SAFETYZONE MAGAZINE

**ICUEE 2017
DELIVERS!**

**Make An
Informed Fall
Protection Plan**

We are Safety Rail Company, a manufacturing company comprised of innovators, engineers and problem solvers. We offer high quality 100% made in the USA fall-protection solutions coupled with exceptional service and support. Our approach eliminates confusion and ambiguity associated with OSHA compliance and project specifications.

The core of Safety Rail Company's solution is found in products that engineer away the fall hazard. Products that can be installed easily without tools, welding or drilling. Products that are effective at preventing falls for everyone, not just trained personnel. Products that give peace of mind.

Our products include Mobile Safety Rail, Permanent Safety Rail, Skylight Guards, Hatch Guards, Safety Gates, Visual Warning Line Systems, Fixed & Caged Ladders, Custom Mezzanines and Cross-Over Ladders.

Made in USA. American Welding Society Certified Fabricator. Exceptional customer service. Quote-stage CAD modeling and skilled engineering support.

Safety Rail Company • Spring Park, MN • United States

DIAMOND WIRE MESH ENCLOSURES

Time tested diamond mesh partitions have been pre-engineered for easy installation, give an unrestricted view into the cage, total air circulation, low initial cost and maintenance. Send us the footprint of your project and allow our engineers to assist you on your next project!

SELF DUMPING HOPPERS - 50+ Sizes and Specials!

All welded self dumping hoppers are available in more than 50 different sizes that will fit to your application. All units are engineered to return to an upright position and have a positive locking latch. Safety retaining chain and trip rope assembly is standard on all our units. Open-sided, low profile, narrow, extra wide, and 10,000# capacity units are all within our product line. Casters available on standard units up to the 2½ cubic yard size.

WIRE MESH INFILL PANELS

We will custom fabricate these infill panels to meet your specific requirements. Just send us your specs!

Available in diamond, rectangular and square mesh, with or without standoffs. Frames available in 1" x ½" channel or with a hemmed edge. Other size framing materials and mesh are available, specify weld pattern and types of weld finish desired. Division 5,8 and 10.

EEZY STAK® Enclosures

2" x 1" Rectangular Mesh EEZY STAK® Enclosures are designed and engineered to save time and money on your project installation. Woven wire mesh panels welded into an angle frame; frames secured to the posts. No wire ties or unheard of specialty clips. Just nuts, bolts, and standard hand tools are required. Dark Gray painted panels allow for full visibility into enclosure.

Make An Informed Fall Protection Plan

Falls continue to appear at the top of OSHA's top 10 most cited workplace violations. For many companies, engineered fall protection remains a mystery. What are the requirements? Who's responsible for choosing a system? Who's responsible for maintaining it? How do we know we chose the right solution?

Gorbel, a leading manufacturer of engineered fall protection solutions, turned to several industry experts to help clarify some of these issues. The complete findings, plus potential solutions, can be found in the ebook, "Fall Arrest: Insights and Ideas for Workplace Compliance," which is available for download at www.gorbel.com/righttrack. This article provides a summary of common issues, as well as solutions.

Problem: Installing incomplete or inadequate fall protection.

Many businesses don't fully understand fall protection requirements, and choose a system based on what's the least

expensive or the easiest to incorporate into their facility, meaning they often select a fall protection product that isn't the best solution for their individual application. While *any* fall protection is probably better than no fall protection, inadequate or incomplete fall protection could potentially still expose them to risk. What Gorbel heard often from the experts was, "work doesn't stop if you don't have a fall protection system." Translation: it's not a top priority. The problem with that mindset? Increased potential for catastrophic risk to your workers and your business.

Solution: Choose a system designed specifically for your application.

The experts all advise going with a fall arrest anchorage system that is engineered specifically for your application. Whether your application is maintenance, production, unloading or reloading, engineered fall protection solutions can offer the safest and most productive solution for your application. Reach out to a company that specializes in fall

WHY IS IT OKAY WHEN IT'S ONE OF YOUR WORKERS?

Don't fall victim to inadequate fall protection.

Not following industry standards? One fall can have disastrous consequences for your workers, their families and your business. You can't afford to wait to change the way you look at workplace fall protection.

Find out how you can prevent the inevitable from becoming the unimaginable. Download our new ebook at gorbel.com/righttrack.

protection solutions. They can evaluate your application and your environment and recommend a solution that meets OSHA requirements, fits your budget, and doesn't interfere with your productivity.

Problem: Fall protection is considered a discretionary spend.

Despite a clear mandate that fall protection be implemented for workers at elevations above four feet, many businesses still consider it "optional," exposing them to considerable risks like steep fines, workplace shutdowns, legal fees, and medical bills related to a fall.

For general industry, OSHA requires that workers be protected at heights greater than four feet. OSHA regulations are legislation and must be followed under penalty of law.

In addition to federal regulations, there are "voluntary" consensus standards regarding fall protection set forth by the American National Standards Institute (ANSI) and Canadian Standards Institute (CSA). While not enforceable by law, these standards are typically adopted by OSHA or other regulatory agencies and should be adhered to.

Solution: Elevate your fall protection planning.

If you're responsible for an elevated workforce, it pays to plan ahead. Doing so can save lives and help reduce risk for the company you work for.

The components of a sound fall protection plan are to:

- Define the scope of your fall protection program
- Identify all work area fall hazards

FREEZE PROTECTION

FOR DRY FIRE SPRINKLER SYSTEMS

Frozen auxiliary drains are the main cause of dry fire sprinkler system failures in the winter. This year stop replacing the auxiliary drains that freeze and break with auxiliary drains that freeze and break.

AGF's COLLECTanDRAIN® Model 5400 eliminates freeze-ups by providing a temperature controlled environment for the auxiliary drain increasing their capacity to collect condensation in the winter. Now is the time to install a Model 5400 so colder temperatures won't put your dry fire sprinkler system at risk.

www.collectandrain.com

Solution: Assemble the right fall protection team.

Assembling the appropriate team to choose, implement and manage the best solution is key to the process. It's imperative to include the right mix of decision makers and influencers, and designate clear roles and responsibilities.

You should assign a person within your organization who has the training to properly determine what constitutes a fall hazard. Additionally, OSHA identifies two types of people who should execute the steps that constitute your fall protection plan: a competent person and qualified person. A Competent person is capable of identifying hazardous or dangerous conditions in the personal fall arrest system or any component thereof, as well as their application and use of related equipment. A Qualified person has a recognized degree or professional certificate and extensive knowledge and experience in the subject field who is capable of design, analysis, evaluation, and developing specifications in the subject work, project, or product. See OSHA 29 CFR Part 1910 for more information on qualified and competent persons.

The final step: Engineering the right solution

With all of these insights, solutions, and tools in hand, you will be well prepared to make an informed decision on a fall protection solution. Your final step is to select a system that is designed to protect you from occupational fines, reduce your liability and raise worker productivity and morale.

www.gorbel.com •

- Determine appropriate methods of protection: eliminate, prevent, control
- Conduct extensive employee education and training
- Perform inspection and maintenance of fall arrest equipment
- Administer and audit the program for compliance and continuous improvement

Problem: Decision by committee – without the right information.

The experts agree: many businesses simply don't know how to go about making the right fall protection choice. Because a fall protection decision is often made in the wake of an accident, decisions are sometimes made hastily based on financial considerations and not what is safest or best for the workers.

When Time is of the Essence

Emergency Shower and Eye / Face Wash / Decontamination Booth

After exposure to a hazardous substance, any delay, can result in serious injury. OSHA & ANSI require that emergency shower is to be located within 10 seconds walking time from the hazardous site location. Delivering immediate full body shower. Eye/ face wash with positive stay open valves.

Industrial Applications Emergency Drench Shower Booth unit is equipped with pull rod activated overhead drench shower & rear wall mounted eye/face wash. **Cat No. 16601**

Laboratory Applications Emergency Drench Shower Booth same specs as above except with finished exterior side panels. **Cat No. 16604**

THE INFLUENCE?

Oral Fluid Testing Provides the Answer

The legalization of marijuana is creating challenges for businesses and the ability to maintain the integrity of their "drug free" work programs. Workplaces need an alternative that is best suited to identifying current or more recent use as an indicator of being "under the influence". Oral fluid testing provides that answer detecting very recent use that urine can sometimes miss. As the market leader in oral fluid testing, Intercept leads the way in recent drug detection.

Intercept Oral Fluid Drug Testing

- Capture "Under the Influence" drug use
- Eliminate sample dilution and adulteration
- Increase efficiency and productivity
- Collect anytime, anywhere and...

Maintain the integrity of your drug free workplace program!

Nixalite® of America Inc

Nixalite® the Company

Nixalite of America Inc is the leading manufacturer of effective and humane bird and animal control exclusion and dispersal products. Established in 1950, Nixalite is a third generation, family owned firm with over 150 years of combined experience in bird and animal control.

Nixalite® History

In the late 1940's, Charles B. Kaufmann patented and manufactured the first Nixalite bird control models and founded the Nixalite Company. Known as "porcupine wire" because of its prickly appearance, Nixalite spikes set the industry standards for product quality, reliability and superior design. Nixalite quality and reliability have captured the attention and loyalty of customers worldwide.

Nixalite® Today

Nixalite's executive and manufacturing facilities, located in East Moline, Illinois, are where high grade stainless steel wire and strip are turned into the world's finest bird and animal barriers. Call (888-624-1189) or E-mail (birdcontrol@nixalite.com) Nixalite for a free review of your pest bird or nuisance animal control problem. We are at your service.

Nixalite started in a humble garage back in 1950. Now, Nixalite of America Inc offers hundreds of effective and humane products for the exclusion or dispersal of pest birds and nuisance animals. These include the surface sanitizers and disinfectants needed to protect people and property from the ugly and unhealthy results of unchecked bird and animal infestations.

Nixalite® Products

Effective and reliable products for the humane control of and clean up after pest birds and animals.

- 6 Models of All Stainless Steel Bird Spikes
- 9 Types of Bird Exclusion Netting
- Full Bird Netting Accessories and Hardware
- All Stainless Steel Post & Wire Bird Deterrents
- Electrified Bird-Zap Track Deterrents

ICUEE 2017 Delivers Innovative Industry Trends, Hands-On Experiences and Enthusiastic Crowds

The temperature outside wasn't the only thing running hot in Louisville, KY. Attendees and exhibitors at ICUEE – the International Construction and Utility Equipment Exposition agreed that the show exceeded their expectations with specialized exhibits, hands-on test drives, interactive product demonstrations and lots of activity and leads in the booths.

Commencing Oct. 3-5, the 2017 installment of the Demo Expo was the largest in the show's history with 28-plus acres of exhibits (nearly 1.24 million net square feet) of the latest utility and construction equipment, products and technologies and more than 1,000 exhibitors, of which 25 percent were new to the show.

Tracking close to the 2015 record-breaking attendance, nearly 18,000 registered attendees from all 50 states and

more than 50 other countries worldwide perused the exhibits, raised money for the Red Cross Disaster Relief and the Call of Duty Endowment, and took advantage of all that the show had to offer. Attendee demographics in the utilities category was up 6 percent over 2015 and the utility construction category was up 3 percent over 2015 totals.

"We had a great turnout and participation at ICUEE 2017," said Rick Rodier, vice president, Sitework Systems Division of The Toro Company and 2017 ICUEE chair. "It was inspiring to see the enthusiasm of so many utility and construction professionals networking and sharing ideas, and finding the product innovations and solutions that will help them grow their businesses."

Exhibits and Equipment "Test Runs"

Regulations can be complicated, but they don't have to be. RegScan's WIKI feature provides clear analysis on the newest and most important environmental regulations in easy-to-follow articles authored by subject matter experts. The article-based system explains key provisions and requirements so users can proactively stay transparent while preventing and mitigating risks.

Revised Ambient Air Monitoring Quality Assurance Requirements

ABSTRACT

The revised air monitoring quality assurance requirements are EPA's first comprehensive changes to the air monitoring rules since 2006. These changes formalize many changes that had been informally adopted by Agency memorandum and guidance documents. Many of the changes were driven by improved monitoring technology—such as continuous particulate matter analyzers—that were not commonly available at the time of the previous update.

The revised rules also revert to the pre-2006 structure whereby state and federal monitoring program requirements are set out in Appendix A, with industrial PSD monitoring requirements specified in Appendix B. EPA provides a summary of the changes at the following URL:

https://www3.epa.gov/ttnamb1/files/ambient/sm25/Summary_of_Appendix_A_Changes_1003_25_2016.pdf

ARTICLE

Key Changes

The revised regulation once again separates the quality assurance requirements applicable to state and federal monitoring programs from those for industrial PSD monitoring. This change recognizes the many differences in the objectives and implementation approach between the state and industrial monitoring programs. Other significant items include:

- Increased emphasis on the role and responsibilities of the Primary Quality Assurance Organization (PQAO)
- Requirement that EPA be provided a courtesy copy of an organization's Quality Assurance Project Plan (QAPP), even if that PQAO has been delegated QAPP review authority by EPA.
- Clarification of the applicable system and performance audits and required frequency for each type of monitoring program
- Updated calibration and audit ranges for gaseous analyzers

Impacts On Existing Monitoring Monitoring Programs

ICUEE 2017 featured specialized exhibit pavilions for fleet management, safety and green utilities, China and Korean exhibit pavilions, and the Lift Safety Zone from the National Commission for the Certification of Crane Operators (NCCCO).

Hands-on equipment test drives and interactive product demonstrations included a 2-mile Test Drive Zone for on-road equipment and technologies.

Over the roar of the Super Witch, a demo vehicle with an 850 horse power 502 Chevy Engine, Tucker Dotson, Ditch Witch regional sales manager for the Eastern United States, shared that the show has been going great for the enduring ICUEE exhibitor.

“Telecom is hot and it’s a big deal for us to be here at ICUEE,” said Dotson. “We’ve been coming to the show since its inception and 2017 has proven to be another great show for Ditch Witch. It’s been steady in the booth and it’s a great opportunity for us to meet with customers and prospects and show our equipment in one location.”

Liz Kendrick, project sales manager for Man Lift, a new exhibitor to ICUEE, echoed Dotson’s comments.

“We are looking to make our mark in the industry and shows like ICUEE help us do that,” said Kendrick. “We couldn’t be happier with the experience. Our president came down in 2015 to walk the show and at that point we knew this was the way to go to get out to market. We’re busy and we’re very happy with the results.”

Representatives from Ditch Witch and Man Lift said they plan to return to the next ICUEE, in 2019.

Education on Industry Best Practices

ICUEE 2017 education focused on utility and construction “hot topics” presented by industry experts to help attendees enhance their safety knowledge, increase efficiencies and reduce downtime on the job.

New Field Classroom sessions highlighted industry best practices first hand with equipment on the show floor, and the indoor ICUEE Demo Stage expanded the show’s outdoor equipment demo component with more product innovations in action.

Another new feature, “Tomorrow’s Topics Today” sessions from show owner and producer Association of Equipment Manufacturers (AEM), explored industry trends and emerging technologies.

Rounding out ICUEE 2017 education were popular returning programs: the iP Utility Safety Conference and Utility Fleet Conference plus industry certifications.

Special Events and Networking

In response to the unusual number of natural disasters, a new ‘Disasters Taskforce: Preparing for What’s Next’ program tackled disaster preparedness in the aftermath of the current hurricane season, with a former FEMA advisor.

Gretchen Bakke, author of ‘The Grid: The Fraying Wires Between Americans and Our Energy Future’ was the featured speaker in the new ‘Diversity in the Grid’ luncheon brought to you in partnership with Terex Utilities and AEM.

The ICUEE Industry 'Give-Back' Auction returned with the goal of connecting military veterans with quality jobs. All proceeds again went to the Call of Duty™ Endowment, the nonprofit organization founded by Bobby Kotick, CEO of Activision Blizzard. The auction, plus onsite donations, to benefit the organization raised over \$37,000.

The Endowment helps military veterans secure high-quality employment and works to raise awareness of the value vets bring to the workplace.

A new "Discover ICUEE" walking tour before show opening offered a behind-the-scenes look at the exhibition, and ICUEE 2017 closed with an enhanced 'Bourbon, Beer & Bites' networking reception.

The biennial ICUEE is also known as The Demo Expo and is the leading event for utility professionals and construction contractors seeking comprehensive insights into the latest industry technologies, innovations and trends, owned and produced by the Association of Equipment Manufacturers (AEM).

AEM is the North American-based international trade group representing off-road equipment manufacturers and suppliers, with more than 950 companies and more than 200 product lines in the agriculture and construction-related sectors worldwide.

Calibration Technologies

ctiengineering.com • 866-394-5861

Ammonia Gas Detectors for Harsh Environments

Calibration Technologies, Inc (CTI) is a leading manufacturer of gas detection equipment for industrial facilities. Their customers include food processing plants, cold storage plants, chiller plants, rendering plants, power plants, chemical plants, pharmaceutical plants, sea vessels, and hazmat/emergency response agencies. CTI specializes in gas detectors for Ammonia, Carbon Dioxide, Carbon Monoxide, Chlorine, Hydrogen Sulfide, Methane, Halocarbons, and many others.

CTI designs, manufactures, and sells service gas detection equipment that protect people and property from dangerous gas leaks and assure compliance to all current codes and regulations regarding the handling of

these gases. When you call CTI, a real person will answer the phone, providing quick access to experienced staff members (including technicians and engineers), for technical assistance on gas detection system design and support.

The products are manufactured in house in Columbia, MO, allowing CTI to control quality and keep their products in stock for fast response times for customers. They strive to ship out products within 1 day of receiving orders, rivaling all other gas detection manufacturers. The quick turnaround on parts, and excellent product support have made CTI an industry leader in providing gas detection products in the USA and abroad.

CTI was founded in 2004 by brothers Brian and Kevin EuDaly, after noticing a need for gas detection equipment that could stand up to the extreme conditions experienced in most food processing and cold storage facilities. The once small business has grown exponentially every year since, as has their innovative product line. The same qualities that helped the business jump start in 2004, have led to immense growth and product development, retaining existing customers and rapidly expanding their customer base. The family atmosphere of the once small business, has been passed down to employees, leading to a loyal customer base that trusts the manufacturer of life safety equipment.

The product line was developed to overcome the failure of standard gas detection equipment when exposed to extreme temperatures, moisture, cleaning chemicals, and cross sensitivity from other gases. Industrial facilities often experience false alarms, increased maintenance costs, and frustration with gas detectors designed more for commercial environments. These issues led CTI to focus on building a product line of gas detection equipment that functions properly in extreme conditions. The engineers, chemists, and production experts are constantly listening to feedback from customers and designing new and innovative products that solve problems experienced in industrial environments.

CTI gas detectors are built for the

harshest environments and thrive in conditions where other sensors fail. They can handle hot, wet, cold and harsh environments without breaking down or setting off unwanted alarms. Built food industry tough, they can handle extreme temperature swings that occur in cleaning and defrosting processes. Circuit boards and components are potted in a water-proof, rugged potting compound that provides protection from not only sprayed water and chemicals, but also from destructive corrosion caused by long-term exposure to moist, damp environments.

Rigorous testing of each and every sensor ensures that it will perform properly in a multitude of applications. All sensors undergo a rigorous testing period and must pass many

inspections before they are put into inventory.

The sales and service team are experienced and equipped to answer all questions and design a system that meets the unique needs of customers. CTI's mission is to provide the best gas detection equipment in the industry and to conform to all codes, protect property, and most importantly, protect personnel.

Check out CTI's full product line today on their website www.ctiengineering.com, by emailing sales@ctiengineering.com or by calling in (866-394-5861) to talk to one of their experienced sales staff.

Scantek Inc

A  Norsonic Company

Scantek, Inc. is a worldwide leader in sound and vibration instrumentation sales, service, rental, and calibration. Scantek sells, services, and rents the finest products and provides expert support on their use. The Scantek Calibration Laboratory is accredited for microphones, calibrators, sound level meters, dosimeters, sound and vibration FFT, and real-time analyzers, preamplifiers and signal conditioners, accelerometers, velocity sensors, vibration meters, and vibration exciters. Scantek, Inc is a wholly owned subsidiary of Norsonic AS.

Industrial equipment supplier in Columbia, Maryland

Products that we Offer:

Accelerometers

Accelerometers

Prediction Software

Calculation Software

Noise Analysis and Reporting Software

Sound Limiters

Calibrators & Calibration System

Special Test Systems

Consulting

Scantek staff provides consulting in many aspects of acoustics, vibration, and instrumentation including:

- Applications of instruments
- Calibration issues
- Measurement methods development
- Training in basic, intermediate, and advanced acoustics and noise control
- Building acoustics including multi-family
- Outdoor noise propagation
- Industrial facilities
- Community noise measurements
- Expert witness testimony
- HVAC noise control
- Industrial noise measurement
- Noise prediction

Instrument Repair

Scantek is the North American Factory Authorized Service Center for RION, Norsonic, CESVA, and Castle Group. Personnel have been factory

trained. We have all necessary test instruments to check voltage, frequency, and pressure to a high level of accuracy. We have many instrument repair manuals from a large group of manufacturers.

Rental - Noise and Vibration Equipment Rental - Scantek Inc.

scantekinc.com/rental

Introducing the Radiation Alert™ Ranger

from SE International

The Ranger offers maximum performance in a lightweight, rugged solution for surveying at the facility or in the field. The Ranger has been designed for industrial environments, but it still has all of the features you've come to love in the lab. The Ranger is a small, handheld, microprocessor-based instrument which offers excellent sensitivity to low levels of alpha, beta, gamma, and x-rays and has built in efficiencies for common isotopes to calculate activity in Bq and DPM. It has a backlit digital display, a red count light, and a beeper that sounds with each count detected. Other features include selectable alert levels, an adjustable timer, and an optional wipe test plate for swipes. Internal memory and the free Observer USB Software allow you to download your data, set computer alarms, and calibrate your instrument!

Detector

Internal Halogen-quenched, uncompensated GM tube with thin mica window, 1.4-2.0 mg/cm² areal density. Effective diameter of window is 45 mm (1.77 in.).

Operating Range

mR/hr - .001 (1μR) to 100

CPM - 0 to 350,000

μSv/hr - .01 to 1000

CPS - 0 to 5000

Total Counts- 1 to 9,999,000 counts

Accuracy (Referenced to Cs137)

Typically ±15% from factory, ±10% with NIST Source Calibration

Energy Sensitivity

Detects Alpha down to 2 MeV. Detects Beta down to .16 MeV; typical detection efficiency at 1 MeV is approx. 25%. Detects Gamma down to 10 KeV through the detector window. 3340 CPM/mR/hr (¹³⁷Cs). Smallest detectable level for ¹²⁵I is .02 μCi at contact.

Built-In Efficiencies

Sulfur (³⁵S), Strontium (⁹⁰Sr/y), Cesium (¹³⁷Cs), Phosphorus (³²P), Carbon (¹⁴C), Iodine (¹³¹I), Cobalt (⁶⁰Co), and Alpha

Selectable Alert Set Range

mR/hr .001 - 100 and CPM 1 - 350,000. Pulsating beeper sounds the alert. Adjustable alert levels are used for mR/hr / CPM, and μSv/hr / CPS. 70db @ 1m. Alarm will sound when in Timer Mode when set alarm threshold is reached.

Calibration Technologies is a leading manufacturer of gas detection systems and accessories operating out of Columbia, MO. CTI has provided toxic and flammable gas detection sales and service for many years. Our engineers and technicians have over 30 years of experience in system design, sales, and field service.

We service a wide variety of industries including food processing plants, cold storage plants, chiller plants, rendering plants, power plants, chemical plants, pharmaceutical plants, ships, and hazmat/emergency response agencies.

We specialize in detecting a variety of gases including: Ammonia, Carbon Dioxide, Carbon Monoxide, Hydrogen, Methane, Hydrogen Sulfide, Chlorine, Halocarbons, and more.

Calibration Technologies provides sales, repairs, and in-house calibration services for fixed and portable gas detectors. Our service technicians provide on-site calibration at customer facilities, including certified documentation and field calibration service for all your gas detection equipment. We have decades of experience designing and calibrating ammonia gas sensors, making sure they work in your extreme environments.

Introducing the

Radiation Alert™

Area Monitor

from SE International

The Radiation Alert® Area Monitor is one of the most user friendly, all inclusive, state of the art radiation area monitors available. The easy to use interface is an intelligent resistive touch screen display featuring a large five digit LED readout.

It comes with either an internal or external detector and free software for monitoring every Radiation Alert® Area Monitor on your network. Includes user selectable warning indicators for low and high radiation alarm levels, low battery, and detector failure. Setup email and text alerts to receive alarms while on the go. All the settings are stored internally, even when power is disconnected. All units come with a Certificate of Conformance. NIST Source calibrations available upon request.

Milwaukee® Announces New Dipped Gloves, Improving Safety & Dexterity on the Jobsite

Milwaukee Tool enhances safety on the jobsite with the introduction of new Dipped Gloves. The new gloves are ANSI/ISEA-rated for Cut Levels 1, 3, and 5 and are EN 388 rated. Designed to provide users with all-day comfort and ultimate durability, all of the new gloves have been thoughtfully developed with proprietary knitting that provide the protection necessary at these key ANSI/ISEA cut levels and EN ratings. Each also features *SMARTSWIPE™* technology so users can access phones or tablets without removing the gloves.

“As jobsite safety is emphasized across the nation, users increasingly need hand protection that is comfortable, durable and provides the dexterity needed to work with small fasteners and fittings,” said Matt Vargo, Product Manager for Milwaukee Tool. “Through a proprietary knitting process and a nitrile dip, these new gloves provide outstanding durability, perform well in a wide range of temperatures and are resistant to most common chemicals

and solvents found on the jobsite; all while maintaining an excellent grip and all-day comfort.”

Cut Level 1 Dipped Gloves

The textured nitrile palm of the Cut Level 1 Dipped Gloves offer a better grip on materials, as well as increased dexterity, and their nylon/lycra blend construction provides increased comfort and wicks away moisture to keep hands dry. *SMARTSWIPE™* touch screen functionality has been incorporated into the index finger tip to permit the use of touchscreen devices without removing the gloves.

Cut Level 3 Dipped Gloves

These gloves feature ANSI/ISEA cut level 3 protection to help prevent injuries from sharp objects on the jobsite. They also provide a more comfortable grip, maximum dexterity when handling small objects, and feature a Comfort Web Grip for outstanding grip performance. The nitrile dip material provides ultimate durabil-

ity and best-in-class puncture resistance while *SMARTSWIPE™* fingertips and palms provide full access to touchscreen devices.

Cut Level 5 Dipped Gloves

These gloves feature ANSI/ISEA cut level 5 protection to help prevent injuries from demanding jobsite applications, such as work with sheet metal/glass, wire stripping, and ducting. The gloves utilize a double-dipped nitrile grip for best-in-class puncture resistance, and added durability. Similar to the Cut Level 3 Dipped Gloves, the Cut Level 5 Dipped Gloves also include *SMARTSWIPE™* fingertips and palms.

Milwaukee Tool’s new Dipped Gloves are designed to provide users with ANSI-rated protection, all-day comfort, ultimate durability and the best dexterity for handling small objects and using touch-screen devices – without sacrificing jobsite productivity.

SciMatCo

Scientific Materials Company

SciMatCo, Scientific Materials Company, was formed in 1989 by the owners of Flinn Scientific, Inc. and is located in a 200,000+ square foot facility in Batavia, Illinois. The company mission is to provide the safest, most dependable safety storage cabinets available. Lawrence Flinn Jr., the founder of Flinn Scientific, maintained an intense focus on customers' needs and safety which continues to serve as the foundation of the company's success. Mr. Flinn's commitment to promoting safety led him to the research-based conclusion that safety cabinets made of wood—and not metal—provide significantly greater safety and value. Using construction guidelines established by OSHA, NFPA and UFC, Mr. Flinn worked with a local cabinetmaker to build wooden cabinets for the storage of corrosive or flammable materials. A product line was created and SciMatCo was formed as a wholly-owned division of Flinn Scientific, Inc. Today, Mike Lavelle leads Flinn Scientific and SciMatCo as chief executive officer.

Hired as one of SciMatCo's first principal employees, Tony Leben now serves as the company's vice president of manufacturing. Tony is responsible for all production management, as well as the company's international distribution network. As the company grew, SciMatCo's safety cabinet offering was refined and expanded to include models to suit virtually any

application—in all sizes and various configurations to safely store hazards of all types.

While SciMatCo's laser focus on safety spurs the company's growth, other manufacturers seem to ignore an obvious fact. The dangerous but widely unknown truth in the industry is that metal-constructed cabinets cannot safely store flammable materials. Why? Because metal quickly conducts heat! Inside a metal cabinet, the increase in temperatures from a fire outside the cabinet creates a huge risk of igniting the contents and actually fueling the fire! SciMatCo's exclusive wood construction is used on all flammable liquid storage cabinets because wood thermally insulates the contents from the heat and flames of a fire, keeping the contents cool and eliminating risk. The dense, 1-inch thick exterior-grade plywood used in SciMatCo cabinets, constructed to specifications mandated by OSHA, NFPA, UFC and UL, will withstand fire far longer, giving

emergency response teams more time to arrive. All SciMatCo flammable liquid storage cabinets have passed UL's very stringent testing and are UL Listed.

SciMatCo's corrosive material storage cabinets are constructed of wood or plastic that is non-reactive to the hazardous materials stored within them. SciMatCo's non-metallic construction will never rust, corrode or deteriorate so all materials stored within the cabinets stay safer and secure. SciMatCo offers wood-constructed corrosive storage cabinets that are partially lined with polypropylene on the shelf and floor of the cabinet, as well as wood cabinets with the entire interiors fully lined with polypropylene. For storage of very high concentrations of corrosive materials, they also offer 100% polypropylene or 100% high density polyethylene cabinets. SciMatCo Polypropylene and HDPE Plast-a-Cabs® are also ideal for use in clean rooms, pharmaceutical environments, food service or marine applications.

Although the concept of wood construction is not commonly known for the storage of hazardous materials, it is certainly proven to be far safer and superior for both flammable and corrosive material storage. SciMatCo proudly manufactures and distributes wood and plastic cabinets for storage of these, and all other types of hazardous materials. For the safest chemical and hazmat storage, visit SciMatCo at www.SciMatCo.com or call 888-879-7620 today.

VIBRATION MONITORING TERMINAL – TYPE 3680

GOOD VIBRATIONS

SEEING IS BELIEVING

VIBRATION MONITORING TERMINAL 2017 TOUR - COMING TO A CITY NEAR YOU
FOR MORE INFO VISIT www.bksv.com/VMT-TOUR

Reliably take real-time measurements with our new Vibration Monitoring Terminal. The robust device enables you to:

- Protect against structural damage risks in construction and mining
- Assess human response to road and rail traffic vibration
- Monitor background vibration to avoid sensitive machinery disturbance

The Vibration Monitoring Terminal includes metrics for a wide range of applications. The system provides continuous, uninterrupted, real-time monitoring 24/7. Alerts are based on level and time of day. It contains a single tri-axial geophone for full coverage of vibration levels, and built-in remote access so you don't need to visit a site to retrieve data.

Use the unit with our Sentinel environmental monitoring service or as a stand-alone device.

*Established in 1932 in Detroit, Michigan, by the grandfather of the c
Jesco Industries Inc. has grown to become one of the leading manufact
al handling equipment. We serve our customers very well by offering
of products which may be used from the processing department throu
ping department. A Woman Owned Small Business is WBE Ce*

urrent owner,
tures of materi-
a wide variety
ugh to the ship-
ertified.

JESCOHUSKYDUMPERS® available in over 60 different sizes and maintain stock of standard sizes over 800 standard units of self dumping hoppers (2000#, 4000# and 6000# capacities). We offer several large volume self dumping hoppers in 6 cubic, 8 cubic and 10 cubic yard 6,000-10,000 capacity. Special applications deserve a specially designed unit. After many customers inquiring about a controlled dump or hydraulic unit, we decided to engineer and add several different hydraulic units to the product line.

JESCOHYDRATILT™ Dumpers which are available in 4000# capacity in .50, .75, 1, 1.5, and 2 cubic yard. The units are operator controlled with the hydraulic system of your forklift and used while seated on the lift. These new units are ideal when controlling the speed of discharging material is critical. The quick-disconnect lines are included on each of the units and a safety retaining chain. To fill out the line even more we have included ten different sizes of our Filter Press Hopper. Then along came the 90 degree Side Pivot Hopper and Low Profile Portable Hoppers with casters already installed.

Wire Mesh Partitions: 2"x1" rectangular mesh 10 gauge wire welded into an angle frame system is easy to use and easy to install. Ideal for around your automation enclosures, prevent your valuable tools from walking away from the tool crib, and quality control on non-conforming material, computer rooms, high security storage and so many more uses. JescoPalletGards® are wire containment backs for the pallet racks with stand-off clips (1.25, 4, 6 or 8 inch) design to fit most standard drilled pallet racks spaced two inch on center. Double hinge doors or double slide doors is an excellent way to secure high value products on the shelves.

1-1/2" Diamond mesh 10 gauge wire partition system are engineered for easy installation allowing unrestricted visibility and total air circulation. Inventory of standard height panels of 7, 8 or 10 high are available; but don't stop there because many industries require partitions to reach the trusses or building joists and that certainly can be accomplished. If you are installing partition on a raised platform (mezzanine) remember this requires zero or "no" sweep to keep everyone safe walking below. This is to prevent tools from dropping from the edge of the platform. (OSHA 1910.23(e)(4) Either partition system will work well but the more project information you are able to supply, the more knowledgeable we all become and it is truly amazing how that works!

The JESCOGARD® industrial guard rail 3-rib corrugation system will act as both a visual and physical barrier around your facility. The Economy Rail System is a 2-rib system and has been tested to withstand an impact of 10,000# traveling 4-mph. Should the need arise you can count on its strength without compromising quality at a price you can afford. Each system has available a self-closing single hinge gate with a sound dampening gasket on the gate.

Industrial shelf carts, platform trucks die storage racks and material handling trucks are built tough to move raw stock, cartons or finished materials in your plant for many years to come. Special carts are no issue just let us know what you need.

JESCOHUSKYDUMPERS®, wire partition systems, industrial guard rail systems, wire tenant storage lockers, industrial shelf carts, LP cylinder cabinets, machine guarding just to name a small portion of the products we offer to our customers. Our products are built to be the best in the industry and it is the reason customers keep coming back. Your satisfaction for a project well done is what really counts when the day comes to a close. We look forward for an opportunity to be able to assist your next industrial guarding or material handling requirements. Check out the full product line shown on the website at www.jescoOnline.com

RegScan Web Services

Your System, Our Content

RegScan ONE

One World, One Platform

www.regscan.com

REGSCAN ONE GLOBAL REGULATORY SOFTWARE

Discover your software solution today!

With a dedicated staff of experts in four U.S. states and Washington D.C., and an ever-growing network of in-country resources, RegScan can always be counted on as a trusted resource for up-to-date regulatory information from every corner of the globe. RegScan has consistently outpaced a growing league of competitors in the industry niche we incepted, by offering unique solutions to our Fortune 1000 customer base. Whatever business you're in, we can assist you with your compliance needs. Our vast product line includes online compliance solutions for a variety of industries:

- Manufacturing
- Transportation
- Energy
- Chemicals and more!

RegScan's unique online tools enable easy access to, and interpretations of, global environmental regulations and operational standards. Do your research and get your alerts through the RegScan One system, or have your content exported via web services to any online environmental management system. Users of the RegScan One system can create custom legal registers and audit protocols for more than 140 jurisdictions. Access the interface in nine languages:

- English
- Chinese
- French
- German
- Italian
- Japanese
- Malay
- Portuguese
- Spanish

Educational Resources

Webinars

RegScan understands that staying in compliance is critical. But it doesn't have to be complicated. That is why we host webinars several times throughout the year that help our clients tackle ever-evolving problems in the EHS industry. Prior topics covered included regulatory overviews, the Changing Role of the EHS Manager, and ISO 14001:2015. Such topics specifically address the newest industry standards while banishing compliance confusion, provide necessary tools to manage today's EHS challenges and reduce time and money spent on compliance activities.

Tutorials

RegScan also produces a number of helpful videos for our users. They answer most commonly asked questions on using the RegScan One interface. You may wish to visit our Informational & Tutorial Videos Page prior to submitting a ticket to see if your question can be answered with the assistance of one of these videos.

Quality Suite

RegScan has introduced audit protocols and checklists geared to quality management in healthcare. They cover the basic ISO 9001 and Quality Systems, Medical Devices (United States and the European Union), and Pharmaceuticals.

I-Comply Checklists have been added to provide Environmental, Health, Safety, Security for Data Centers and Offices. When you still have EH&S issues, but not the intensity of a manufacturing opera-

tion.

Tracking Regulatory Change

Strikethrough

Strikethrough allows you to effortlessly see the amendment history of a regulation by comparing the current regulation with an earlier or future version. Changes are easily identified by color-coding. Anything that has been added will appear in green, while anything that has been deleted will appear in red.

My WatchList

My WatchList is a custom regulatory change management tool that allows you to monitor change at various levels of detail. It gives you quick access to only the information you need, while providing a clear record of what you have and haven't reviewed. My WatchList is the easiest way for a Web Services user to build a custom regulatory register, which RegScan will automatically export to your online environmental management system.

LookOut Email Alert

By defining specific keywords or phrases, LookOut allows you receive daily Email alerts on State or Federal regulatory changes.

RegScan Customer Support

As part of our ongoing commitment to improve the RegScan user experience, we use a ticketing system for customer support inquiries. This allows us to streamline requests and better serve you. Available 24/7, the ticketing system

allows you to immediately report an issue and track the support team's response to it. Every support request is assigned a unique ticket number. For your reference, we provide complete archives and history of all your support requests. A valid email address is required to submit a ticket.

Schedule a Demonstration

The RegScan team will gladly demonstrate any of our products or services for free. Our online demonstration sessions can accommodate up to 25 people, and we will schedule a meeting whenever it's convenient for you. During these interactive demonstrations, our experienced staff will go through whatever products or services interest you. You'll also have the opportunity to ask questions, and discuss licensing options that are tailored to your needs. If you decide to purchase, we can take of your training and support needs too. We frequently update our library of training videos, and we'll be happy to arrange online or in-person training sessions. Furthermore, our in-house technical support team is always available on weekdays (except for holidays) between 8 a.m. and 8 p.m. Eastern time, and online 24/7.

To learn more about RegScan, please call +1 570-323-1010, or Email info@regscan.com.
