and tractors, as well as a full range of heavy-duty site-preparation attachments and other equipment for vegetation management. Its products are sold through equipment dealers and distributors worldwide. For more information: Fecon LLC, 3460 Grant Drive, Lebanon, OH 45036; contact Mark Middendorf at 513-696-4430, via e-mail at [mjmiddendorf@fecon.com](mailto:mjmiddendorf@fecon.com), or visit [www.fecon.com](http://www.fecon.com)*

# Werk-Brau Box Grapple Ideal for Heavy Demolition

Werk-Brau introduces a wide mouth box-style grapple attachment specifically designed to handle objects of differing sizes like demolition debris, brush, rocks, and more. Standard sizes are engineered for excavators from 12 to 60 tons, with additional tine- and width-configurations available to maximize efficiency and productivity on job-specific applications. Rugged construction with T-1 steel utilized in all critical or high wear components. Ribbed internal gusseting or reinforcements strengthen the main body of the grapple. Multiple pass welds for added strength and durability. Wear-resistant high strength steel throughout the weldment, and hardened, greaseable bushings utilized at all pivot points ensure a long service life even in harsh conditions. All pivot points are line-bored after welding to ensure alignment and grapple tracking. All attachments 100% weld inspected, and final quality inspection completed after paint and assembly. Edge pads at the end of each tine allow longer service life. Werk-

Brau Box Grapples are ideal for gathering of demolition debris, sorting of materials, brush removal, soil scoring, root extraction, and other land clearing/demolition tasks.

Designed to the same curl/dump angle as standard digging bucket maintains the OEM specifications for the machine, making it easier for the operator. Quick-coupled for fast and easy attachment so that the proper tool is always at hand. Box Rake has complete meshment with the optional Werk-Brau thumb, ensuring better clamping and gripping action regardless of load size. With the latest CAD design and finite element analysis tools, Werk-Brau can customize any of their attachments, including Box Grapples, to alter the number and spacing of tines, for example, to best applications that would benefit a wider or narrower pick-up stance.

Werk-Brau manufactures a complete line of OEM and replacement attachments for excavators, mini excavators, backhoes, mini and full-size loaders, and crawler loaders. Since 1947, they have been industry leading innovators, designing, and producing specialty products for the heavy equipment industry. Their products are made in the USA and sold through equipment dealers and distributors worldwide. More than 70 years after their founding, the core principles of the company remain relevant - "provide customers with the utmost service, quality, and maintain the quality that bears the Werk-Brau name." For more information on Werk-Brau products, contact Dale DeWeese at (800) 537-9561, or via e-mail at [sales@Werk-Brau.com](mailto:sales@Werk-Brau.com), or visit them online at [www.Werk-Brau.com](http://www.Werk-Brau.com) •

## **Aquajet Introduces Versatility-Expanding Accessories for Aqua Cutter 750V**

---

Aquajet, a global leader in the design and manufacture of innovative Hydrodemolition technology, introduces an Extension Kit, Rotolance and Hybrid Kit optimized for its revolutionary Aqua Cutter 750V with patented infinity oscillation. The Extension Kit increases the 750V's reach for applications, such as bridges, berths, piers and wastewater plants, while the Rotolance excels at surface preparation on steel bridges, roadways, pipes, tunnels and more. The Hybrid Kit 3.0 converts the diesel-powered 750V to electric when diesel can't be used due to noise or emission requirements.

"After a successful 750V launch, we wanted to fine tune accessories that give our customers even more ways to use the robot," said Roger Simonsson, Aquajet CEO. "There is a lot of concrete around the world that needs repair. The 750V provides a way to efficiently remove it, and these accessories increase where the robot can go and the types of removal that are achievable."

The Extension Kit can be configured several ways with an elbow and beams, allowing the operator to perform Hydrodemolition in awkward, hard-to-reach areas. During a bridge repair, for example, the Extension Kit allows the 750V to work from the bridge deck and reach over the barrier without having to remove it,

# SAFELY Lifts Up To 500 lbs!

**SKY HOOK**

ATTCO, Inc. OSA  
by SYCLONE ATTCO SERVICE

saving contractors time and hassle. To reach the underside of the bridge deck, the beams extend to the side over the railing and downward at a 90-degree angle. Then, the elbow reaches underneath the bridge at a 90-degree angle and points the cutting head upward underneath the deck. The accessory expands the 750V's reach by 1 meter (3 feet, 3 inches) to the sides and up to 2 meters (6 ½ feet) vertically.

In addition to the versatility and efficiency gains, the Extension Kit improves operator safety by eliminating labor-intensive alternatives, such as using hand tools to remove concrete from difficult-to-reach spots.

The Rotolance attachment is a powerful surface preparation tool. Contractors can utilize the Rotolance to remove concrete, rubber coatings, paint, rust, plastic and other materials. The accessory brings this versatility to several different applications, including steel bridge coating removal, roadway surface preparation, deck epoxy removal, pipe coating removal and more. While the 750V is often used for deeper sections of concrete, the Rotolance serves as a light-removal alternative. This method avoids sand blasting, eliminating dust pollution.

The Rotolance for the 750V comes in two versions — the 1000 and 2500, each with a working diameter of 350 millimeters (13 feet, 8 inches). The 1000 achieves a maximum water pressure of 14,500 psi (1,000 bar) that leaves a good bonding surface when cleaning or removing hard paint, rust and rubber coatings. The 2500's maximum water pressure is 36,300 psi (2,500 bar) that quickly and precisely removes a shallow layer of concrete.

The Hybrid Kit 3.0 easily attaches to the 750V and uses an intelligent system to automatically disengage the onboard diesel engine and convert to electric power. This brings the 750V's capabilities to applications where diesel engines may not be allowed, such as parking garages or inside buildings. The Hybrid Kit 3.0 can be installed without any tools as operators simply snap it onto the back of the

robot, connect the hoses and it's ready to go. The Hybrid Kit 3.0 also features a built-in charger that powers the battery while the robot is working. Once connected, the 750V can run on either diesel or electric, making it a versatile, environmentally friendly machine.

## New IronCraft 4-in-1 Bucket with Integral Power Rake is a Powerful Soil Conditioning Machine

IronCraft, LLC ("IronCraft"), formerly branded Titan Implement, introduces the patented 4-in-1 Bucket and Power Rake. Combining all the advantages of a versatile 4-in-1 bucket with a rugged power rake, this unique product is a powerful and practical soil conditioning machine. Users can dig, load, grab, and back drag as well as prepare the soil bed without changing attachments, thus saving time, and enhancing efficiency on the jobsite. When reconditioning a gravel, for example, the power rake conditions the soil and kicks the largest rocks forward and leaves a smooth surface behind. The rocks can then be scooped up and removed with the bucket, which can also be used to place additional gravel in areas where needed - all without changing implements. The 4-n-1 Power Rake is supplied with a smooth edge bucket, a bolt on edge or welded teeth are optional. Users who opt for bolt on teeth for more aggressive digging can raise the grapple and use the back side of the bucket as a smooth edge bucket for an all-in-one solution. IronCraft 4-n-1 Power Rakes are available in various widths and sizes from mini skid-steers to full size machines. With many timesaving uses, they are ideal for a wide variety of on farm applications as well as those on orchards & vineyards, landscape, or construction sites, and more.

Rugged and durable construction includes dual 2-1/2x8" cylinders, 1-1/4" pivot pins, carbide roller tips, 7-1/2-inch diameter drum (10-1/4" tip to tip diameter), with a direct drive motor and side cutters as standard. Requires a flow rate of 15-25 gpm. Universal wiring harness available as 7-pin, 8-pin, or 14-pin. A video of the product is available at <https://bit.ly/4-n-1-Power-Rake>.

IronCraft stocks the 4-n-1 Power Rake in their Athens, Tennessee factory; they are available through their nationwide dealer network. Each bucket is warranted for a full year.

IronCraft LLC, was formerly branded as Titan Implement. The company was purchased by LFM Capital which plans major capital expenditures over the next 24-months at the Athens, Tennessee factory as well as other southeastern, TN locations including a paint booth, laser cutting, robotic welding, and more. In addition, other initiatives to support the post-purchase experience include online parts look-up, service manuals, training resources, and adding more product support locations across the country.

### ***OIL ALERT***<sup>®</sup> LIQUID LEAK DETECTOR

***DETECT OIL LEAKS AND SPILLS...FAST!***

- ***AVOID OPERATIONS SHUT-DOWN***
- ***REDUCE ENVIRONMENTAL RISKS***
- ***MINIMIZE COSTLY CLEAN-UP***
- ***MONITOR OFF-SITE EQUIPMENT***

A small amount of oil (1/32 inch) seeping under Oil Alert activates it's loud "on/off" alarm and/or relay contact output. The low profile dome shaped unit guards against undetected leakage in areas of oil lubricated / hydraulic equipment, stand-by generators, pressurized piping and fuel oil storage locations...

*"As a safety professional, you always want your workers to have access to leading edge safety tools that improve safety and focus. Working with **COOLSHIRT SYSTEMS** over the past two years allowed me to help design a tool by lineman for lineman."*

*The **A.R.C. Hybrid Cooling System** by **COOLSHIRT SYSTEMS** allows lineman to remain more focused and less fatigued by reducing their core body temperature in extreme environments, therefore reducing the possibility of unintended accidents."*

# A.R.C. Hybrid Cooling System

*Complete Arc Rated Portable Cooling Solution*

Developed in conjunction with major power companies for use in extreme heat conditions, the **A.R.C. Hybrid Cooling System** uses liquid cooling to reduce fatigue, injury, and heat stress related illness.

Designed specifically for use by linemen, the **A.R.C. Hybrid Cooling System** features a compact design with a custom woven strap mounting system. The use of S-hooks offers the versatility of mounting inside or outside of the bucket. The system includes our mobile ice based cooler, a 7 hour lithium ion battery with charger and a **CAT 2, 12 CAL** rated Liquid Cooled Vest for **70E Arc Flash** protection.

Designed with portability in mind, measuring **6" x 6" x 20"** and weighing in at **less than 10 lbs dry**, the unit is entirely self-contained and built to last with a 20,000 hour pump.
