VIBRATION MONITORING TERMINAL – TYPE 3680

GOOD VIBRATIONS

SEEING IS BELIEVING

VIBRATION MONITORING TERMINAL 2017 TOUR - COMING TO A CITY NEAR YOU
FOR MORE INFO VISIT www.bksv.com/VMT-TOUR

Reliably take real-time measurements with our new Vibration Monitoring Terminal. The robust device enables you to:

- Protect against structural damage risks in construction and mining
- Assess human response to road and rail traffic vibration
- Monitor background vibration to avoid sensitive machinery disturbance

The Vibration Monitoring Terminal includes metrics for a wide range of applications. The system provides continuous, uninterrupted, real-time monitoring 24/7. Alerts are based on level and time of day. It contains a single tri-axial geophone for full coverage of vibration levels, and built-in remote access so you don't need to visit a site to retrieve data.

Use the unit with our Sentinel environmental monitoring service or as a stand-alone device.

HEMCO
Laboratory Planning Solutions
HEMCO is a ISO 9001:2008 Certified Company

Welcome to HEMCO

HEMCO is the leading manufacturer of innovative laboratory equipment serving the Sciences and R&D Technology Industries since 1958. Located in Independence, Missouri, the heart of America, and the crossroads of North America a major center for transportation, communication, distribution, and manufacturing industries worldwide.

HEMCO's modern manufacturing and distribution facilities combined with our many years of experience uniquely qualifies us to provide laboratory planning solutions. Our extensive engineering, design and manufacturing expertise can transform your laboratory ideas into reality.

HEMCO is a ISO 9001:2008 Certified Company.

Lab Planning Solutions

- Acid Storage Cabinets
- UniFlow AireStream Fume Hoods
- Emergency Shower Decontamination Booths
- UniLine Laboratory Casework and Worksurfaces

• UniFlow AireStream Fume Hoods unitized superstructure construction for strength and chemical resistance. Fume chamber is molded one piece seamless, glass smooth, with all corners coved for easy cleaning. • U.L. 1805 Classified requirements for laboratory fume hoods and cabinets • UniLine Laboratory casework groupings including a wide selection of casework, epoxy countertops, sinks, plumbing and electrical fixtures to meet layout designs. • Safety equipment include emergency shower decontamination booths, eye / face wash stations, acid cabinets and corner canopy hoods

Modular Clean Labs
Pre-engineered for prompt on-site install. HVAC, HEPA filtration, lighting to spec

EnviroMax Enclosures
Vented enclosures to protect robotic processes from contamination and personnel from hazardous fumes

UniFlow
Full Line of low flow, Constant Volume, VAV, energy efficient, bench mount and floor mount fume hoods

Emergency Showers
Delivers immediate full body shower eye/face wash with positive stay open valves

UniMax Enclosures
Large Floor Mount Enclosures, to accommodate tall apparatus, Modular design for fast on-site assembly

WE'VE GOT YOU COVERED

SAFETY

UniFlow Laboratory Fume Hoods

- UniFlow AireStream low flow high performance fume hoods feature exclusive all composite resin construction that is chemical resistant, flame retardant, lightweight, and meets UL 1805, SEFA 1, ASHRAE 110, & ANSI Z9.5 standards.
- These hoods have a molded one piece seamless composite resin interior fume chamber that has all covered corners and is white for superior light reflectivity. Available in sizes from 30" to 96" wide and in depths of 24" to 48", and in CAV (air bypass) or VAV (restricted bypass) models.
- Other HEMCO UniFlow Fume Hoods are engineered and built for specialty application such as Perchloric acid that has either a type 316 stainless steel or PVC welded one piece interior fume chamber including worksurface and rear drain trough.
- Acid digestion that has an HDPE welded one piece interior fume chamber including worksurface and optional rear drain trough.
- Radioisotope that has a type 304 stainless steel welded one piece interior fume chamber including worksurface.
- Trace metals that has a polypropylene welded one piece interior fume chamber including the worksurface.
- Each of these fume hoods would still have the composite resin exterior superstructure in lieu of traditional painted steel.
- Support base cabinets, heavy duty tables and either epoxy resin, phenolic resin or stainless steel dished worksurfaces are offered to complete the UniFlow fume hood installation.
- Additional lab furniture can be designed with the fume hoods including sinks, faucets, wall cabinets to complete the laboratory.

Regulations can be complicated, but they don't have to be. RegScan's WIKI feature provides clear analysis on the newest and most important environmental regulations in easy-to-follow articles authored by subject matter experts. The article-based system explains key provisions and requirements so users can proactively stay transparent while preventing and mitigating risks.

• Icon displayed next to reviewed regulations in the RegScanOne database

• Connected with the My WatchList Alert system so authors and articles stay current with regulatory changes

• Includes contact information and bios for all authors

• Displays the date when the article was last updated

• Full-text regulations located next to abstracts and articles

ERM

ERM, one of the world's largest consulting firms, shares its expertise exclusively with RegScan users.

Revised Ambient Air Monitoring Quality Assurance Requirements

ABSTRACT

The revised air monitoring quality assurance requirements are EPA's first comprehensive changes to the air monitoring rules since 2006. These changes formalize many changes that had been informally adopted by Agency memorandum and guidance documents. Many of the changes were driven by improved monitoring technology—such as continuous particulate matter analyzers—that were not commonly available at the time of the previous update.

The revised rules also revert to the pre-2006 structure whereby state and federal monitoring program requirements are set out in Appendix A, with industrial PSD monitoring requirements specified in Appendix B. EPA provides a summary of the changes at the following URL:

https://www3.epa.gov/ttnamb1/files/ambient/pm25/Summary_of_Appendix_A_Changes_1003_25_2016.pdf

ARTICLE

Key Changes

The revised regulation once again separates the quality assurance requirements applicable to state and federal monitoring programs from those for industrial PSD monitoring. This change recognizes the many differences in the objectives and implementation approach between the state and industrial monitoring programs. Other significant items include:

- Increased emphasis on the role and responsibilities of the Primary Quality Assurance Organization (PQAO)
- Requirement that EPA be provided a courtesy copy of an organization's Quality Assurance Project Plan (QAPP), even if that PQAO has been delegated QAPP review authority by EPA.
- Clarification of the applicable system and performance audits and required frequency for each type of monitoring program
- Updated calibration and audit ranges for gaseous analyzers

Impacts On Existing Monitoring Monitoring Programs

Seamless Integration

RegScan Web Services

Your System, Our Content

RegScan ONE

One World, One Platform

www.regscan.com

REGSCAN ONE GLOBAL REGULATORY SOFTWARE

Discover your software solution today!

With a dedicated staff of experts in four U.S. states and Washington D.C., and an ever-growing network of in-country resources, RegScan can always be counted on as a trusted resource for up-to-date regulatory information from every corner of the globe. RegScan has consistently outpaced a growing league of competitors in the industry niche we inceptioned, by offering unique solutions to our Fortune 1000 customer base. Whatever business you're in, we can assist you with your compliance needs. Our vast product line includes online compliance solutions for a variety of industries:

- Manufacturing
- Transportation
- Energy
- Chemicals and more!

RegScan's unique online tools enable easy access to, and interpretations of, global environmental regulations and operational standards. Do your research and get your alerts through the RegScan One system, or have your content exported via web services to any online environmental management system. Users of the RegScan One system can create custom legal registers and audit protocols for more than 140 jurisdictions. Access the interface in nine languages:

- English
- Chinese
- French
- German
- Italian
- Japanese
- Malay
- Portuguese
- Spanish

Educational Resources

Webinars

RegScan understands that staying in compliance is critical. But it doesn't have to be complicated. That is why we host webinars several times throughout the year that help our clients tackle ever-evolving problems in the EHS industry. Prior topics covered included regulatory overviews, the Changing Role of the EHS Manager, and ISO 14001:2015. Such topics specifically address the newest industry standards while banishing compliance confusion, provide necessary tools to manage today's EHS challenges and reduce time and money spent on compliance activities.

Tutorials

RegScan also produces a number of helpful videos for our users. They answer most commonly asked questions on using the RegScan One interface. You may wish to visit our Informational & Tutorial Videos Page prior to submitting a ticket to see if your question can be answered with the assistance of one of these videos.

Quality Suite

RegScan has introduced audit protocols and checklists geared to quality management in healthcare. They cover the basic ISO 9001 and Quality Systems, Medical Devices (United States and the European Union), and Pharmaceuticals.

I-Comply Checklists have been added to provide Environmental, Health, Safety, Security for Data Centers and Offices. When you still have EH&S issues, but not the intensity of a manufacturing opera-

tion.

Tracking Regulatory Change

Strikethrough

Strikethrough allows you to effortlessly see the amendment history of a regulation by comparing the current regulation with an earlier or future version. Changes are easily identified by color-coding. Anything that has been added will appear in green, while anything that has been deleted will appear in red.

My WatchList

My WatchList is a custom regulatory change management tool that allows you to monitor change at various levels of detail. It gives you quick access to only the information you need, while providing a clear record of what you have and haven't reviewed. My WatchList is the easiest way for a Web Services user to build a custom regulatory register, which RegScan will automatically export to your online environmental management system.

LookOut Email Alert

By defining specific keywords or phrases, LookOut allows you receive daily Email alerts on State or Federal regulatory changes.

RegScan Customer Support

As part of our ongoing commitment to improve the RegScan user experience, we use a ticketing system for customer support inquiries. This allows us to streamline requests and better serve you. Available 24/7, the ticketing system

allows you to immediately report an issue and track the support team's response to it. Every support request is assigned a unique ticket number. For your reference, we provide complete archives and history of all your support requests. A valid email address is required to submit a ticket.

Schedule a Demonstration

The RegScan team will gladly demonstrate any of our products or services for free. Our online demonstration sessions can accommodate up to 25 people, and we will schedule a meeting whenever it's convenient for you. During these interactive demonstrations, our experienced staff will go through whatever products or services interest you. You'll also have the opportunity to ask questions, and discuss licensing options that are tailored to your needs. If you decide to purchase, we can take of your training and support needs too. We frequently update our library of training videos, and we'll be happy to arrange online or in-person training sessions. Furthermore, our in-house technical support team is always available on weekdays (except for holidays) between 8 a.m. and 8 p.m. Eastern time, and online 24/7.

To learn more about RegScan, please call +1 570-323-1010, or Email info@regscan.com.

Delta to Reveal Anti-Microbial Cooling Tower at AHR Expo

The risk of propagation of deadly cooling tower-borne pathogens, such as Legionnaire's Disease, can be minimized through the use of towers made of anti-microbial HDPE

Delta Cooling Towers (deltacooling.com) will display the World's first anti-microbial cooling tower at this month's AHR Expo in Las Vegas (Booth #N7406).

Legionella, the bacteria that causes potentially fatal Legionnaire's Disease, and other strains of deadly pathogens that are hosted by some cooling towers, have been substantially reduced by the development of a unique anti-microbial HDPE material designed by Delta Cooling.

Delta, which pioneered the HDPE (high-density polyethylene) plastic cooling tower in the 1970s, has just launched a line of towers constructed of anti-microbial

resin, which is fully compounded into the base cooling tower material. The anti-microbial resin contains additives that operate on a cellular level to continuously disrupt and prevent uncontrolled growth of microorganisms and biofilm within the cooling tower. Efficacy tests were performed by Special Pathogens Laboratory, The Legionella Experts®.

Although the public concern about Legionnaire's Disease was paramount during the outbreaks of the mid-1970s, there have been many occurrences since then, including over a dozen cases in the U.S. this year, as well as several in Europe and Australia.

WHY IS IT OKAY WHEN IT'S ONE OF YOUR WORKERS?

Don't fall victim to inadequate fall protection.

Not following industry standards? One fall can have disastrous consequences for your workers, their families and your business. You can't afford to wait to change the way you look at workplace fall protection.

Find out how you can prevent the inevitable from becoming the unimaginable. Download our new ebook at gorbel.com/righttrack.

According to the CDC, in many of these cases Legionella is incubated and spread through water systems, including the cooling towers that are essential items in commercial building HVAC systems and industrial process cooling.

It has been well established that, under certain common conditions, cooling towers can propagate Legionella, a virulent bacteria that can produce severe lung infections. This has recently led ANSI/ASHRAE to publish its Standard 188, Legionellosis: Risk Management for Building Water Systems, which documents new risk standards and requirements for engineers that design new buildings and renovations to existing structures.

John Flaherty, president of Delta Cooling Towers, points out that the aforementioned standards and requirements do not significantly detail the maintenance practices necessary to keep water systems, such as cooling towers, healthy. He says that competent maintenance; consistent, top quality water treatment and accurate monitoring are essential to that effort.

“Without consistent, competent water treatment, the legionella risk is not completely eliminated, even with the new antimicrobial cooling tower,” Flaherty explains. “While cooling tower conditions are often managed by water treatment chemicals, such treatment is sometimes inadequate and poor piping designs, lead to ‘dead legs,’ creating an environment in which pathogens – including Legionella – can thrive.”

Flaherty adds that cooling tower design and materials can be very significant in the prevention of pathogen growth. Also, the best water treatments for Legionella prevention are oxidizing biocides which react aggressively toward metal surfaces, effectively attacking metal-clad cooling towers and shortening service life. However, because Delta’s cooling tower fills and shells are constructed of anti-microbial plastic, they are virtually impervious to corrosive water treatments and also minimize the risk of microbial growth. A 20-year factory warranty provides evidence of the durability of these HDPE cooling towers.

Patent # 5826398, 6073415

**MADE IN
THE USA**

The design of many cooling towers creates pockets where water may stagnate, another condition that can lead to microorganism development. The stagnant water areas are prime breeding grounds for Legionella to grow. To avoid such problems, Delta's cooling tower designs feature a sloped basin and/or basin sweeper system.

While other cooling tower manufacturers may market a tower with an anti-microbial fill (the medium over which the hot water is distributed as it is being cooled), no company other than Delta has engineered a cooling tower featuring both the fill and structural casing composed of anti-microbial material.

For more information, contact Delta Cooling Towers, Inc., 185 US HWY 206, Roxbury Twp., NJ 07836; Phone: 800-289.3358; Fax: 973.586.2243; E-mail: sales@deltacooling.com.

RegScan Country Monitor

Published monthly and authored by environmental lawyers, the RegScan Country Monitor covers the same topical areas (listed below) as our global legal registers and audit protocols. Our globetrotting experts re-view multiple sources for crucial regulatory developments, and provide clear analysis on what they REALLY mean for EH&S professionals.

Since the RegScan Country Monitor is fully integrated with the LookOut Alert service, subscribers can set up keyword-based queries by topic and jurisdiction - and have the change notifications pushed directly to their inboxes. Both final and proposed rules are covered.

Affordable subscription packages are currently available for 32 countries from every corner of the globe. To see a full list, please contact the sales team or visit www.regscan.com.

Scantek, Inc. is a worldwide leader in sound and vibration instrumentation sales, service, rental, and calibration. Scantek sells, services, and rents the finest products and provides expert support on their use. The Scantek Calibration Laboratory is accredited for microphones, calibrators, sound level meters, dosimeters, sound and vibration FFT, and real-time analyzers, preamplifiers and signal conditioners, accelerometers, velocity sensors, vibration meters, and vibration exciters. Scantek, Inc is a wholly owned subsidiary of Norsonic AS.

Industrial equipment supplier in Columbia, Maryland

Products that we Offer:

Accelerometers

Accelerometers

Prediction Software

Calculation Software

Noise Analysis and Reporting Software

Sound Limiters

Calibrators & Calibration System

Special Test Systems

Consulting

Scantek staff provides consulting in many aspects of acoustics, vibration, and instrumentation including:

- Applications of instruments
- Calibration issues
- Measurement methods development
- Training in basic, intermediate, and advanced acoustics and noise control
- Building acoustics including multi-family
- Outdoor noise propagation
- Industrial facilities

- Community noise measurements
- Expert witness testimony
- HVAC noise control
- Industrial noise measurement
- Noise prediction

Instrument Repair

Scantek is the North American Factory Authorized Service Center for RION, Norsonic, CESVA, and Castle Group. Personnel have been factory trained. We have all necessary test instruments to check voltage, frequency, and pressure to a high level of accuracy. We have many instrument repair manuals from a large group of manufacturers.

Scantek offers rental of sound level meters, FFT analyzers, tapping machines and noise monitoring equipment for acoustic and vibration measurement.

Emergency Safety Shower Decontamination Booth

When Time is of the Essence, after an exposure to a hazardous chemical substance, any delay, even for a few seconds, can result in serious injury. OSHA and ANSI require that Emergency Showers be located within 10 seconds walking distance from hazardous site location.

HEMCO Emergency Shower / Decontamination Booths are fully assembled and ready for installation to water supply and waste systems. The shower is molded one piece seamless of chemical resistant fiberglass and is equipped with a pull rod activated shower and push handle eye/face wash for immediately drenching of personnel that have been exposed to hazardous chemicals. Shower is equipped with frosted front strip curtains, interior grab bars, raised deck grating, and bottom or rear drain outlet. Compliant with A.N.S.I. and O.S.H.A. requirements.

www.EmergencyShowerBooths.com •

MICROFLOW III CLASS 1 DUCTLESS WORKSTATION

The MicroFlow III is a Class 1 ductless carbon filtered workstation equipped with Activated Carbon filtration ideal for fumes, odors, and non-hazardous chemical vapors. Dimensions are 24" wide X 20.75" high X 24" deep. Completely self contained with integral recessed work surface to contain spills. A convenient clear viewing sash surrounds the work area for user protection. Sash can be conformed for use with a microscope and is easily removable. Variable speed fan control allows for high speed 100f/m. air flow through the sash opening, or medium and low flow for sensitive operations. Typical applications include, sample weighing, general chemistry involving small volumes of common chemicals, individual work stations, tissue staining and processing, gluing & drying operations, solvent cleaning of electronic parts, soldering fumes and odors, school demonstration workstations, containment of forensic applications.

QUALITY CONTROL ROOM / CLEAN LAB

The ModuLab can achieve strict environmental control by incorporating HEPA filtration to regulate air quality ranging from Class 1,000 to 100,000. ModuLab can be used in conjunction with dust collectors to control room dust levels. Precise temperature control can be maintained with optional modified cooling systems for lower temperature requirements. Humidity can be regulated with desiccant systems available for lower humidity requirements. The ModuLab features chemical resistant modular construction and is flexible and durable. A variety of options include a wide selection of doors, lighting, plumbing, electrical and lab furniture systems that can be factory installed.

HEMCO ModuLab is a custom-designed room enclosure with control systems that meet a variety of environmental and class clean requirements. ModuLab is the ideal choice for industrial applications such as Powder Coating, Food Processing, Seed Production, Mining, and Bulk Solids Handling.

www.HEMCOcorp.com/modrms.html •

TOTAL CHEMICAL RESISTANT UNIFLOW SE AIRESTREAM FUME HOOD

UniFlow AireStream Fume Hoods are constructed entirely of chemical resistant, flame retardant, non-metallic composite resin materials and features an exclusive "Unitized" construction that does not require screws, bolts, rivets, or metallic hardware for assembly. The fume chamber is molded one piece seamless with all corners coved for easy cleaning and light reflectivity. This series of fume hoods is UL 1805 certified and is offered in 48", 60", 72" and 96" widths in either constant air volume or restricted bypass models.

The AireStream Fume Hood is a high performance fume hood that maximizes user protection and energy savings. This hood is equipped with a 36" high extended view height, exclusive vector slotted rear VaraFlow baffle system, aerodynamic sash lift with perforated air-sweep feature, and molded-in belled outlet collar for reduced airflow resistance. The lighting is a vapor proof LED strip fixture with a central switch, pre-wired to a single point junction box 115V /60Hz. Hood is shipped completely assembled and can include a wide selection of accessories that can be factory installed to meet your specific need. Work surfaces in a variety of materials and a choice of base cabinets including acid or flammable storage are optional as required.

Nixalite® of America Inc

Nixalite® the Company

Nixalite of America Inc is the leading manufacturer of effective and humane bird and animal control exclusion and dispersal products. Established in 1950, Nixalite is a third generation, family owned firm with over 150 years of combined experience in bird and animal control.

Nixalite® History

In the late 1940's, Charles B. Kaufmann patented and manufactured the first Nixalite bird control models and founded the Nixalite Company. Known as "porcupine wire" because of its prickly appearance, Nixalite spikes set the industry standards for product quality, reliability and superior design. Nixalite quality and reliability have captured the attention and loyalty of customers worldwide.

Nixalite® Today

Nixalite's executive and manufacturing facilities, located in East Moline, Illinois, are where high grade stainless steel wire and strip are turned into the world's finest bird and animal barriers. Call (888-624-1189) or E-mail (birdcontrol@nixalite.com) Nixalite for a free review of your pest bird or nuisance animal control problem. We are at your service.

Nixalite started in a humble garage back in 1950. Now, Nixalite of America Inc offers hundreds of effective and humane products for the exclusion or dispersal of pest birds and nuisance animals. These include the surface sanitizers and disinfectants needed to protect people and property from the ugly and unhealthy results of unchecked bird and animal infestations.

Nixalite® Products

Effective and reliable products for the humane control of and clean up after pest birds and animals.

- 6 Models of All Stainless Steel Bird Spikes
- 9 Types of Bird Exclusion Netting
- Full Bird Netting Accessories and Hardware
- All Stainless Steel Post & Wire Bird Deterrents
- Electrified Bird-Zap Track Deterrents
- Hyper-Spike Acoustic Bird & Animal Dispersal
- Bird & Animal Dispersal Systems
- Broad Spectrum Sanitizers & Disinfectants
- Surface & Area Odor Neutralizers
- Anti-Bacterial Soaps & Lotions For Work Crews

New Draw Bar Cover from Rockford Systems Prevents Injuries to Vertical Mill Operators, Helps in OSHA Compliance

Vertical mills are essential cutting tools in machine shops used to remove material from the surface of metal workpieces. However, these tools present serious danger when an operator comes into contact with their high-speed rotating draw bars, resulting in injuries and costly OSHA fines.

To bring needed safety to the shop floor, Rockford Systems, LLC., a premier provider of machine safeguarding products and services, has launched a new Milling Machine Draw Bar Cover (part #DBC001) to protect vertical mill workers from rotating shafts seven (7) feet or less from the floor or working platform. It guards the turning draw bar with a non-rotating, smooth, welded-steel enclosure, secured firmly to the mill with a powerful ring magnet and safety anchor chain. Simple to install, the draw bar cover prevents clothing, hair or hands from being grabbed by the moving shaft.

According to Jason Swisher, Rockford Systems Production Manager,

“Our new Draw Bar Cover features high-quality construction with smoothed welding seams and finished edges, designed to protect mill workers from hazardous rotating drawbars. It was engineered with input from machine makers and operators to ensure that it gets the job done right.”

This product can be used on any vertical mill that has up to a 7” extrusion. It compliments the full line of Rockford Systems milling machine guards, shields and controls that protect thousands of workers everyday around the world.

OSHA COMPLIANCE

Installation of the Draw Bar Cover helps machine shops comply with the OSHA 1910.219(c)(4)(i) safety standard that states: “*Projecting shaft ends shall present a smooth edge and end and shall not project more than one-half the diameter of the shaft unless guarded by non-rotating caps or safety sleeves.*”

Lack of machine guarding or improperly installed safeguarding equipment was one of the top ten most cited OSHA violations in 2015, resulting in millions of dollars in fines levied against businesses. Injuries, as a result of improperly safeguarded machines, also lead to higher insurance costs, lawsuits, and hospital expenses. Although safety equipment and proper machine controls are required by OSHA, many manufacturers sell machinery without either, leaving the business with the responsibility of safeguarding the machine

FREEZE PROTECTION

FOR DRY FIRE SPRINKLER SYSTEMS

M5400

Frozen auxiliary drains are the main cause of dry fire sprinkler system failures in the winter. This year stop replacing the auxiliary drains that freeze and break with auxiliary drains that freeze and break.

AGF's COLLECTANDRAIN® Model 5400 eliminates freeze-ups by providing a temperature controlled environment for the auxiliary drain increasing their capacity to collect condensation in the winter. Now is the time to install a Model 5400 so colder temperatures won't put your dry fire sprinkler system at risk.

W. L. Gore & Associates Introduces GORE® FR Apparel, the Next Generation of Flame-Resistant Foul-Weather Outerwear for Oil and Gas Workers

W. L. Gore & Associates, Inc., the company that created the category of waterproof, windproof, and breathable outerwear and reset the industry watermark for comfort and protection with GORE-TEX® Fabric, is now doing the same for oil and gas industrial workers with the introduction of GORE® FR Apparel products featuring GORE-TEX® PYRAD® Fabric – the most comfortable flame-resistant (FR), foul-weather outerwear available on the market.

NEW

Applicability Wizard

RegScanONE

One World, One Platform

Streamlined,
Simplified,
Legal Registers
& Audit Protocols

GORE® FR Apparel is a new line of FR foul weather outerwear products designed to meet the demanding needs of oil and gas workers. A jacket, bib, and detachable hood combination offers protection from incidental flame exposure and weather protection across a wide range of environmental conditions, while offering moisture management to improve comfort and safety. The durable, lightweight 2-layer ePTFE membrane construction also helps protect workers from exposure to hot liquids, steam common oilfield contaminants, and allows for easy care and cleaning.

Leveraging the same platform as GORE-TEX® Fabric and utilizing Gore's proprietary PYRAD® Fabric Technology, GORE® FR Apparel complies to ASTM F2733-09 and ASTM F1891-12 and adds retro-reflective properties that meet or exceed ANSI/ISEA 107-15 Class O, Type 1 and CSA Z96-15, Class 1, Level 2 offering HSE managers the confidence they need when selecting FR outerwear for their employees.

"Simply put, GORE® FR Apparel is a best-in-class line of foul-weather outerwear products that will deliver an unprecedented performance-to-value solution for our customers in the oil and gas markets," said Sean McDearmon, Market Development Champion for Gore. "A new performance benchmark has been established." For more information visit our website at www.goreprotectivefabrics.com/utilities or call 800.431.GORE (4673).

**under
THE INFLUENCE?** **Oral Fluid Testing Provides the Answer**

The legalization of marijuana is creating challenges for businesses and the ability to maintain the integrity of their "drug free" work programs. Workplaces need an alternative that can identify current or more recent use as an indicator of being "under the influence". As the market leader in oral fluid testing, Intercept leads the way in recent drug detection.

Intercept Oral Fluid Drug Testing

- Capture "Under the Influence" drug use
- Eliminate sample dilution and adulteration
- Increase efficiency and productivity
- Collect anytime, anywhere and...

Maintain the integrity of your drug free workplace program!

A Woman Owned Small Business

"From the simplest to the complex, Jesco does it best!"

DIAMOND WIRE MESH ENCLOSURES

Time tested diamond mesh partitions have been pre-engineered for easy installation, give an unrestricted view into the cage, total air circulation, low initial cost and maintenance. Send us the footprint of your project and allow our engineers to assist you on your next project!

SELF DUMPING HOPPERS - 50+ Sizes and Specials!

All welded self dumping hoppers are available in more than 50 different sizes that will fit to your application. All units are engineered to return to an upright position and have a positive locking latch. Safety retaining chain and trip rope assembly is standard on all our units. Open-sided, low profile, narrow, extra wide, and 10,000# capacity units are all within our product line. Casters available on standard units up to the 2½ cubic yard size.

WIRE MESH INFILL PANELS

We will custom fabricate these infill panels to meet your specific requirements. Just send us your specs!

Available in diamond, rectangular and square mesh, with or without standoffs. Frames available in 1" x ½" channel or with a hemmed edge. Other size framing materials and mesh are available, specify weld pattern and types of weld finish desired. Division 5,8 and 10.

EEZY STAK® Enclosures

2" x 1" Rectangular Mesh EEZY STAK® Enclosures are designed and engineered to save time and money on your project installation. Woven wire mesh panels welded into an angle frame; frames secured to the posts. No wire ties or unheard of specialty clips. Just nuts, bolts, and standard hand tools are required. Dark Gray painted panels allow for full visibility into enclosure.

Jesco Industries Inc. has grown to become one of the leading manufact
al handling equipment. We serve our customers very well by offering
of products which may be used from the processing department throu
ping department. A Woman Owned Small Business is WBE Ce*

urrent owner,
tures of materi-
a wide variety
ugh to the ship-
ertified.

JESCOHUSKYDUMPERS® available in over 60 different sizes and maintain stock of standard sizes over 800 standard units of self dumping hoppers (2000#, 4000# and 6000# capacities). We offer several large volume self dumping hoppers in 6 cubic, 8 cubic and 10 cubic yard 6,000-10,000 capacity. Special applications deserve a specially designed unit. After many customers inquiring about a controlled dump or hydraulic unit, we decided to engineer and add several different hydraulic units to the product line.

JESCOHYDRATILT™ Dumpers which are available in 4000# capacity in .50, .75, 1, 1.5, and 2 cubic yard. The units are operator controlled with the hydraulic system of your forklift and used while seated on the lift. These new units are ideal when controlling the speed of discharging material is critical. The quick-disconnect lines are included on each of the units and a safety retaining chain. To fill out the line even more we have included ten different sizes of our Filter Press Hopper. Then along came the 90 degree Side Pivot Hopper and Low Profile Portable Hoppers with casters already installed.

Wire Mesh Partitions: 2"x1" rectangular mesh 10 gauge wire welded into an angle frame system is easy to use and easy to install. Ideal for around your automation enclosures, prevent your valuable tools from walking away from the tool crib, and quality control on non-conforming material, computer rooms, high security storage and so many more uses. JescoPalletGards® are wire containment backs for the pallet racks with stand-off clips (1.25, 4, 6 or 8 inch) design to fit most standard drilled pallet racks spaced two inch on center. Double hinge doors or double slide doors is an excellent way to secure high value products on the shelves.

1-1/2" Diamond mesh 10 gauge wire partition system are engineered for easy installation allowing unrestricted visibility and total air circulation. Inventory of standard height panels of 7, 8 or 10 high are available; but don't stop there because many industries require partitions to reach the trusses or building joists and that certainly can be accomplished. If you are installing partition on a raised platform (mezzanine) remember this requires zero or "no" sweep to keep everyone safe walking below. This is to prevent tools from dropping from the edge of the platform. (OSHA 1910.23(e)(4) Either partition system will work well but the more project information you are able to supply, the more knowledgeable we all become and it is truly amazing how that works!

The JESCOGARD® industrial guard rail 3-rib corrugation system will act as both a visual and physical barrier around your facility. The Economy Rail System is a 2-rib system and has been tested to withstand an impact of 10,000# traveling 4-mph. Should the need arise you can count on its strength without compromising quality at a price you can afford. Each system has available a self-closing single hinge gate with a sound dampening gasket on the gate.

Industrial shelf carts, platform trucks die storage racks and material handling trucks are built tough to move raw stock, cartons or finished materials in your plant for many years to come. Special carts are no issue just let us know what you need.

JESCOHUSKYDUMPERS®, wire partition systems, industrial guard rail systems, wire tenant storage lockers, industrial shelf carts, LP cylinder cabinets, machine guarding just to name a small portion of the products we offer to our customers. Our products are built to be the best in the industry and it is the reason customers keep coming back. Your satisfaction for a project well done is what really counts when the day comes to a close. We look forward for an opportunity to be able to assist your next industrial guarding or material handling requirements. Check out the full product line shown on the website at www.jescoOnline.com
