# Unleash Efficiency and Safety with Underground Devices Wunpeece Duct Spacers

# Strength

# ees

# S

When it comes to underground power transmission and distribution installations, precision and reliability are non-negotiable. Enter the Underground Devices Wunpeece Duct Spacers – a game-changing solution that redefines the way you approach concrete encased duct runs. From speed to sturdiness, Wunpeece offers a seamless experience that simplifies complexity and elevates your projects to new heights.

## Unmatched Efficiency in One Piece

The Wunpeece Duct Spacer is the standard of installation efficiency. Wunpeece allows for the fastest and sturdiest installation for concrete encased duct runs. Bid farewell to the complexities of base and intermediate spacers, and embrace the simplicity of a single solution that streamlines your entire process. Removing the need to handle numerous parts ensures productivity that saves time, labor, and resources.

## Wunpeece Spacer Features that Redefine Excellence:

**Streamlined Design:** The molded two-way design of Wunpeece reduces the number of parts you need to handle. Experience the power of handling half as many parts, making your installations more efficient and effective.

**Effortless Snap-In:** Time is of the essence, and the Wunpeece understands that. Its easy snap-in design ensures swift installations without compromising on precision or quality.

**Enhanced Structural Integrity:** Staggered positioning along the duct run eliminates vertical shear planes, reinforcing the structural integrity of your installations.

**Versatility for Every Challenge:** With the broadest range of molded spacers commercially available, Wunpeece adapts seamlessly. It's your versatile partner, capable of handling all types of duct and almost any duct bank setup you encounter.

**Engineered for Excellence:** Specifically designed for use in concrete

encased duct banks, the Wunpeece Duct Spacer exemplifies engineering at its finest. Its robust design ensures optimal performance in demanding underground power transmission and distribution installations.

Underground Devices takes pride in manufacturing Duct Spacers available in a variety of separations for 2" through 8" conduit ideally suited to meet the unique demands of your projects.

Experience excellence, efficiency, and strength like never before with Wunpeece Duct Spacers by Underground Devices. Visit [www.udevices.com](http://www.udevices.com) to explore the product that's setting new standards in the industry and unlock a world of possibilities for your projects.

Compliance Coordinator- Retired  
Alabama Power

# A.R.C. Hybrid Cooling System

*Complete Arc Rated Portable Cooling Solution*

Developed in conjunction with major power companies for use in extreme heat conditions, the **A.R.C. Hybrid Cooling System** uses liquid cooling to reduce fatigue, injury, and heat stress related illness.

Designed specifically for use by linemen, the **A.R.C. Hybrid Cooling System** features a compact design with a custom woven strap mounting system. The use of S-hooks offers the versatility of mounting inside or outside of the bucket. The system includes our mobile ice based cooler, a 7 hour lithium ion battery with charger and a **CAT 2, 12 CAL** rated Liquid Cooled Vest for **70E Arc Flash** protection.

Designed with portability in mind, measuring **6" x 6" x 20"** and weighing in at **less than 10 lbs dry**, the unit is entirely self-contained and built to last with a 20,000 hour pump.

# Company Profile: Underground Devices, Inc.

Underground Devices, Inc. stands as a pioneering force in the realm of underground infrastructure solutions, specializing in manufacturing duct spacers, bore spacers, and nonmetallic cable racks. Underground Devices has consistently demonstrated its commitment to innovation, quality, and customer satisfaction, setting itself apart from competitors by placing a strong emphasis on engineering and innovation.

*History and Evolution: A Journey of Leadership and Resilience*

Established in 1973, Underground Devices emerged as a pioneer in underground infrastructure solutions, specializing in conduit and cable supports. The remarkable history of the company is intricately woven with the visionary leadership of its CEO, Adrienne McCoy, shaping a narrative of hope and determination.

Adrienne McCoy's remarkable journey began in 1983 when she joined Underground Devices in an administrative role. Over four years, her partnership with the company's owner transformed her into a trusted collaborator. Adrienne's foresight and business acumen started shaping a new vision for the company's future.

In 1987, the passing of the previous owner paved the way for Adrienne to acquire the company. As a single mother of two teenagers, she faced significant challenges. Undeterred, Adrienne transformed Underground Devices over three pivotal years, paving the way for a new era.

In 1991, Ms. McCoy hired Donald McCoy to become the company's General Manager and Engineering Manager. Beyond his industrial expertise, Donald was Adrienne's partner, setting the stage for growth. This move not only improved business but also laid the foundation for Underground Devices' family-oriented values.

Under Adrienne's leadership, Underground Devices grew from a modest start into an influential entity with its own manufacturing facility, expanded product offerings, and an unwavering commitment to innovation. This legacy continues under Chris Greene, Adrienne's son, who shares her people-centric vision.

From its humble beginnings as a three-person operation; the company now operates its own full-fledge manufacturing facility, the product offerings have grown significantly, and innovation and progress are always emphasized. Regardless of the growth and changes that have taken place the unique and wonderful culture that defines Underground Devices has not only remained but has grown stronger.

**Made in the USA:** Proudly based in the United States, Underground Devices places a premium on producing high-quality products on home soil. By manufacturing its solutions in the USA, the company not only ensures superior craftsmanship but also contributes to the growth and stability of the domestic economy.

**Engineering Excellence and Innovation:** Underground Devices distinguishes itself by placing engineering and innovation at the heart of its operations. This focus on engineering excellence empowers Underground Devices to consistently deliver the highest quality solutions that meet the dynamic demands of modern underground infrastructure projects.

**Collaborative Approach:** Our collaborative approach extends beyond its engineering team to encompass its relationship with clients. The company recognizes that each project is unique, and its dedication to understanding customer

needs and tailoring solutions accordingly is a cornerstone of its success. This approach not only fosters trust but also ensures that Underground Devices' solutions seamlessly integrate into a wide range of projects, ultimately enhancing project outcomes.

**Setting Industry Benchmarks:** With commitment to excellence and its ability to think beyond traditional boundaries, Underground Devices has set new standards within the industry. By offering innovative solutions that optimize cable management and infrastructure protection, the company has proven that it is possible to innovate and push boundaries even in sectors that have long been established.

**Product Portfolio:** Underground Devices' product portfolio comprises an impressive range of duct spacers, bore spacers, and its flagship nonmetallic cable racks. These products serve as the backbone of modern underground infrastructure projects, offering reliability, durability, and ease of installation.

**Nonmetallic Cable Racks:** At the forefront of innovation, Underground Devices introduces its pioneering nonmetallic cable racks, a solution that redefines cable management within power and communications manholes. Unrivaled in the industry, these cable racks provide a novel approach to organizing and protecting cables in underground systems. Their unique design, crafted through meticulous engineering, ensures optimal cable separation, preventing potential damage and facilitating efficient installation and maintenance. With no direct competition, these nonmetallic cable racks stand as a testament to Underground Devices' commitment to pushing the boundaries of possibility and revolutionizing underground infrastructure.

**Duct Spacers and Bore Spacers:** In addition to its groundbreaking nonmetallic cable racks, Underground Devices continues to offer a comprehensive selection of duct spacers and bore spacers. These essential components are meticulously engineered to create precise separations between

conduits and cables, preventing damage and ensuring efficient installation. Whether for power or communications manholes, Underground Devices' duct spacers and bore spacers exemplify the company's dedication to delivering high-quality solutions that adhere to industry standards and customer requirements.

Devices takes pride in offering customization options that align with specific project requirements. The company's engineering-focused approach ensures that each product is tailored to meet the unique demands of the project, resulting in solutions that optimize functionality, durability, and ease of integration.

Customization and Tailored Solutions: Recognizing the diverse needs of its customers, Underground

Quality Assurance and Reliability: Consistency and reliability are paramount in the products

offered by Underground Devices. Each item in the company's product portfolio undergoes rigorous testing and quality control measures to ensure they exceed industry standards. This meticulous approach to quality assurance guarantees that Underground Devices' solutions perform flawlessly in demanding underground environments, maintaining the integrity of vital infrastructure systems.

Industry Impact and Future Prospects: Underground Devices' product portfolio plays a pivotal role in enhancing the efficiency, reliability, and longevity of underground networks, contributing to the seamless flow of power and communication. As the company continues to drive innovation, engineering excellence, and a customer-centric approach, its product offerings are poised to shape the future of underground infrastructure projects. By offering a complete range of solutions, from duct spacers to nonmetallic cable racks, Underground Devices is poised to remain a visionary force in the industry for years to come.

# RAMSEY WINCH®

## *The Choice of Professionals*

---

Ramsey Winch is a leading manufacturer of hydraulic and electric worm gear winches, planetary gear winches, and planetary hoists. Using advanced manufacturing processes, premium materials, and highly trained engineers and production personnel, Ramsey Winch is the choice for quality, dependability, and endurance. It has been this way since 1944, when brothers Claude and Rayburn Ramsey founded Ramsey Brothers Tool & Die in Tulsa, Oklahoma, to manufacture parts, tools, and dies for Douglas Aircraft Company.

In 1945, Claude Ramsey designed a front-mounted winch, the Model 101. This new winch was specifically designed for passenger cars and pickup trucks and drew its power from the crankshaft. The Ramsey Winch was perfect for pulling vehicles out of mud and snow. The product was a success, and demand for Ramsey Winches was so high that in 1947 the Ramsey brothers renamed their company Ramsey Brothers Winch Company. Over the years, it has become the mainstay of the towing and recovery industry.

Ramsey Winch Company continued to flourish, and in 1978, William (Bill) Ramsey succeeded his father and company founder, Claude, as sole owner of Ramsey Winch. The company stays in tune with the

needs of the market, resulting in innovation and new product introductions across consumer, commercial, and industrial applications. You can find a Ramsey Winch at work in such industries as utility, oil and gas, mining, construction, forestry, and many others.

Ramsey Winch planetary hydraulic winches deliver fast, powerful winching pull after pull. With working capacities from 8,000 to 130,000 lbs., Ramsey has the industrial hydraulic winch you need. Fast line speeds limit time in the danger zone and increase efficiency and productivity on the job.

Some operators prefer the proven heavy-duty pulling power of a worm gear winch. Ramsey has what you need in electric and hydraulic worm gear winches with pulling capacities from 3,000 to 30,000 pounds; electric and hydraulic worm gear winches are available. Built in the USA with American-made gears, our rugged worm gear winches are designed to deliver the trouble-free, easy-to-install, field-proven performance operators have trusted for 70 years... all at faster line speeds and in lighter weight packages than the competition.

Today, Ramsey Winch is a wholly owned subsidiary of Ramsey Industries and continues to manufacture winches and hoists in Tulsa, Oklahoma. With our purpose-driven design and quality engineering, we continue to set the standard in performance for both planetary and worm gear winches. You demand – and deserve – a winch that delivers the power, speed, and reliability you need every day, for every challenge. Trust Ramsey Winch for planetary and worm gear winches built to last a lifetime.

**[www.ramseywinch.com](http://www.ramseywinch.com)** •

# Product Spotlight: Ramsey Winch HD-P 4000

Ramsey Winch continues to set performance standards for both planetary and worm gear winches by focusing on purpose-driven design and quality engineering. Our products are hard at work in a variety of industries, including utility, site development, fire and rescue, forestry, and mobile fleet services.

The Ramsey HD-P 4000 is a heavy-duty planetary winch offering 4,000 pounds of rated line pull, a cable capacity of 89 feet, and a line speed of 86 FPM in a compact design. Additional features include:

- High-efficiency planetary gear set
- Over- or under-wound cable availability
- Foot mount or mid-mount
- Spring applied, hydraulic released disc brake
- Quiet, low-maintenance brake
- Manual, air or blocked free spool clutch
- Reliable sliding pin clutch
- Meets SAE J706

Coming in at only 82 pounds (standard drum/without cable), this rugged yet powerful winch is ideal for woodchippers in landscaping, utility line clearing, disaster clean up, and land clearing operations.

We know you demand – and deserve – a winch that delivers the power, speed, and reliability you need every day for every challenge. Trust Ramsey Winch for planetary and worm gear winches built to last a lifetime and made in the USA.
