It's not always romantic...

Make sure your power equipment is fully operational.

With over 35 years experience, Cadick Corporation uses state-of-the-art software and standards of IEEE, ANSI, NFPA, and other applicable industry regulations to develop customized engineering studies for your facility.

- Extensive analysis & reporting
- Fabrication & installation
- Comprehensive electrical safety audits
- Engineering studies
- Electrical safety services
- Training

The benefits of using Cadick engineering services include:

- Safe and efficient operation of the electric power system
- Reduced fees and fines incurred due to poor power factor or other such problems
- Reduced power bills
- Compliance with regulatory standards such as OSHA and NEC
- Protective device settings that provide the most optimal mix of properly rated & calibrated protective equipment
- Enhanced safety of personnel for arcing events

Call 800-931-8573 or visit
cadickcorp.com for more information.

UniFirst

UniFirst Earns 2021 OH&S Award for Armorex FR Enhanced Visibility Safety Coveralls

UniFirst Corporation, a North American leader in providing customized work uniform programs, corporate attire, and facility service products for businesses, was recently awarded Occupational Health & Safety's 2021 Platinum Industrial Hygiene Award in the Protective Clothing category for their Armorex FR® (Flame Resistant) Enhanced Visibility Coveralls.

The Occupational Health & Safety (OH&S) Industrial Hygiene Awards honor outstanding product development achievements of health and safety manufacturers. These renowned products or services are considered particularly noteworthy not only for their ability to keep customers safe and protected, but also for their ability to improve industrial hygiene. An independent panel of expert judges carefully reviewed and scored each entry, with the judges' combined scores determining the winners of each category.

"UniFirst is honored to be recognized for our workwear safety line of Armorex FR Enhanced Visibility Coveralls," said Adam Soreff, director of marketing and communications for UniFirst. "As part of our commitment to our customers and uniform wearers, we're continually striving to offer garments that are comfortable, functional, and help keep workers safe on the job. These uniform coveralls offer all these attributes and have emerged as one of our more popular offerings."

Armorex FR Enhanced Visibility Coveralls from UniFirst provide workers with top-quality, two-way safety protection in both hazardous (flame risk) and low-light work environments. These innovative coveralls protect from both flash fire and arc flash with an Arc Thermal Performance Value (ATPV) of 8.7 – a notch ahead of some standard FR garments that are sold in retail stores. They also provide 360-degree, enhanced visibility

with 2" silver retroreflective 3M taping around the sleeves and legs, increasing worker visibility on low- and no-light worksites.

In addition to their protective qualities, Armorex FR Enhanced Visibility Coveralls employ a number of features for both comfort and convenience, as well as safety. Manufactured with patented UltraSoft flame resistant fabric for enhanced wear life and protective performance, these coveralls come complete with a deep "action back" that helps to increase the wearer's range of motion, and are equipped with pass-throughs on each side for easy access to inner clothing.

When included with UniFirst rental services, these safety coveralls are cleaned and maintained on a regular schedule in accordance with the company's highly valued hygienic laundering standards – providing measures of safety, security, and peace of mind to anyone who wears or provides them.

Due to an ever-increasing need for top-quality industrial hygiene information and a lack of in-person opportunities, OH&S premiered its Industrial Hygiene Virtual Summit last year. To kick off 2021, OH&S launched the Industrial Hygiene Awards, providing an additional opportunity to spread the news about industrial hygiene.

"This contest is just one of the many ways we have highlighted outstanding industrial hygiene products," said OH&S Editor Sydney Shepard. "It is our hope in these continuously trying times that the Industrial Hygiene Awards will bring more information, awareness and safety to employers and employees."

Eliminate VOCs and Odor at Your Asphalt Plant

Blue Smoke Control, a division of Anaheim, California-based Butler-Justice Inc., introduces X-VOCS™, the company's newest system for eradicating odor-causing emissions produced as a byproduct during hot-mix asphalt production. Invisible emissions from plants — specifically, the odor-causing volatile organic compounds (VOCs) that reside in hot asphalt storage tanks — can create a number of challenges for producers, ranging from regulatory requirements to overt opposition from neighbors. The X-VOCS System features proprietary carbon absorption technology designed to filter and remove up to 99 percent of odors and VOCs, such as Hydrogen Sulfide (H₂S), from tanks. X-VOCS incorporates a five-stage filtration system. In the first three stages, a series of filters remove more than 95 percent of targeted particulates down to 0.3 microns. In the final two stages, carbon filtration beds remove remaining odors and volatiles. The X-VOCS system is ideal for new plants, and also is easily retrofittable into existing operations, with minimal modifications to the plant.

Further, when the X-VOCS technology is coupled with the company's Blue Smoke Control system, emissions from hot-mix plants can be reduced to nearly zero, providing owners with the means to achieve the highest level of environmental stewardship. Implementation of this technology has been proven to virtually end calls from nearby neighbors regarding odor and visual emissions. Similar to X-VOCS, the Blue Smoke Control

system is retrofittable with few plant modifications.

According to Mike Butler, president of Butler-Justice, "We worked for many years to solve the odor and VOC issues associated with asphalt production. The patent-pending technology of X-VOCs can stand on its own, but it also combines well with our industry-standard Blue Smoke Control system to reduce both odor and blue smoke, which are some of the most common causes of neighborhood and Air Quality Board issues."

Blue Smoke Control division of Butler-Justice Inc. is a leading supplier of complete blue smoke control and odor control systems that eliminate both the blue haze typically found during the production of hot mix asphalt, as well as odor-causing VOCs. With hundreds of successful installations in the continental United States and Hawaii, as well as Canada, Mexico, Australia, and Europe, Blue Smoke Control achieves the highest standards of emissions control, with reasonable initial investment costs and economical ongoing expenses. For more information, contact Butler-Justice Inc., 5594 E. La Palma Ave., Anaheim, CA, USA 92807; telephone (714) 696-7599; email: mikeb@butlerjustice.com; or visit its website at www.bluesmokecontrol.com •

LADDER COMPLIANCE MADE EASY

LAD-TOP SECURES YOUR FIXED LADDERS KEEPING YOUR WORKERS SAFE FROM FALL

LAD-TOP® was designed with one thing in mind: worker safety. OSHA's Walking Working Surfaces Standard 1910.27 now requires all new fixed ladders over 24 feet to have a ladder safety system in place. We had safety on the mind long before it became a requirement.

EASY INSTALLATION

LAD-TOP® is self-supporting making it simple to install. Four standard bolts + five minutes and you are done!

INDUSTRY LEADING CORROSION PROTECTION

LAD-TOP® offers you up to 2.5x corrosion protection with a Duplex coating of hot dip galvanized and powder coated paint of your choosing.

BUILT TO A HIGHER STANDARD

There is no standard when it comes to protecting your employees. Our products are built to surpass the minimum standard and are some of the only products designed and tested to comply with OSHA and ANSI Z359.18-2017 standard.

INTERCHANGEABLE SRL

LAD-TOP® is interchangeable with your existing self-retracting lifelines. The product will work with SRLs you already own. You are not limited to where you choose to source them.

FITS YOUR EXISTING HARDWARE

Two LAD-TOP® options are available: one for front ladder exit and one for side ladder exit.

AFFORDABLE USA QUALITY

LAD-TOP® is 100% sourced and assembled in the USA. Ask us about volume discounts!

FALL PROTECTION AT ITS BEST

Contact us today to learn more about LAD-TOP® and how to order for your facility!

UniFirst Introduces iQ Series FR Workwear: Ultra-Light Flame Resistant Uniforms for At-Risk Workers

UniFirst Corporation, a North American leader in the supply and servicing of uniforms, workwear, and facility service products, is proud to announce the addition of the revolutionary, Bulwark® iQ Series® of safety apparel to an already robust core uniform service offering of flame resistant (FR) and high visibility personal protective equipment (PPE).

In partnership with Bulwark, a brand of VF Corporation, UniFirst is now offering business customers a selection of Bulwark iQ Series FR work shirts, pants, coveralls, and more. This innovative collection contains National Fire Protection Association (NFPA) Category 2, 2112-compliant arc-rated safety garments that are revolutionizing the FR industry by addressing long-standing issues of garment weight, breathability, and comfort that are often commonplace when wearing more traditional FR protective workwear in warmer climates.

Billed as FR apparel that “breaks the comfort barrier without compromising your level of protection,” the iQ Series from UniFirst represents an entirely new way of FR thinking:

- Innovative woven shirts and coveralls with new TenCate EVOLV™, an ultra-lightweight, comfortable 5.5 oz./yd. blended FR fabric with Nomex® by DuPont®.
- iQ Series work shirts and coveralls with 360° enhanced visibility striping for workers in low-/no-light environments.
- Endurance work pants featuring advanced Westex G2™ fabrics by Milliken, “where comfort meets functionality.”

iQ Series FR products are exclusive to Bulwark and are redefining how FR garments look, feel, breathe, and perform. In industries such as oil and gas, electric utilities, drilling and welling, and others where potential flame risk hazards exist, FR uniforms and other PPE can often make a difference in helping to protect wearers from debilitating burns, blindness, dismemberment, and even death. Depending on the wearer’s industry and line of work, any number of hazards may be

Safety Awareness and Knowledge

The two most valuable tools on any job.

The need for qualified workers and skilled labor has never been so strong. Whether you are looking to onboard and train new workers or enhance and expand the valued skills of experienced workers, quality training is the foundation that promotes safety and production efficiency.

If your goals are to centralize, standardize, or enhance your training, let us share our expertise to help you build a custom training solution...using your content or ours!

atp Learning
Solutions

ATP Learning Solutions is a division of The ATP Group, Inc.

encountered on the job: from arc flash, flash fire, and combustible dust risks to extreme weather and high heat conditions, to low- or no-light environments, and more.

Contending with heavier, motion-restricting, non-breathable workwear can add unnecessary layers of complication to already hazardous situations. The iQ Series is designed with the latest-generation technologies to help combat industry-specific hazards, all in a highly functional, breathable, lightweight construction that enables workers to focus on their work and not on their workwear.

“We’re excited to be expanding our offering of FR protective workwear with such a highly regarded, sought out, and forward-thinking line of safety apparel as the Bulwark iQ Series,” said Adam Soreff, UniFirst’s director of marketing and communications. “For years, we’ve heard concerns from Category 2 FR wearers in warmer environments that their workwear was heavy, uncomfortable, and simply not breathable. The new iQ Series answers the call with very lightweight, breathable construction along with protective properties that are changing how people think about FR apparel.”

Available via UniFirst rental services, the Bulwark iQ Series of FR shirts, pants, and coveralls can be tailored specifically to each employee’s job function. And with regularly scheduled uniform services, all items are picked up, delivered, hygienically laundered, repaired, and replaced as needed, ensuring that all employees are never left without the proper on-the-job protection they require and deserve.

For more information on the iQ Series, PPE, FR garments, high visibility workwear, and UniFirst’s rental uniform rental services, please visit www.UniFirst.com •

JLG Launches “Access Your World” Experience

JLG Industries, Inc., an Oshkosh Corporation company and leading global manufacturer of mobile elevating work platforms (MEWPs) and telehandlers, announces the launch of “Access Your World,” an on-demand digital experience that showcases how JLG is Elevating Access in the areas of productivity, safety and technology through virtual job sites. The virtual job sites feature JLG® products and services across multiple applications and stages of construction.

“Customer interaction has changed in the wake of COVID-19, driving us to think differently about our approach to marketing,” says Jennifer Stiansen, director of marketing, JLG. “‘Access Your World’ is a unique, customer-focused virtual experience that allows visitors to explore and consume information about JLG products, services and technologies, however and wherever they prefer.”

In addition to featuring virtual job sites, the “Access Your World” event offers equipment owners and end-users the opportunity to view virtual walk-around videos, download product information and apps, view 3D hydraulic schematics, order parts, sign up for training, schedule meetings and ask questions of JLG experts, offering a healthy mix of virtual and “person-to-person” interaction.

Experience participants can also access resources, such as JLG’s #DirectAccess, JLG Financial, JLG Gear and the JLG dealer locator, from within the environment.

This highly interactive and dynamic experience will evolve over the next six months to include additional job sites that feature a variety of products and content for users to explore.

“This virtual environment was not designed to be a stop-and-go solution; rather, a start-and-grow experience that provides visitors the flexibility to attend, navigate and absorb content at any time, from anywhere, at their own pace,”
