Anza Electric
Cooperative
Strengthens
Wildfire Resilience
with McWane Poles

**Company Profile:
Rome Plows**

WHEN ONE LINE FAILS, EVERYTHING IS AT RISK.

Strengthen your grid with ductile iron poles.

As weather events increase in severity and frequency, just one failure point can trigger widespread disruptions and cost utilities millions of dollars in damage.

More utilities are choosing ductile iron to strengthen their grid. McWane Poles are engineered for consistent performance under pressure, delivering a minimum yield strength of 42 ksi and the flexibility to bend without breaking under extreme loads.

Built to outlast wood and steel, ductile iron poles offer:

- 100+ year expected service life
- Resistance to corrosion, delivering fewer failures
- Reduced maintenance, and a more resilient system from the ground up

Protection That Works Wherever You Do

- Reliable gas detection built for real-world job sites
- Simple to use - minimal training required
- Rugged, field-ready design for demanding environments
- Protection crews can trust - wherever the work takes you

ROME

Available in 10, 12, 14, and 16 foot widths

Manufacturing Heavy Duty Construction and Agricultural Equipment Since 1932

ROME Plow has been the premier name in heavy duty disc plows for over 87 years.

Available in 16, 18, 20, 24, and 30 foot widths

ROME has been manufacturing pivot dump and ejector scrapers for over 45 years for the construction and agricultural industries.

Available with 36 or 42" blades, and up to 20' wide

ROME also manufactures a full line of leveling scrapers (with and without gates) and haul road maintenance tools (with and without rollers)

Available in 18 and 22 yard versions

For more information on our products or for the closest authorized ROME dealer please contact us.

Available in 24, 28, 31, 34 and 37 Yards

Steel Tracks available to fit any articulating tractor.

Special Activities Set For EUFMC 2026

The Crashers— back by popular request— will close out the 73rd annual conference

An [EUFMC](#) tradition, a number of Special Activities will take place throughout the 2026 conference. Headlining the closing night, The Crashers will bring their trademark high-energy live music to EUFMC, courtesy of Freightliner, Leadership Sponsor. The Louisville, Kentucky-based musicians, a regular favorite, are back again by popular request.

EUFMC offers activities for attendees and their families. Check the [Special Activities](#) page for details on the following events:

- **Evening Ghost Tour for EUFMC Attendees and Families:** Join a spooky lantern-lit tour of Colonial Williamsburg's storied streets.
- **Colonial Williamsburg Walking Tour:** Learn about Colonial Williamsburg's restored and reconstructed sites.
- **Spouse Reception:** Enjoy refreshments, prize drawings, and great company at the "Page Turners" book-themed reception.
- **Spouse & Retiree Golf Clinic:** Bring your best game to a golf clinic hosted by the professionals of The Golden Horseshoe Golf Course.
- **Tour of Historic Yorktown:** Celebrate America's 250th by spending the day at the site of the American Revolution's final battle, including a Steamer Wagon tour of the Battlefields, a Yorktown Museum tour, and a Fife Performance, followed by lunch.
- **Sunrise Guided Run / Walk:** Join walking and running groups through the Colonial Williamsburg Historic Area.
- **Yoga Class for EUFMC Spouses:** Stretch at an all-levels yoga class hosted by The Spa of Colonial Williamsburg.
- **Spa and Service Break for EUFMC Spouses:** Relax during sound bath meditation and short spa services, or take part in an optional service project assembling blankets for a local animal shelter and writing cards to veterans at the Hampton VA hospital.

Harden Your Grid with Copperweld® Bimetallic Grounding Conductors

Century™

**High-strength CCS conductor
in Bare, Camo and Hide**

For over 100 years, our flagship CCS grounding conductors have been installed in the harshest environments where strength and theft deterrence are required.

ArcAngel™

**Flexible, high-performance
CCS grounding conductor**

Copperweld's new high-strand-count CCS grounding conductors for substation applications where electrical performance is critical and added flexibility is needed.

Stingray™

**Flexible, covered CCS riser
wire for pole-top transformers**

Our easy-to-install, covered, CCS high-voltage cable reduces power outages due to incidental wildlife contact and conductor breakage due to wind fatigue.

Reduced Theft Incentives

Low street value makes CCS unattractive to copper thieves

Superior Strength

CCS is up to 3x stronger than copper conductors

Reliable Performance

Ground fault performance equivalent to copper

Increased Service Life

Fatigue prevention, corrosion resistance and solid connections

Copper where it counts™

Anza Electric Cooperative Strengthens Wildfire Resilience with McWane Poles

Anza Electric Cooperative serves a rugged, mountainous region of Southern California near Palm Springs and San Diego. The rural electric co-op maintains 750 miles of line across roughly 500 square miles, providing power to approximately 5,000 members with a system of about 12,000 distribution poles. Operating in a high fire severity zone, the cooperative faced the challenge of maintaining reliable infrastructure that could withstand wildfire conditions while reducing maintenance demands.

The Challenge

Anza faced multiple challenges in maintaining reliable service across its mountainous service area, particularly in high fire severity zones. One of the primary goals was to lessen outage times during wildfires, which can affect remote or hard-to-reach areas and leave 500 or more customers without power for extended periods. To reduce hazards, crews often shut off power during fires, patrolling lines before safely re-energizing the system. Minimizing outage duration while protecting both the public and crew safety was critical.

Historically, the cooperative relied on wood utility poles, but these structures presented significant limitations. Even when wood poles appeared sound, internal rot could compromise their integrity, making them unpredictable. Fire events highlighted the risk: some poles remained standing while others fell across roads, creating additional hazards.

Annual inspections using visual assessments, hammer tests, and resistograph drilling revealed an increasing number of rotting poles, influenced by varying soil conditions across the region. Even newer wood poles, installed within the last decade, showed early signs of deterioration. In some cases, soil samples were sent to labs to better understand contributing factors, though not all causes could be precisely identified. These uncertainties, coupled with liability concerns, underscored the need for a more resilient and reliable pole solution that could withstand wildfire conditions while reducing maintenance demands and outage risks.

The Solution

Anza connected with McWane Poles at an industry conference and began evaluating ductile iron poles with a pilot installation of two poles in 2018. With guidance from the McWane team, crews quickly adapted to the new technology. Following successful testing, the cooperative expanded the program and now maintains 500–600 ductile iron poles across its system, with additional poles regularly ordered for new projects.

Why McWane Poles

Ductile iron poles offer several advantages that make them well-suited to Anza Electric's system:

- *Wildfire Resilience:* Unlike wood, ductile iron poles do not burn or deteriorate, helping infrastructure remain standing during wildfire events.
- *Long-Term Durability:* As engineered products, ductile iron poles provide consistent strength and predictable performance, eliminating the natural variability of wood poles.
- *Faster Installation:* Standardized drill patterns allow poles to arrive pre-drilled for crossarms, transformers, and communications equipment. Tasks that once took crews up to two hours to complete on a wood pole can now be finished in a fraction of the time.
- *Installation Precision:* Alignment markings on the poles enable crews to position hardware quickly and accurately.
- *Aesthetics and Availability:* The poles blend naturally into the mountainous landscape and are supplied from a regional manufacturing location, ensuring reliable lead times.

SELICK **LIFT, LOAD AND DELIVER WITH SELICK!**

Whether you need to deliver a skid of blocks to a jobsite or move a 16,000 lb. load of steel, Sellick has the forklift that is right for you. "I'm really impressed by the ease of installation and the amount of time it saves. I remember how much time was spent simply framing wood poles when I was on the crew long ago. Now when the crew frames the ductile iron poles, it takes them a quarter of the time. It is incredibly easy, and incredibly fast."

Sandy King, Engineering Manager
Anza Electric Co-Op

Operational Benefits

Ductile iron poles have also enhanced operations in several key areas:

- **Simplified Inspections:** Because ductile iron poles do not rot, intrusive testing is no longer required to assess internal structural integrity.
- **Better Inventory Management:** Engi-

The Solution
 To stak, store,
 protect, and
 pull wire!

Stak: Up to five units tall. Easy two handed ergonomic carry from truck or jobsite.

Store: 500' spools of 14, 12 & 10 AWG wire easily for inventory control. Polymer design reduces damage to finished surfaces on the job.

Protect: Reduces wire damage from tools and personnel. Made of non-conductive polymer.

Pull: Pull wire smoothly from the top or the sides when in the Stak. Support large spools with molded V-Grooves.

LIQUID COOLED GARMENTS

needed poles are uniform in size and weight, improving accuracy in tracking and accounting.

- Predictable Logistics: Known weights and specifications help crews plan installations in remote areas where materials may need to be carried by hand.

Proven Performance

The resilience of ductile iron poles has been demonstrated under real-world conditions. During a wildfire that affected part of Anza's service area, approximately 35 wood poles were lost, while nearby ductile iron poles remained standing, supporting fallen wood poles and keeping roadways clear. The poles have also withstood vehicle impacts, maintaining line integrity and preventing outages.

Long-Term Value

Although ductile iron poles require a higher initial investment than wood, the cooperative has found the long-term economics compelling. Reduced installation time, minimal maintenance, longer service life, and lower wildfire liability risk contribute to significant long-term savings.

"While the upfront cost is higher, we see immediate savings through reduced labor resulting from more efficient installations. Over time, their long service life more than pays for the initial investment. By moving to ductile iron, we have avoided the costs associated with damage that occurs from natural wood degrada-

The advertisement features a dark blue background with a silhouette of a power line tower. On the right side, there is a detailed image of a white cylindrical electrical regulator with various components like insulators and a control panel. The Sunbelt Solomon logo, a white circle with a stylized lightning bolt, is in the top left. The word 'SUNBELT SOLOMON' is in large white capital letters. Below it, 'REGULATORS' is written in a bold, italicized white font. A bulleted list of services is provided in white text. At the bottom, a dark blue banner contains the text 'GET A QUOTE TODAY' in white, followed by contact information and a disclaimer in smaller white text.

tion and woodpeckers. And in a wildfire scenario, the value is immediate. There's much less risk of pole failure, which helps us avoid costly cascading situations."

Sandy King, Engineering Manager
Anza Electric Co-Op

A Strong Partnership

From the first pilot installation to ongoing system upgrades, McWane Poles has collaborated closely with Anza to provide technical guidance and support. The cooperative continues to expand its use of ductile iron poles as part of its long-term infrastructure strategy, benefiting from faster installation, improved operational efficiency, and enhanced wildfire resilience.

MAX USA Corp. Introduces RB613T World's First #9 x #10 Rebar Tying Tool

Engineered to tie larger rebar combinations while delivering unmatched strength and speed on every job site.

MAX USA Corp., a leading manufacturer of high-end industrial tools and accessories, proudly announces the launch of the new RB613T—a high-performance rebar tying tool designed to deliver faster tying speed and maximum tying power engineered to secure larger rebar combinations with unmatched strength.

Built for productivity and durability, the RB613T is engineered to help contractors tie faster and work more efficiently without compromising strength or consistency. Featuring a larger jaw size designed to accommodate large rebar combinations tying up to #9 x #10 rebar. Combining advanced tying technology with enhanced power, the RB613T ensures secure, uniform ties even in heavy-duty rebar applications.

Key Benefits:

REPAIR CONDUIT IN A SNAP!

- No Tape
- No Plastic Straps,
- No Metallic Straps

NO KIDDING!

**Designed especially for
power, communications,
and fiber optics**

- **MAXIMIZE REBAR TYING** – Features a larger jaw capacity than most battery-powered rebar tying tools for greater versatility on the jobsite. Ties up to #9 x #10 rebar.
- **NEW FASTER TYING** – The RB613T tying speed was reduced to approx. ½ second. Approximately 15% faster than the RB611T.
- **NEW LOAD ASSIST MECHANISM** – New wire loading system automates wire loading for tool.
- **NEW EASY PULL TRIGGER** – Reduced trigger effort is required, improving operational ergonomics.
- **BUILT TO LAST** – The TWINTIER is built to last with durability that you can count on time and time again from MAX.
- **COST SAVINGS** – The TWINTIER's Wire Pull-Back Mechanism dispenses the precise amount of wire needed to form a tie, reducing wire usage.

Combining rapid tying performance with controlled, reliable power, the RB613T is purpose-built for today's toughest jobsites focused on a multitude of applications ranging from Commercial Buildings, Foundations, Road and Bridge Construction, and Precast Plants. Its increased jaw capacity accommodates rebar combinations up to #9 x #10, allowing crews to work efficiently on larger-scale projects.

The new RB613T is now available for purchase at your local MAX dealer in North America, offering construction professionals increased speed and comfort without compromising the rugged durability MAX is known for.

Company Profile: Rome Plows

Company Name: Rome Plow Company

Headquarters: Cedartown, Georgia, USA

Founded: 1932

Industry: Agricultural and Industrial Equipment Manufacturing

Overview

Rome Plow Company, commonly known as Rome Plows, is a leading manufacturer of heavy-duty tillage and land-clearing equipment. Since its founding in 1932, the company has specialized in producing some of the most durable and powerful plows in the world. Best known for their rugged disc plows, Rome Plows are widely used across agriculture, forestry, construction, and military applications, earning the reputation as *"The World's Largest Independent Manufacturer of Tillage Equipment."*

History

Rome Plow was established in Cedartown, Georgia, during the early 20th century, initially serving the needs of farmers in the Southeastern United States. The company quickly grew into an internationally recognized brand by pioneering robust plows and earthmoving equipment capable of handling tough soil, dense vegetation, and large-scale land development projects.

During the Vietnam War, Rome Plows became especially notable when the U.S. military adopted their

massive land-clearing plows, mounted on armored bulldozers, to cut through dense jungles. This cemented the company's reputation for producing some of the toughest land-clearing equipment in the world.

Products and Services

Rome Plow designs and manufactures a wide range of heavy-duty equipment, including:

- **Disc Plows & Harrows** – Engineered for tough soil conditions and large-scale farming.
- **Rome Tillage Equipment** – Specialized implements for seedbed preparation and soil management.
- **Forestry & Construction Plows** – Heavy plows for land clearing, logging, and earthmoving.
- **Military-Grade Plows** – Adapted for defense and large-scale clearing operations.
- **Replacement Parts & Service** – Long-term support for equipment performance and durability.

Market & Customers

Rome Plows serves a global customer base in over 50 countries, supporting industries such as:

- Commercial Agriculture
- Forestry and Logging
- Construction and Infrastructure Development
- Military and Defense
- Land Reclamation and Environmental Management

Its customers range from small-scale farmers to large agricultural enterprises, logging companies, construction firms, and government agencies.

Reputation & Strengths

- **Durability:** Equipment built to last decades under extreme conditions.
- **Global Reach:** Products shipped and supported worldwide.
- **Legacy:** Nearly a century of continuous innovation and reliability.
- **Specialization:** Focused expertise in tillage and land-clearing solutions.

Mission Statement

Rome Plow Company is dedicated to providing the most reliable and effective tillage and land-clearing equipment available, helping industries worldwide transform tough terrain into usable land with efficiency and durability.
