About Safety Through Engineering

Safety Through Engineering, Inc. is a Structural and Safety Engineering, Expert Witness, Safety Training and Consulting firm with the reputation as a pioneer of innovative design and safety solutions. For over 35 years we have provided cutting-edge design services by expanding traditional engineering approaches.

At STE, we incorporate new concepts and technology throughout our projects with 3D BIM, finite element analysis, fabrication drawings and a plethora of services. Fueled by a forward thinking team, STE serves a superior client base with innovative industry solutions.

Why Choose Us

Uniquely qualified engineers, construction specialists, fall protection experts and advanced safety trainers, STE's team of professionals advocate solutions based on practical experience, emerging technology, customized education and specialized training.

The Glove That's a Cut Above

Brass Knuckle® SmartCut™ BKCR2403 marries ANSI Level 2 cut resistance with fine motor dexterity and tactile sensitivity

Demonstrating just how important appropriate hand protection is, the U.S. Bureau of Labor Statistics reports that 70% of workers who experience hand injuries are not wearing gloves. Matching the hazard to the proper level of protection is key. Equally important are protective gloves that are not only comfortable, but so dexterous that they make the task easier. Brass Knuckle® SmartCut™ BKCR2403 delivers for jobs that not only need cut and abrasion resistance, but still require a focus on long-wearing grip, dexterity, and flexibility.

This light-duty cut-resistant glove offers ANSI Cut Resistance Level 2 protection balanced with extreme dexterity for tasks calling for very fine motor skills and tactile sensitivity. Its composite yarn includes a blend of high-strength filament fibers for unbeatable cut resistance, upwound with nylon and spandex to create

STAIRMASTER®

Of Safety Barriers & Guarding Products

push-the-button, set-the-gauge,
or pick-up-the-nail dexterity.
The 18-gauge HPPE (high
performance polyethylene) and
glass-fiber shell is lightweight
and provides the ANSI cut level
2 protection. A black polyure-
thane palm coating delivers
reliable abrasion protection and
enhanced grip.

The thinner yarn composition
allows for smaller and more
stitches per inch and is more
flexible, lightweight, and comfortable than other cut-resis-
tant options. The flat polyurethane palm coating provides
nimble handling ability on dry surfaces.

SmartCut™ BKCR2403 gloves are versatile enough to be
used for light-duty job functions in diverse industries such
as construction, electrical and general assembly, glass
handling, HVAC, landscaping, manufacturing, metal fabri-
cation, tiling, and even vehicle detailing.

About Brass Knuckle

*Brass Knuckle® grew out of a partnership with one of North
America's oldest dedicated safety product supply companies.
From product inception to quality control, we manage every
aspect of product development to ensure ergonomics, protec-
tion, and cost efficiency, maximizing compliance and safety.
Brass Knuckle is a member of the Volk Enterprises family of
companies, whose international strategic alliances with docu-
mented professional supply partners allow for a full range of
safety products, programs, and services to clients across the
globe. For more information, contact Brass Knuckle® Safety
Products, 1335 Ridgeland Parkway, Suite 120, Alpharetta, GA

The Concrete Safety Solution

Often overlooked as a dangerous job, concrete truck drivers risk their lives at every assignment. With blind spots, difficult drop-off sites, and multiple personnel in the surrounding area; there is a multitude of obstacles and worriment to overcome.

However, truckers should rest assured that there is technology out there that is specifically designed to assist with these hurtles. Safety Vision, LLC is dedicated to creating mobile surveillance systems that mitigate hindrances in the industry; and with their complete concrete mixer solution, the support needed is embedded in the truck.

Observer 4401™ HVR

<http://www.safetyvision.com/products/observer-4401-hvr>

Serving as the foundation of the solution, the Observer 4401 Hybrid Video Recorder (HVR) collects and retains all the vehicle's information, including the metadata and video footage. Equipped with two SD card slots, it can hold up to 512 GB of video, which is a substantial amount and vital to enforcing the most effective and safe operations.

By reviewing the array of recorded video, businesses can learn which practices need improvement, as well as which ones are favorable. These insights can then be shared with the truckers in order to improve their overall operational awareness. Moreover, businesses are empowered to turn these recordings into first-hand training videos for all established and new employees. This ensures that all personnel are knowledgeable and up to date about how to best follow their practices.

SV-EXTCAM HD

<http://www.safetyvision.com/products/sv-extcam-hd>

By placing multiple cameras on the truck's exterior, the entire surrounding area is captured; making it easier for drivers to focus on the given task at hand. When the cameras act as the second pair of eyes for the vehicle, the trucker can devote their attention to their route and/or dropping off the concrete.

Additionally, exterior cameras provide protection against false claims. When the incident is captured on video, the "he said/she said" aspect is diminished, since all evidence is observed by the cameras.

CP4™ Monitor

<http://www.safetyvision.com/products/cp4>

The CP4 monitor completes the solution, which allows the driver to see through the camera's lens in real-time. With multiple split screen views, the monitor is able to play 9 cameras at once: whether they be

jescoHYDRATILT™ DUMPERS

HYDRAULICALLY CONTROLLED HOPPERS

These units are ideal where control of the quantity of material dumped or the rate of discharge is critical. They operate off the hydraulic system of your forklift and come complete with male quick-disconnect hoses for easy attachment to the forklift.

jescoGARD®

PROTECTIVE GUARD RAILING

These versatile guards act as both a visual and physical barrier to help protect people and property such as aisles, docks, conveyors and other equipment. Bolted rails are designed and tested to stop a 10,000 lbs load impacting at 4 mph from breaking through. Lift-out rails shown. All hardware is included.

Call 800-529-6697

PO Box 388 Litchfield, MI 49252-0388

placed internally or externally. This product truly allows the driver to focus on the task by managing distractions: they no longer have to attempt to maintain complete visibility on the road, their surroundings, and the drop-off; they have a second pair of eyes right there with them.

Utilizing the monitor not only enhances visibility for the surrounding area, but also establishes a better view of the drop-off area. Drivers can rest assured that they are completing it in an optimal and efficient manner because their drop-off is on the screen in front of them. Safety is guaranteed.

While concrete truckers face many difficulties while on the road or at drop-off sites, Safety Vision's complete concrete surveillance solution offers that helping hand needed to ensure safety on the job. By using the system, truckers gain confidence in every facet of their job by depending on their surveillance system for security.

LADDER COMPLIANCE MADE EASY

LAD-TOP SECURES YOUR FIXED LADDERS KEEPING YOUR WORKERS SAFE FROM FALL

LAD-TOP® was designed with one thing in mind: worker safety. OSHA's Walking Working Surfaces Standard 1910.27 now requires all new fixed ladders over 24 feet to have a ladder safety system in place. We had safety on the mind long before it became a requirement.

EASY INSTALLATION

LAD-TOP® is self-supporting making it simple to install. Four standard bolts + five minutes and you are done!

INDUSTRY LEADING CORROSION PROTECTION

LAD-TOP® offers you up to 2.5x corrosion protection with a Duplex coating of hot dip galvanized and powder coated paint of your choosing.

BUILT TO A HIGHER STANDARD

There is no standard when it comes to protecting your employees. Our products are built to surpass the minimum standard and are some of the only products designed and tested to comply with OSHA and ANSI Z359.18-2017 standard.

INTERCHANGEABLE SRL

LAD-TOP® is interchangeable with your existing self-retracting lifelines. The product will work with SRLs you already own. You are not limited to where you choose to source them.

FITS YOUR EXISTING HARDWARE

Two LAD-TOP® options are available: one for front ladder exit and one for side ladder exit.

AFFORDABLE USA QUALITY

LAD-TOP® is 100% sourced and assembled in the USA. Ask us about volume discounts!

FALL PROTECTION AT ITS BEST

Contact us today to learn more about LAD-TOP® and how to order for your facility!

Appleton PowerTite Plugs, Receptacles and Connectors Deliver Reliable, Safe Power to Equipment in Wet Locations

Industrial areas often require weatherproof plugs, receptacles and connectors to reliably supply power to equipment so that production can be maintained without costly downtime. To help plant managers meet this challenge, Emerson offers its Appleton Powertite Series of pin-and-sleeve plugs, receptacles and connectors that provide fast, uncomplicated field assembly, superior reliability, and improved worker safety.

Available in 30, 60, 100, 200 and 400 Amp units, the Appleton Powertite Series supplies power to all types of heavy-duty electrical equipment, fixed or portable, including welders, pumps, compressors, motor generators and power transfer switch cabinets.

Carrying a NEMA 4X rating, these weatherproof products excel in wet, corrosive areas where they can be installed with confidence in “ship to shore” applications, loading docks and ports, land-based drilling rigs, cellular relay stations, and sewage pump and lift stations. Durable copper-free aluminum construction featuring an epoxy powder coat fin-

ish assures long-term protection against damaging chemicals, water, dust, and debris. In addition, the contacts exert constant pressure along the entire contact surface to provide unmatched electrical continuity.

To keep operations going and electricians safe while installing and servicing Powertite pin-and-sleeve plugs, receptacles and connectors, Appleton has incorporated features that include:

- Energized contacts that are deeply recessed inside the terminal block to reduce danger of accidental touching and minimize possibility of exposed arcs
- Positive polarization so that only plugs and receptacles of the same style, number of poles, and Amperage rating can be used together
- Style 2 plugs, receptacles, and connectors provide a ground through shell, plus an extra pole, so that grounding pole “makes first, breaks last”

The advertisement for Jesco Industries, Inc. features a blue and white background with a grid of images showing various electrical products. The top left corner displays the 'jesco' logo in green, with 'Since 1932' and a registered trademark symbol. To the right, the company's address is listed: 'Jesco Industries, Inc., 950 Anderson Rd PO Box 388, Litchfield, MI 49252-0388'. Below the address, there are four images: a metal enclosure, a yellow metal rack, a yellow metal frame, and a yellow metal rack with a green door. To the right of these images is a 'ProGMA' logo with the text 'PROTECTIVE GUARDING MARKET ASSOCIATES' and 'Safer by Design'. Below the 'ProGMA' logo is a red circular seal that says 'Jesco does it best!'. At the bottom of the advertisement, the text 'Visit JescoOnline.com' and 'Call 800-529-6697' is displayed in large, bold letters.

- 30 through 150 Amperage receptacles include a screw and flip cover for NEMA 3, 3R and 4, 4X applications at no additional charge

- Plug and connectors include a variety of grommets with many cable diameters providing ultimate application flexibility.

It's not always romantic...

Make sure your power equipment is fully operational.

With over 35 years experience, Cadick Corporation uses state-of-the-art software and standards of IEEE, ANSI, NFPA, and other applicable industry regulations to develop customized engineering studies for your facility.

- Extensive analysis & reporting
- Fabrication & installation
- Comprehensive electrical safety audits
- Engineering studies
- Electrical safety services
- Training

The benefits of using Cadick engineering services include:

- Safe and efficient operation of the electric power system
- Reduced fees and fines incurred due to poor power factor or other such problems
- Reduced power bills
- Compliance with regulatory standards such as OSHA and NEC
- Protective device settings that provide the most optimal mix of properly rated & calibrated protective equipment
- Enhanced safety of personnel for arcing events
