PROTECTIVE GUARD RAILING

These versatile guards act as both a visual and physical barrier to help protect people and property such as aisles, docks, conveyors and other equipment. Bolted rails are designed and tested to stop a 10,000 lbs load impacting at 4 mph from breaking through. Lift-out rails shown. All hardware is included.

Improving Construction Safety, One Video Frame at a Time

Mikrotron Camera Analysis of Fall Arrest Systems Helps Prevent Construction Industry Injuries

Falls are the leading cause of death in the construction industry, averaging about 300 fatalities annually in the United States alone. To protect these workers, fall arrest systems are required where the risk of falling cannot be entirely eliminated by other safety measures.

Fall arrest systems come in a variety of designs and are subject to rigorous performance testing. To investigate the effectiveness of different system designs, the Professional Association Institute for Occupational Safety (Berufsgenossenschaftliches Institut für Arbeitssicherheit) near Bonn, Germany, recently conducted a study using anthropomorphic dummies that revealed potential failings in several safety harnesses during a simulated fall arrest. These dangers concerned mainly shoulder straps slipping, along with sternal and dorsal attachments causing injury. The behavior of the harnesses during fall arrest depends significantly on their construction, especially on the arrangement of straps and attachment buckles.

Falls of the anthropomorphic dummy and the behavior of the harnesses during fall arrest were recorded using a Mikrotron Cube 7 Motion-BLITZ EoSens® camera set to 1024 x 1024 pixel resolution at 1410 frames-per-second. Its Dynamic Range Adjustment feature allowed research

ers to dynamically adjust the camera's CMOS sensor for higher contrast scenes. Recorded material was then analyzed using TemaMotion Starter II image identification technology to determine the motion, speed and acceleration of selected points in sequences of frames.

Analysis of fall arrest recordings did reveal instances of the sternal attachment impacting the dummy's face. Pressure was exerted on the dummy's neck and head as a result of the dorsal D-ring sliding upward along the shoulder straps. In some models of harnesses, the steel buckle traveled along the shoulder straps causing the straps to tighten around the dummy's neck and head, and potentially injuring the face area.

The majority of safety harness tests are conducted following the methods stipulated in international safety standards calling for the use of a rigid torso dummy, instead of an anthropomorphic dummy which more closely simulates human response. The researchers at Berufsgenossenschaftliches Institut

First there was 4 square...
and now the **REVOLUTIONARY 5 Square® Box!!**

You've struggled with 4 Square boxes for years - you know how small, cramped and time consuming they are. Finally, there is a solution that allows you the space you have always needed.

The **5 Square®** Boxes (5" x 5" x 2-7/8") provide up to 88 in³ of interior volume which more than doubles that of most existing boxes on the market.

Create a robust and unrivaled infrastructure for the life of your facility with the **5 Square®** Products!

Fire Signal

- TWICE THE VOLUME AS MOST BOXES

für Arbeitssicherheit believe that the rigid torso dummy is insufficient for a comprehensive evaluation of harness performance and their safety parameters. Considering the significance of the results obtained, the researchers expect to continue testing for other dummy positions, such as head down, head inclined sideways and positions causing rotation, using the Mikrotron camera. The study of such cases will allow the development of better criteria for assessing safety harnesses and improving their overall design.

About Mikrotron GmbH

Mikrotron GmbH, established in 1976 and located just outside Munich, Germany, provides a full range of high-end imaging solutions for challenging applications in industry, engineering, science and sports. The company designs, produces, and commercializes high-speed and high-resolution cameras, image recording cameras and systems, software and image processing components. Mikrotron's slow-motion recording enables customers to optimize manufacturing processes, improve product design, revolutionize quality management and analyze motion. Mikrotron is ISO:9001 certified. Mikrotron is operated as a business unit of Lakesight Technologies, and is part of TKH Group NV.

Eriez® Oil Belt Skimmers Now Available with Special Belts for High Temperature Parts Washing Applications

Eriez® Surface Oil Belt Skimmers feature an oleophilic (oil attracting) belt that hangs into the sump where it removes free-floating tramp oils. Two models and four belt options--including a special belt for high temperature parts washing applications--are now available.

The Oil Skimmer squeezes oil between rollers, a method of stripping the oil from the belt that does not require scraping. This skimmer is designed for use on large machine tools with tanks deeper than two feet. The Oil Skimmer Jr. is designed for machine tools with shallow tanks.

Both the Oil Skimmer and Oil Skimmer Jr. models can be equipped with a timer, so the unit runs only when the machine is idle and tramp oils have risen to the surface. "For added convenience, the Oil Skimmer Jr. now comes with a magnetic mount," says Eriez Fluid Recycling Product Manager Ron Wendt.

Eriez has offered the Oil Skimmer and Oil Skimmer Jr. for more than two decades. Wendt reports the company has sold thousands of standard units and tens of thousands of the Jr. design. "Customers keep using them for a very long time and just replace the belts when they wear out," Wendt explains.

For more information about the Oil Skimmer, Oil Skimmer Jr. and additional tramp oil removal solutions from Eriez, visit <http://erieznews.com/nr560>.

Eriez is recognized as the world authority in separation technologies. The company's magnetic separation, metal detection, material handling, fluid recycling and advanced flotation technologies have application in the mining, processing, packaging, food, recycling, aggregate, plastics and metalworking industries. Eriez designs, manufactures and markets these products through 13 international subsidiaries located on six continents. For more information, visit www.eriez.com or contact Eriez Headquarters, 2200 Asbury Road, Erie, PA 16506 USA at +1 814 835-6000 or eriez@eriez.com.

In the past weeks, the corona virus has devastated numerous schools around the country. Some schools have already closed their doors due to local outbreaks, while others are implementing new sanitation protocols to curb infection rates.

Students, as well as faculty members and parents are all prone to getting sick in schools without sanitation measures, such as installing Larson Electronics UV air purifiers in rooms and using UV sanitation carts between classes.

These powerful cleaning devices not only eliminate the corona virus, but are also effective against other types of harmful microbes that cause seasonal allergies and the flu!

It's not always romantic...

Make sure your power equipment is fully operational.

With over 35 years experience, Cadick Corporation uses state-of-the-art software and standards of IEEE, ANSI, NFPA, and other applicable industry regulations to develop customized engineering studies for your facility.

- Extensive analysis & reporting
- Fabrication & installation
- Comprehensive electrical safety audits
- Engineering studies
- Electrical safety services
- Training

The benefits of using Cadick engineering services include:

- Safe and efficient operation of the electric power system
- Reduced fees and fines incurred due to poor power factor or other such problems
- Reduced power bills
- Compliance with regulatory standards such as OSHA and NEC
- Protective device settings that provide the most optimal mix of properly rated & calibrated protective equipment
- Enhanced safety of personnel for arcing events

Call 800-931-8573 or visit
cadickcorp.com for more information.

WE HAVE THE ROPE TO GET THE JOB DONE.

BUCCANEER
rope company
Providing strength & stability, with a twist.

Our UV sanitation systems work by targeting viruses and microorganisms directly where they lurk: in the air and on surfaces.

Larson Electronics UV air purifiers (IND-AH series) continuously clean the air from the upper sections of rooms. Suitable for occupied areas, the units feature UV 254 nm lamps inside an enclosed chamber, which prevents UV exposure.

Next, our UV disinfection carts (IND-CD series) are capable of sanitizing surfaces inside classrooms, eating areas, faculty rooms, hallways and gyms. Equipped with wheels, the units feature 360 degrees of coverage for thorough cleaning.

Sanitation with Larson Electronics UV disinfection systems does not require contact with dirty surfaces or application of liquid cleaners. This makes the cleaning process safer and helps preserve school equipment.

Looking for complete, no-contact sanitation solutions? We have the largest, industry-leading UVC and far UV sanitation catalog in the world. Check out our UVC and far UV sanitation catalogs for more information.

#1 IN DURABILITY

Portable Electrostatic Sprayers

Problem: You need an effective way to sanitize your business facilities thoroughly and quickly, to prevent the spread of the corona virus or other disease-causing microbes.

Initially, you tried wiping down the area at the end of every work day – but the process is extremely time consuming. Getting around bulky machines, equipment, furniture and dividers is no easy task!

Solution: Use the Larson Electronics portable electrostatic sprayer to sanitize buildings and rooms easily, without coming in contact with dirty surfaces.

Why: Portable electrostatic sprayers work by releasing a charged mist into the area. The mist contains sanitizing properties that “wrap” around contaminated surfaces or equipment. Compared to abrasive liquid cleaners, this solution is non-corrosive and can be applied from a safe distance.

Larson Electronics portable electrostatic sprayers are battery powered, allowing individuals to clean hard-to-reach sections of the building. Our cordless unit with a 4.22-gallon tank can cover up to 40 acres per charge (five acres per hour).

Applications: Portable electrostatic sprayers are recommended for industrial facilities, commercial areas, restaurants, offices, schools, public transit areas and more!
