**OTR Expands Track Offering with E5
Tread Pattern for Smoother Rides,
Surface-Friendly Performance**

Low-Dust Application of Stabilization Materials

Fast, Accurate and Consistent!

Sizes
from 8 to
27 Tons

Truck Mounted

Pull-Type

Custom Sizes

- Spreads all dry binding agents accurately
- Spread rates up to 120 lb/sq. yd.
- Available in manual or automatic rate control with Stoltz Controller

Used for Soil Stabilization, Cold In-Place Recycling, Full Depth Reclamation, and similar construction processes, Site Spreaders feature a rugged, fully welded design, 30 inch conveyor, and either automatic or manual controls.

NWPX Highlights Advanced Power and Communication Vaults, Raising the Standard for Dry Utilities Infrastructure

Next-generation precast solutions deliver unparalleled strength, security, and long-term reliability for underground power and communication networks

NWPX Park and NWPX Geneva, divisions of NWPX Infrastructure, a global leader in the design and construction of innovative water utilities and environmental solutions, are proud to highlight their Power and Communication Vaults. This precast product line redefines the standards for reliability, security, and long-term performance in dry utilities infrastructure. These vaults serve as the essential backbone for safe and resilient underground systems, combining best-in-class design with robust reinforced concrete construction.

Every NWPX vault is engineered with security at the forefront, featuring lockable hatches that enable safe, authorized access for critical maintenance or repairs. They are built to local utility specifications or municipal standards, streamline installation and permitting across jurisdictions, while NEC/CEC compliance guarantees that each vault meets national safety standards for electric equipment enclosures. Multiple PacifiCorp-approved configurations are available for projects in Pacific Power and Rocky Mountain Power service areas.

Flexibility and customization are core advantages. Vaults can be tailored to support a range of equipment sizes, utility layouts, and access preferences, delivering ideal solutions to projects from substations to campus complexes, data centers, renewable energy installations, and more.

CERTIFIED PAYROLL COMPLIANCE

emarsinc.com
Ph: 480-771-2841

Designed for powerful functionality, each unit features a comprehensive accessories package tailored to project specifications. Integrated cable management systems, complete with racks, terminators, knockouts, and pulling irons, ensure organized and efficient routing of complex power and communications cabling. Optional features like ventilation, waterproofing, fireproofing, sump pumps, and resistance to seismic or wind loads provide all-season resilience in even the most challenging conditions. For sensitive telecom or data infrastructure, specialized grounding and electromagnetic shielding further protect vital systems from interference.

Practicality is equally essential. Secure internal access points and ladders facilitate inspection and enable quick, safe entry for authorized personnel. With every unit manufactured in a controlled environment, consistent quality and strict adherence to industry benchmarks are assured. NWPX vaults stand as a comprehensive solution for modern infrastructure needs, combining security, durability, flexibility, and regulatory compliance. By supporting essential equipment and enhancing opera-

tional efficiency, these vaults help future-proof utility and communications networks for decades to come.

About NWPX:

Founded in 1966, NWPX is a leading manufacturer of water-related infrastructure products. In addition to being the largest manufacturer of engineered water transmission systems in North America, the Company also provides solution-based products for a wide range of markets including high-quality reinforced precast concrete products and lined precast sanitary sewer system components, which are manufactured under the NWPX Geneva brand, as well as water distribution and management equipment including pump lift stations, wastewater pretreatment, and stormwater quality products through the NWPX Park brand. NWPX Park offers custom solutions, including pump lift stations, meter vaults, oil-water separators, grease interceptors, vault systems, and automated controls designed for seamless installation and reliable operation.

OTR Expands Track Offering with E5 Tread Pattern for Smoother Rides, Surface-Friendly Performance

OTR Engineered Solutions (OTR) offers customers greater rubber track selection with its TrackBoss® E5 tread. The new track is an ideal solution for minimizing damage to sensitive surfaces without sacrificing performance.

“Operators shouldn’t have to choose between protecting the jobsite and getting work done. The E5 tread is designed to deliver on both, combining surface-friendly performance with the durability and traction customers expect from OTR track solutions,” said Michael Dembe, Vice President of Construction.

Featuring a distinct multi-bar pattern, the E5 tread combines the

TOOLS YOU CAN TAKE TO THE BANK!

INNISFREE TOOLS, LLC

www.innisfreetools.com

ROLL'ER-ON

smooth ride of traditional straight-bar treads with the higher traction of those with multiple connecting points. Like all other tracks in the TrackBoss line, the E5 is made from exclusive rubber compounds that are formulated for enhanced tread durability and resistance to cutting and chunking. It's engineered for longer service life with no degradation in performance. The new tread is currently available in the most commonly used sizes and widths for compact track loaders.

"Innovations like the E5 tread reflect OTR's continued investment in expanding our track solutions and delivering greater value to customers worldwide," said Oscar Torres, President & CEO. "As we grow our presence across both aftermarket and OEM channels, we remain focused on providing high-performance solutions that meet the evolving needs of equipment operators and manufacturers."

Customers can easily find the best size and tread style for their equipment and application by using OTR's online Track Finder tool, which makes it easier than ever to identify proper track solutions. Many options are available for a wide range of equipment, such as carriers, compact track loaders, cranes, drills, and mini excavators.

OTR Engineered Solutions is a market-leading global enterprise specializing in off-the-road tire, wheel, and track solutions for original equipment manufacturers (OEMs) and aftermarkets. Known for being an innovator in multiple off-the-road applications, OTR differentiates itself by providing value-added services such as warehousing, tire mounting, and sequencing, among other things. The firm has long established strategic partnerships with OEMs covering Construction, Lawn & Garden, Powersports, Agriculture, Forestry, Mining, Material Handling, and Specialty Vehicle markets. OTR's infrastructure comprises 30+ facilities and warehouse locations throughout the U.S., Canada, Europe, and Asia, serving customers globally.

OTR Enhances Customer Experience with Online Track Finder

OTR Engineered Solutions (OTR) has updated its online Track Finder tool with an exciting new interface, greater product selection, and expanded information, making it easier than ever to identify the proper track solutions for off-road equipment. “OTR is committed to making customers’ lives easier, and the updated Track Finder does just that — allowing customers to easily browse and purchase tracks from the convenience of their smartphones,” said Mitch Mittlestadt, General Manager/Aftermarket.

Customers can browse tracks by tread pattern, track size, or equipment make and model. Detailed information is available to help identify the tread style and other factors to best fit the equipment and application. After finding the right product, end-user customers have the information they need to specify the right tracks at their local OTR-product dealer. Otherwise, dealers and large fleet owners with corporate accounts can use the displayed available inventory detail and purchase online from the most convenient OTR distribution center.

“Our track offering is rapidly growing, along with our distribution network to better serve customers

with high-performance products and excellent availability,” said Mittlestadt. “In fact, our database includes roughly 1,200 track fitments, and we’re adding to that monthly with more products and new information. Our updated interface makes it easier than ever for customers to walk through the selection process and narrow down the best solution for their equipment. Even more, it’s optimized for viewing on smartphones, since that’s where most people prefer to browse.”

The Track Finder includes solutions for carriers, compact track loaders, cranes, drills, mini excavators, and more. Currently, eight tread styles are available to accommodate a wide range of industries and applications, with additional tread designs currently in development.

To view a video tutorial on the new Track Finder, visit www.otrwheel.com/track-finder-tutorial.

The Solution
To stak, store,
protect, and
pull wire!

USA
MADE

Stak: Up to five units tall. Easy two handed ergonomic carry from truck or jobsite.

Store: 500' spools of 14, 12 & 10 AWG wire easily for inventory control. Polymer design reduces damage to finished surfaces on the job.

Protect: Reduces wire damage from tools and personnel. Made of non-conductive polymer.

Pull: Pull wire smoothly from the top or the sides when in the Stak. Support large spools with molded V-Grooves.
