AGF Introduces Ultimate RISERPACK® Kits

Butterfly Control Valve and Check Valve Kits for Floor Control Assemblies

AGF Manufacturing is excited to introduce its new Ultimate RISERPACK Kits. These floor control add-on kits are available for AGF's commercial steel RISERPACK models 8000, 8011, and 8611. Choose from three Ultimate Kit options. Add a gear-operated slow close butterfly valve with tamper switch, check valve, or both butterfly valve and check valve. With the addition of an Ultimate Kit, the Ultimate RISERPACK is a complete floor control assembly that saves time and money on system installations.

AGF's RISERPACKs are compact, fully assembled risers. Models 8000, 8011, and 8611 meet NFPA 13 requirements for wet pipe fire sprinkler systems. They feature a TESTANDRAIN Model 2500 or 2511A for system testing and draining. NFPA 13 standards require the addition of a pressure relief valve on all wet systems. All model 8011 and 8611 RISERPACKs include AGF's Model 7000L pressure relief valve. The Model 7000L has a lock-out feature that facilitates hydrostatic testing without removing the relief valve from the system to help save valuable installation time.

The Ultimate Kit comes in three options: BFV kit which includes a gear operated butterfly control valve with tamper, CKV kit which includes a check valve, or BFVCKV kit which includes a butterfly control valve and check valve. Each Ultimate Kit comes pre-assembled on 2", 2½", 3" and 4" RISERPACKs; 6" and 8" kits come semi-assembled for ease of installation due to weight. All kit components can be repositioned in the field to accommodate installation location positioning requirements. Install Ultimate RISERPACK models vertically or horizontally. All kit components can be replaced by off-the-shelf parts and are easily retrofitted back onto the system. To learn more about the Ultimate RISERPACK kits, visit www.agfmfg.com •

SAFETY MONTH

JLG Supports National Safety Month on #DirectAccess

JLG Industries, Inc., an Oshkosh Corporation company [NYSE:OSK] and a leading global manufacturer of mobile elevating work platforms (MEWPs) and telehandlers, supports National Safety Month in June with new job site safety information on its #DirectAccess blog. Hosted by the National Safety Council (NSC), this year's National Safety Month focuses on four key themes: 1) Musculoskeletal Disorders, 2) Workplace Impairment, 3) Injury Prevention and 4) Slips, Trips and Falls. Content now available on #DirectAccess addresses these themes. Brand-new safety-related posts will be published throughout the month.

"With the construction industry entering its busiest season, the timing of National Safety Month

couldn't be better,” said Jennifer Stiansen, director of marketing for JLG. “It serves as a great reminder for companies to prioritize safety. JLG urges its customers to create a strong culture of safety and offers a wide range of resource materials to help companies institutionalize safe practices.”

#DirectAccess is categorized by topic, offering content on a wide variety of subjects, including safety, training, product development, technology, parts, service and product support. New content is published weekly on #DirectAccess, supplementing the library of content that has been created since the site's launch in early 2018. Information is available on-demand from any device.

National Safety Month is held annually, advocating for companies and employees to take action to eliminate the leading causes of preventable injuries and deaths. In preparation for National Safety Month, recent safety-related posts on #DirectAccess have included:

- Reduce Fatigue & Muscle Strain with Safety Checks
- Tips to Avoid Trip & Fall Hazards
- Tips to Prevent Tip-Overs
- Protect Lone Workers on Job Sites
- How to Reduce the Hidden Costs of Ladders

Upcoming topics will highlight insights on how safety consciousness drives job site innovation, important details about the current aerial industry standards and information about specific machine alerts that operators need to know before working at height.

“As we observe National Safety Month, we encourage every company and its employees to do their part to promote safety on the job, so that personnel can return home safely each day,” finishes Stiansen.

New Gear Keeper Anchored/Personal $\frac{3}{4}$ inch Tool Tether ANSI-Compliant Super Coil Tool Tether Reduces Arm Strain

ANSI compliant $\frac{3}{4}$ " TL1-3044 Super Coil Tether features a fixed loop end, aluminum double action locking carabiner with a captive eye and a 48" extended length. It is approved for tools up to 15-lbs.

Hammerhead Industries, manufacturer of Gear Keeper industrial tool tethering systems, has announced their new TL1-3044 ANSI-Compliant $\frac{3}{4}$ inch Super Coil tool tethers for heavy tools and instruments. The TL1-3044 Personal Tool Tethers are strong, impact absorbing tethers. Their Nylon Webbing Construction, with integrated elastic, provides the shortest retraction length to minimize entanglement and low force extension to reduce fatigue during use. The $\frac{1}{2}$ " Super Coil is a flexible, low profile coil system that provides up to an 8-foot working area for tools like power drills, nail guns, power drivers and other similar tools and instruments.

The tether's coil system is fully enclosed in durable and ergonomically sound soft nylon with woven elastic webbing. Unlike competitive "stiff bungee-type" elastic cables, Gear Keeper integrates their elastic into the tethers by weaving it into the webbing. This provides a host of benefits including a longer useful life, a more gentle recoil and extension to avoid arm fatigue and also serves to reduce "drop-shock" while minimizing the chances of bounce back when the tether is used with lighter items.

The new Fixed Loop $\frac{3}{4}$ inch Super Coil tether, is just one of a new Gear Keeper family of ANSI-Compliant tethering products. The tether is rated for use as an anchored attachment to a fixed structure for tools up to 15-lbs. Easily attached to a fixed structural object by its aluminum, self-closing and locking double action locking carabiner with captive eye, anchoring the tether in this manner transfers the shock load produced by a dropped tool from the worker to the structure. The tether can

First there was 4 square...
and now the **REVOLUTIONARY 5 Square® Box!!**

You've struggled with 4 Square boxes for years - you know how small, cramped and time consuming they are. Finally, there is a solution that allows you the space you have always needed.

The **5 Square®** Boxes (5" x 5" x 2-7/8") provide up to 88 in³ of interior volume which more than doubles that of most existing boxes on the market.

Create a robust and unrivaled infrastructure for the life of your facility with the **5 Square®** Products!

BUCCANEER
rope company
Providing strength & stability, with a twist.

also be used as a personal tool tether (attached to a person), but only for tools up to 5-6-lbs are safely permitted for this usage.

The “fixed loop” tool attachment feature of the tether also permits tethering of tools that have no other attachment point. For example, when a larger loop is required to go around a large handle like a chain saw, the worker would just slip knot the “fixed loop” over the handle. It can be also used for looping to an anchor point or to a person and using the carabiner to attach the tools. In use, the tether’s short retracted (resting) length helps avoid entanglement when climbing or working in close quarters.

Following the ANSI guidelines, the new Gear Keeper models are high visibility orange in color and feature a ANSI tag that shows the weight of the tools that are appropriate for the tether. All Gear Keeper products have a printed label with model number, serial number and date of manufacture. The serial numbers allow the company to accurately track the product while the manufacturing date also allows the user to know when the product was manufactured if they track the product service life by period of use. The Gear Keeper TL1-3044 has a MSRP of \$28. Discounts on higher volumes may be available. Contact the company.

To find a dealer near you or for more information about any Gear Keeper product, contact Customer Service, Hammerhead Industries Inc, 5720 Nicolle Street, Ventura, CA 93003 or call (888) 588-9981. You may also visit www.gearkeeper.com •

CARBITEX AWARDED PATENT FOR NEW ANTI-PUNCTURE FLEXIBLE CARBON FIBER INSOLE

AFX-AP Technology Launches Carbitex's First Foray into Work and Utility Footwear Markets

Carbitex – the leader in flexible carbon fiber composites – is proud to announce the recent patent protection of its new anti-puncture foot plate technology. Expanding its advancements across flexible carbon fiber innovations, Carbitex's new AFX anti-puncture (AFX-AP) material offers increased protection without compromising asymmetric flexibility; notably ideal for workers at increased risk of underfoot injury as often seen in construction, workwear, and utility sectors.

Carbitex AFX anti-puncture material (US Patent # 11109639B2) is a multi-layer composite plate that offers the highest degree of performance, and is the only plate with anti-puncture protection and asymmetric flexibility. The new AFX-AP is a protective evolution of Carbitex's lightweight flexible carbon fiber AFX technology that is stiff in one direction to prevent the foot from over-flexing, and is highly flexible in the other direction for improved ergonomic

movement. AFX-AP passes global industry test standards (ASTM F2412-11, EN 12568:2010, CZA Z195-14).

The AFX-AP technology was created by Arjun Shanker, Scott Woolley and Tyler Carpenter, who identified an opportunity to develop an advanced material that would allow for an evolution of traditionally heavy and bulky work-shoe construction to lighter more nimble footwear, that still retains the protective and supportive qualities. AFX-AP allows for this shift by providing the protection and stability usually accomplished through heavy and bulky outsoles in a lightweight package.

“Pushing the paradigm of the construction of work shoes, AFX-AP reduces the need for heavy, stiff protective soles and makes way for lighter, flexible, more ergonomic footwear,” says Tom DeShiell, Principal Engineer/R&D Manager at Carbitex. “Our latest innovation addresses the critical needs of workers, providing protection and stability, with lightweight performance for long hours on the job site.”

AFX-AP is Carbitex’s first foray into the work and utility footwear markets, and is available to brand partners beginning Fall 2022 for in-market product release as early as Fall 2023. •
